WHY HARRIMAN MADE LOAN TO GEORGE GOULD

Hot Springs, Va., Aug. 5.—Melville E. Ingalls, chairman of the board of

MELVILLE E. INGALLS, directors of the Big Four Railroad.

today said "It looks to me like Harriman is trying to be funny and is endeavoring to avoid being interviewed. He is not funny. He is a shrewd, wily, grasping little man, who cannot see a joke and tells a story badly."

"Of course, we all know that Harriman did not buy the Wheeling or the Erie railroad to make a direct profit. But he has a great scheme for the Union Pacific, and he cannot afford to have American securities depreciated."

"This explains his statement that he wants to see this country the greatest on earth, and that he intends to help make it so."

DANISH EXPLORER DEAD IN FAR NORTH

Copenhagen, Aug. 6.—Mylius Eriksen, the Danish explorer, has met death in the far north, according to a telegram received. With two companions he was overtaken by a snowstorm while on an exploration expedition over the ice and perished.

A. A. Stoneberg began suit in the circuit court today against the Matheson Glass Company to recover money. W. J. Hooker is attorney for the plaintiff.

HARRIMAN HAS NO CHOICE BETWEEN TAFT AND BRYAN

Ogden, Aug. 6.—E. H. Harriman today said there was nothing to the rumors that he had or intended to obtain control of the Gould railroad properties. He acknowledged, however, that his company had helped the Gould properties financially.

On the political question he said the election of either Taft or Bryan would not affect the railroads of the country, because both parties were pledged to the preservation of railroads which violate the law.

BRYAN WILL CONDUCT HIS OWN CAMPAIGN

Fairview, Aug. 6.—That Bryan proposes to conduct his own campaign to a considerable extent was developed today when he announced that he would spend three days in Chicago, beginning August 22, to confer with Chairman Mack and other leaders of the party and give them the benefit of his counsel.

TAFT TALKS TO VIRGINIA LAWYERS

Hot Springs, Aug. 6.—Judge Taft today addressed the Virginia Bar Association, giving in detail his views on the delay in the administration of law, and making suggestions for reform.

Judge Taft presented his subject by stating that the end sought in the administration of justice was to promote tranquility and contentment among the people. It had, he said, long been established that the supreme court of the United States was the ultimate arbitrator of the great political and legal issues, deciding on the limitation of both the legislative and executive branches of government which had carried the usefulness of the courts beyond anything anticipated in other countries.

"There are," he said, "abundant evidences that the prosecution of criminals has not been certain and thorough to the point of preventing popular protest. The existence of lynching in all parts of the country is directly traceable to this lack of uniformity and thoroughness in the enforcement of our criminal laws."

"The inequality that exists in our present administration of justice and that is certain to sooner or later rise and trouble us and to call for popular condemnation and reform, is in the unequal burden which under the delays and expense of litigation under our system impress on the poor litigant."

AMBASSADOR HILL SPEAKS IN BERLIN

Berlin, Aug. 6.—Ambassador Hill delivered the opening address at the International Congress of Historical Sciences on the "Ethical Function of the Historian." He said in concluding:

"Thus, from every point of view, we see that the function of the historian is not to deal with uniformities and universal formulas, but with the variations of human conduct, and to measure its success and its failure upon the scale of rational endeavors; for history is the record of man's efforts to solve the problems with which his nature and his environment confront him. It is good for mankind to realize that, although living in a universe governed by law,

as a result of its freedom it has sometimes gone wrong; and that, without a loyal adherence to great principles, it may go wrong again. The best antidote to this eventuality is the true science of the past. But, whether it be for good or evil, as men of science dealing with the largest and most intricate of human development, historians are bound by that scientific conscience which in the best of the halcyon and the glory of their profession, to speak reality and to speak to the world. Die Wissenschaftler ist das weltgerichtet."
