

Thousands Have Kidney Trouble and Never Suspect It.
 Prevalency of Kidney Disease.
 Most people do not realize the alarming increase and remarkable prevalence of kidney disease. Which kidney disorders are the most common diseases that prevail, they are almost the last recognized by patient and physician, who consent themselves with doctoring the effects, while the original disease undermines the system.

What To Do.
 There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wish in curing rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or had effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often during the day, and to get up many times during the night. The mild and extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. \$4 by drug-gists in fifty-cent and one-dollar packages. You may have a sample bottle and a book that tells all about it, both sent free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y.

MINISTERS AFTER SUNDAY BASEBALL AT SALEM
 Salem, July 16.—Sunday baseball is a dead sporting event at Salem, according to three ministers who have been trying to stop games on the Sabbath.

When the preachers notified Manager Heyser, of the Salem team, that arrests would follow any attempt to start Sunday baseball, the manager replied: "Better have your warrants ready now, for the Tri-City game will be played next Sunday, no matter what happens."

COL. MERCER'S BIG TWO-STORY WAREHOUSE

Col. W. G. D. Mercer calls his huge transfer car, which is expected to arrive about August 6, "Pegasus." This word, as well as having a classical meaning, has a deeper significance, which the Colonel believes the people will realize when they note the revolutionizing tendency in the new traffic handler. He expects the machine to be operated for 50 cents a day.

Colonel Mercer, in speaking of his warehouse proposition and his new electric auto truck enterprise, today said: "The first idea was to erect a 30x60 building one story high. It was soon discovered that this was too small and it was thought that a two-story 40x60 would be sufficient, but just as I was in the act of issuing final instructions for its erection there was, to my surprise, great pressure brought to bear on me to make still further provision for the special accommodation of the students at the University who, it was claimed, had been really needing such accommodations for their belongings during vacations. As soon as I was convinced that this was true, I at once (and quite willingly, I assure you) changed my plans so as to make the building 40x80 feet two story. The architect is completing the plans this afternoon and I shall at once commence on the building. I had at first thought that I would rent an office up town but have just decided to make a neat, cozy office in the building. I shall also install my splendid new Mercury arc rectifier (a double bulb and one of the latest and most expensive on the coast. Nothing better or more expensive in Frisco or Portland), in the building where our storage batteries on the electric will be charged each evening. This, of itself, is a sight worth going long miles to see and when once seen will never be forgotten. In the center of the building I shall have an electric hoist (elevator), and every modern, labor-saving device for rapid handling of freight, etc., entrusted to our care.

"The south front of the warehouse is to be made as attractive as possible and will also display an attractive sign somewhat larger and more artistic than John Hancock's signature to the Immortal Declaration of Independence."

MOHAIR MARKET IN SOUTH AFRICA.
 Under date of June 1, Messrs. Poppe, Schunhoff & Guttery report

the condition of the mohair market at Port Elizabeth as follows:
 "The depression continued the greater part of last month, but as holders of last year's summer hair accepted the situation and were anxious to make a clearance, a fair amount of business has been done on a basis of about 8d for average and up to 1-1/2d for better lots, while new season's summer brought from 7-1/2d to 8-1/2d according to quality and length and up to 9-1/4d for special lots. The new clip is arriving very slowly, being evidently detained up country by farmers and dealers, and nothing of any consequence has arrived as yet. There is some inquiry for summer kids up to 16d and one or two lots of last year's winter kids have cleared it at 9d. During the past week the inquiry has become more general, resulting in a fair amount of business on above basis.

"Shipments since our last amount to 2800 bales. Stocks in town amount to about 2500 bales. Our today's quotations are as follows: Super summer kids 15-1/2 to 16-1/2d; super summer first 8-1/2 to 9d; medium first, 7-1/2 to 8-1/4d; short and mixed 6d to 7-1/2d; low and inferior thirds 3-1/2d to 5-1/2d; O. R. C. super blue, 8d to 9d; ditto mixed 7d to 8d; winter hair (nominal), 7d to 7-1/2d.

"Goatskins are firm and sell at 9-1/4d to 9-1/2d for good average parcels.

"Angora skins are in small supply but good demand at 5-1/2d to 4-1/2d for good average parcels."
 -dra's amount 1/2-1/4v mad tonid

THE REMEDY THAT DOES.
 "Dr. King's New Discovery is the remedy that does the healing others promise, but fail to perform," says Mrs. E. R. Pierson, of Auburn Centre, Pa. "It is curing me of throat and lung trouble of long standing, that other treatments relieved only temporarily. New Discovery is doing me so much good that I feel confident its continued use for a reasonable length of time will restore me to perfect health." This renowned cough and cold remedy and throat and lung healer is sold at W. A. Kuykendall's drug store. 50c and \$1.00. Trial bottle free.

