## BOY DIES SUDDENLY IN PHYSICIAN'S OFFICE

### CLIFFORD VICKERS EXPIRES AFTER RECEIVING TREATMENT OF ANTI-TOXINE FOR ASTHMA.

Clifford Vickers, the 17-year-old son of E. T. Vickers, a recent arrival in Eugene from Denver, Colo., died suddenly in Dr. Geo. O'B. DeBar's office this forenoon. The boy had been a sufferer from asthma for several years, and his father recently brought him to Eugene in hopes of benefiting his health. He improved somewhat, but the improvement was not as rapid as desired, and his father took him to Dr. DeBar this morning to have him treated by a comparatively new method, which many times has been successfully tried, but in some instances has proven fatal as in this case. The treatment is a hypodermic injection of anti-toxine. Dr. DeBar made the proper injection, but immediately afterwards the boy showed signs of weakening and within a few moments was dead. Everything was done to resuscitate him, but without success. Dr. F. W. Prentice was sent for but he could do nothing to help the boy.

The physicians explain the cause of death as being a peculiar condition of the lymphatic system and in that condition when an injection is used the lymphatics empty themselves into the lungs and the patient is literally drowned. In some instances if a mere injection of water is made the result is the same.

The boy's mother who is at Denver has been informed of the death by wire and funeral arrangements will not be made until she is heard from. The family intended locating in Eugene, and it is probable that the body will be buried here.

A message was received from Mrs. Vickers stating that she would leave Denver at 4:30 o'clock this afternoon. Interment will be withheld until she arrives.

They will leave the auto there and arrange to call on Siskione and Idaho points, returning to Eugene in a short time.
