# Royal Baking Powder

ABSOLUTELY PURE

This is the only baking powder made from Royal Grape Cream of Tartar.

It Has No Substitute

There are Alum and Phosphate of Lime mixtures sold at a lower price, but no housekeeper regarding the health of her family can afford to use them.

## PAVING WILL BE FINISHED BY COMMENCEMENT

GOOD PROGRESS BEING MADE ON EAST ELEVENTH STREET—WORK SHOULD BE RUSHED ON CEMENT WALKS

One of the Warren Construction Company rock crushers broke down yesterday, but the repairs were completed today and the machine is again in operation this afternoon. The paving work on East Eleventh street is going ahead quite rapidly and Superintendent Shewry says he thinks the entire street will be finished up by commencement week at the University. It is now up to the property owners along the street to finish their cement sidewalks. In many places the board walks have been torn up waiting for the cement workers, who have so many contracts on hand that several weeks must elapse after the board walks are taken up before the cement walks are put down. All of this work should be done so the street will present a good appearance to the hundreds of visitors who will be here during the week. The commencement exercises will be held during the week beginning June 21.

### BORN

In Eugene, May 26, 1908, to Frank E. Walter and wife, a son.

fish among them. There has been for the past fifteen years constant over-fishing of the adult spawning fish. I do not know that wheels or traps are any more destructive than any other agency which destroys the fish in equal numbers. The problem in fish protection is simply to devise some means to limit the number of fish caught. This could be done by forbidding the use of wheels or traps of all kinds, or seines, by limiting fishing season, by preventing fishing on certain days, or in several other ways now under discussion. I do not know of any reason, however, why the wheel is any worse than any other contrivance catching the same number of fish.

Very truly yours,  
David S. Jordan, President.  
Gillnets catch 65 per cent of all salmon. All other gears 35 per cent. Selfish legislation would regulate the most destructive. GILLNETS. A square deal treats all alike.

## ATHLETICS AT THE HIGH SCHOOL

TRACK MEET IN CORVALLIS AND BASEBALL GAME IN EUGENE ON SATURDAY

This week will be the end of most of the athletic activities at the high school. The baseball team will play their last game of the season with Columbia University at Recreation Park Saturday afternoon at 3:30, while the track team will meet the other track teams of the state in the big interscholastic meet given under the auspices of the Oregon Agricultural College at Corvallis on Friday and Saturday. This will be the last track meet but one for the year, the other being a dual meet with Salem high school to decide the championship of the Willamette valley, held in Eugene Friday, June 6.

The high school has a track team well worthy to compete with any academic team in the state and if their work is up to the usual form they should take a place near the 20000 mark on the score next Saturday afternoon and those who delight in a good, snappy, spirited game of baseball should come out and watch these two fast academic teams play the game of their lives.

The local high school team is determined to place another blot on their good record by pulling down the long end of the score next Saturday afternoon and those who delight in a good, snappy, spirited game of baseball should come out and watch these two fast academic teams play the game of their lives.

## You Will Need an Oil Stove

When warm days and the kitchen fire make cooking a burden—then is the time to try a New Perfection Wick Blue Flame Oil Cook-Stove. Marvelous how this stove does away with kitchen discomforts—how cool it keeps the room in comparison with conditions when the coal fire was burning. The quick concentrated heat of the

## NEW PERFECTION Wick Blue Flame Oil Cook-Stove

goes directly to boil the kettle or bake the bread, and none is diffused about the room to overheat it. Thus using the "New Perfection" is real kitchen comfort. Made in three sizes and fully warranted. If not with your dealer, write our nearest agency.

The Rayo Lamp Just such a lamp as everyone wants—handsome enough for the parlor; strong enough for the kitchen, camp or cottage; bright enough for every occasion. If not with your dealer, write our nearest agency. STANDARD OIL COMPANY, (Incorporated)

## FISHWHEELS NOT DESTRUCTIVE SAYS DAVID STARR JORDAN

PRESIDENT OF LELAND STANFORD JUNIOR UNIVERSITY INVESTIGATED COLUMBIA RIVER IN 1880—WHAT HE WROTE ON THE SALMON CRISIS

Leland Stanford University, Palo Alto, Santa Clara Co., California.

Mr. H. D. McGuire, Portland, Oregon.