LANE COUNTY WON SECOND PRIZE AT CHERRY FAIR

J. Beebe, who accompanied the Lane county cherry exhibit to the cherry fair at Salem, wired J. O. Holt, secretary of the Lane County Fruit & Vegetable Growers' Association this morning that the exhibit won second prize. The winner of the first prize was not mentioned in the telegram. The exhibit was a splendid one and Mr. Holt, who superintended its arrangement, was confident that it would receive recognition from the judges. Nearly every county in the valley as well as those in other parts of the state competed for prizes.

KALE CROP TALKS FOR OREGON DAIRIES

(Oregon Agricultural College Press - Bulletin, by James Dryden.)
 Kale is one of the best talking crops in Oregon. When the Oregon booster wants to prove that Oregon is the best dairy state in the Union he has to talk Kale. Unless he knows what Kale will do to the milk bucket he has not qualified as a booster. It is called the Thousand-headed Kale and the botanist knows it as Brassica oleracea, but it is the plain Kale of four letters that does the talking. The strange thing is that it has only been during the last two or three years that it has had an audience though it is nearly thirty years old in the Willamette valley. It has tried to talk all those years, but the people wouldn't listen when it sought recognition. "We never heard it talk," they insisted. "back in Iowa and New York. Back there cows produce milk without Kale and I guess they will have to here." That is tradition. It took thirty years for Kale to get an audience in this state and live down tradition.

The dairymen of New York understand what green succulent food means to the dairy cow, and they build expensive silos, buy expensive machinery and grow fertility-robbing corn which they irrigate with their sweat, in order that the farmer during the long winter months may have an excuse for milking his cows. The Oregonian needs no expensive silos to remind the cow of the good old summer time. Kale! A thousand blessings on the Thousand-headed Kale! It is making Oregon the greatest dairy state in the Union.

When grown under favorable conditions Kale will yield 40 tons per acre of green feed and its chief value is as a silaging crop during the fall

and winter. Splendid results are being secured by feeding Kale and vetch hay to dairy cows without any grain or mill feed. Dr. Witherspoon of the Agricultural College says that 15 pounds of Kale a day is practically a balanced ration for a dairy cow. Mr. W. L. Wilson of Banks, Oregon, says: "I received \$267 from 14 cows in the month of December and fed them nothing but kale, turnips and vetch hay. The man who feeds chop would have to make \$237 to clear as much as I do. I have not had a speck of milk feed in the barn all winter."

Mr. Byron Hunter, of Corvallis, has, as assistant agriculturist of the Bureau of Plant Industry, U. S. Department of Agriculture, made a special study of the forage crops of Western Oregon, and in Bulletin No. 91, published jointly by the Oregon Experiment Station and the Department of Agriculture, has the following to say about kale, which is timely:

"Methods of Sowing:—For fall and winter use, kale is usually sown in drills on well prepared and drained soil as soon after the 15th of March as the season will permit. This furnishes plants for transplanting in June and July. The land used for transplanting is well manured and plowed two or three times between the first of March and the first of June. With the land in perfect tilth it is plowed again with a 12-inch plow about the first of June and the young kale plants dropped into every third furrow about 2 1/2 to 3 feet apart. This places about one plant on every square yard. The roots of the plants are placed where the next furrow covers them, leaving the tops uncovered. The plants that are plowed in during the day in this way are rolled in the evening of the same day to pack the ground. Two or three cultivations are all that can usually be given, for the plants will soon touch in the row if they grow well. Any plants that fail to grow may be replaced by hand. Some growers prefer to plant the seed in hills, and when the plants are large enough thin them to one plant in a hill. Others put kale out just as cabbage is usually transplanted, instead of plowing it in. The time of transplanting must be determined by the size of the plants and the condition of the land. If the land is wet and subject to overflow the transplanting may be delayed until during July. If the land is well drained and the plants are large enough it may be done before the first of June. In transplanting, enough plants may be left for a stand on the land where the seedlings are grown."

KLAMATH COUNTY WILL CONTINUE DRY

Klamath Falls, Or., July 16.—Judge E. L. Benson, in a lengthy opinion has decided against the plaintiffs in the action brought to set aside the result of the June election on local option. Klamath county will remain dry. Judge Benson holds the assignments of error were not well founded and concludes with this language: "But above and beyond the technical language of the schedule, it is to be remembered that if there had been a fair and free election the will of the people had been voiced fairly and without fraud or intimidation, the court should be very slow to set such a verdict aside. It follows that the writ of review should be dismissed."

Blair Street Addition

The streets have just been nicely graded and the sale of lots is brisk. Many people are buying the very choicest residence lots at lower prices than will ever again be offered in Eugene. People are waking up to the unusual advantages of BLAIR STREET ADDITION.

IT IS THE TALK OF THE TOWN

Do you realize what an investment in this addition will do for you? How can it avoid advancing in value with these lots lying right against the built up district, and where the city is certain to get its greatest growth? Let one of the agents named below take you out there. You don't need to buy if you don't want to, but we think you will want to after you see these fine lots and know about the easy terms—you make your own terms—you may have. Better not wait; the other fellow is getting busy and it's time you acted, before all are sold. There are ONLY TWENTY LOTS and TWO ACRE TRACTS LEFT.