Dear Sir:—In response to your questions of March 29, permit me to say that it is now fifteen years since Dr. Gilbert and I studied the salmon problem for the United States Fish Commission. Since that time Dr. Gilbert has been engaged in various researches for the government and many of our former opinions have been modified in the light of

these recent developments. It now seems probable that the small chinook salmon running in the river are all young males. They are sexually mature and the greater part of them die on the spawning beds. As no females are found among these young fish, it would seem that their destruction can do no harm. As it is the adult males are sufficiently numerous to serve the needs of the species.

Regarding the young fish, I have changed my former opinion since I discovered through the researches of Dr. Gilbert that there are no female

## What About Salmon Protection?

That the food fish of our state need better protection than is now afforded is agreed. You have already or doubtless will receive considerable literature on the subject, but no matter how attractive the argument, stop and consider how it may be colored by self-interests. The United States Bureau of Fisheries are the greatest expert authorities on the subject and have NO AX TO GRIND. Read what they say.

### DEPARTMENT OF COMMERCE AND LABOR

Office of the Secretary, Washington, D. C.

Hon. Charles W. Fulton, United States Senate, Washington, D. C.

Sir: The Department realizes the importance of the various questions affecting the salmon fishery in the Columbia River brought up in your letter of the 18th ultimo, and has taken this opportunity to make a thorough investigation of the matter. There can be no question that the status of the fishery is unsatisfactory, and that under existing conditions the trend may be expected to be steadily downward, with the result that in a comparatively few years the run of salmon in that stream will be reduced to such a degree that thousands of fishermen may be thrown out of employment and much capital rendered idle. The Federal Government is without any jurisdiction over the Columbia basin, and the duty of conserving the salmon supply in Columbia devolves on the States of Oregon, Washington, and Idaho; but this Department has been charged by Congress with important fish-cultural operations in the Columbia basin, and has felt impelled from time to time to direct attention to the necessity for giving adequate protection to the various species of salmon frequenting that stream. The Department is convinced that the run of salmon in the Columbia can be amply maintained for an indefinite period if artificial propagation is supplemented by rational protection; but artificial propagation alone cannot cope with the situation, and, as a matter of fact, the recent experience of the Department has shown that its beneficent labors are rendered almost futile by the failure of the States to appreciate its value.

The Department sees no reason for advocating the elimination of fish wheels from the river, as there is no evidence to show that this form of apparatus is particularly destructive to salmon. A condition that is specially favorable for the passage of salmon—namely, very high water—renders the wheels unserviceable, and, on the other hand, periods of very low water, when the fish are much restricted in their movements, are also unfavorable for the wheels. During the past two or three seasons the catch of salmon by wheels has been comparatively small; but even if it were very large it would be a fact of no special significance in the present connection.

The Columbia River is, however, made to yield a quantity of salmon far greater than regard for the future supply permits, and the drain is yearly becoming more serious. No one familiar with the situation can fail to appreciate the menace to the perpetuity of the industry that is furnished by the concentration of a tremendous amount of fixed and floating apparatus of capture in and near the mouth of the river. This apparatus comprises about 400 pound nets or traps, over 80 long-sweep seines, and more than 2,220 gill nets, the last having an aggregate approximate length of over 370 miles; and these appliances capture more than 95 per cent of the fish taken in the Oregon and Washington waters of the river, the figures for 1904 being nearly 34,000,000 pounds or 98.7 per cent of the total yield. Under such conditions, it is self-evident that but comparatively few fish are permitted to reach the upper waters where the spawning grounds are located.

The details of the measures necessary to place the salmon industry of the Columbia River on a permanent basis cannot be elaborated by the Department at this time, but in general it may be said that there should be (1) a restriction on the amount of apparatus employed in a given section; (2) an adequate weekly close season covering possibly two days at first, but reduced later, if the circumstances warrant it; (3) an annual close season, preferably at the beginning of the salmon run, and (4) joint arrangements between the States, so that protective measures may be harmonious.

Respectfully yours,  
(Signed) OSCAR S. STRAUS, Secretary.

Bill No. 318 embodies government recommendations and should pass. It is a square deal for all.

VOTE 318—X—YES

Bill No. 333 was framed to foster the selfish interest of a single locality. It is against the Government recommendations, and will mean a heavy tax on the State to carry out its provisions. It favors monopoly and is unfair. It should not pass.

VOTE 333—X—NO
