T INDIANS SLAY THIRTEEN MINERS

Paso, Texas, Aug. 6.—Thirteen n were killed in the Lampazas in Mexico, by Yaqui Indians, who are now threatening to attack the Promontorio mine, where the survivors have taken refuge, according to private advices received here today. The letter, telling of a massacre which took place on July 24, was received by friends of A. D. McPhee, superintendent of the Promontorio mine, which is located about 20 miles from Montezuma, Sonora.

Without warning a band of Yaquis swept down upon the Lampazas and slaughtered thirteen members of three families. The other persons at the mines saved their lives by fleeing to the Promotorio. An alarm was sent to the ranchers throughout the country, who have also taken refuge at the mine, and at the time the letter was sent was alding in preparations to resist any attack.

CUPID MUST WEAR UNION LABOR STAMP

Chicago, Aug. 6.—"Darling, I am in good standing with my union. Will you be my wife?"

This will be the stereotyped form of proposal hereafter, if the plans today by officers of the Woman's Trade Union League are adopted at its national conference to be held simultaneously in Chicago, New York and Boston next month.

The scheme to be considered at the conference is to send out cards to every member of the league setting forth a few rules for the guidance of those matrimonially inclined.

The league wants its members to agree not to marry a man unless he is a member of a union and holds a fully paid-up card.

MAY DECIDE FATE OF GOVERNOR HUGHES

New York, Aug. 7.—Chairman Hitchcock left today for Oyster Bay to be the guest of President Roosevelt at luncheon. He admitted he expected there would be a discussion of the New York governorship nomination, but discouraged the suggestion that as a result of the conference there may be an official expression of preference of the national Republican leaders as to the renomination of Hughes or the naming of some other man. He reiterated that he had not deviated from his policy of taking no sides in the matter.

RAILROADS GRANT NO FAVORS TO BRYAN

Fairview, Aug. 7.—Mr. Bryan was in conference over the long distance telephone with Chairman Mack at Chicago today. It is understood the conversation had to do with the refusal of the Western Traffic Association to make special rates to Lincoln upon the occasion of the notification on August 12.

Bryan is availing himself of the cool weather by utilizing every spare moment in preparing several speeches he will make this month. The one on the tariff at DesMoines is expected to be an exhaustive treatment of the subject.

COURT RECEIVES EUGENE-MAPLETON ROAD PETITIONS

HUNDREDS OF SIGNATURES TO PAPERS ASKING FOR PERMANENT IMPROVEMENT OF HIGHWAY — MAY BUILD SOLID CRUSHED ROCK ROAD—BLAST OFF BEECHER ROCK

Several monster petitions for the improvement of the county road between Eugene and Mapleton were presented to the county commissioners' court this morning. This movement was inaugurated by the Eugene Commercial Club soon after John H. Hartog, manager of the Club, passed over the road going to and from the rhododendron festival at Florence early in the summer. He noted the wretched condition of the highway, and at once took steps to bring the matter before the people so that it could be properly presented to the court. Petitions were circulated throughout the county and hundreds of signatures were secured.

The court took the matter under consideration, and will probably take no definite action for some little time. It is said the court is opposed to a plank road, owing to its lack of durability, but this morning the members of that body talked favorably of sending one of the county rock crushers out there to make a solid crushed rock road all the way from

ATLANTIC FLEET ENCOUNTERS STORM

Auckland, Aug. 7—A wireless message from the Atlantic fleet to the supply ship Culgoa states that the fleet yesterday encountered the heaviest weather of its voyage.

The ships pitched about in the heavy seas and spars were knocked down, but the fleet kept its formation easily.

Auckland, Aug. 7.—With the fleet but three hundred and sixty miles off, the city is taking on a gala appearance. Parliament has adjourned for two weeks that its members may devote themselves to the entertainment of the visitors, there being only two objectors, both Maoris. It is explained that the Maoris are in no way enthusiastic over the visit of the American fleet because of the attitude of the American on Pacific color line.

Redding, Cal., Aug. 7.—W. L. Ulenhart, formerly of Astoria, committed suicide by shooting last night. He was aged 60, and had long been a sufferer from rheumatism. He was a son of Lloyd Ulenhart, who is assistant general baggage agent of the San Pedro & Salt Lake road.

IDAHO CATTLE RUSTLERS GIVEN UP TO OFFICERS

Lewiston, Idaho, Aug. 6.—Two of the Idaho cattle rustlers, wounded, footsore and weary from being chased two days by Idaho deputy sheriffs and posses through the timber of the Upper Clearwater brakes, surrendered yesterday without fighting, and the third one, W. P. Reid, the man with a record and a price on his head, is either dead or dying from the loss of blood and lack of food, or is by the ruse of this surrender making his get-away over well-known trails to the Montana side of the Bitter Root.

Opinion at Orofino is equally divided on the question of what has happened to Reid. Sloan and Rice, who surrendered to Deputy Sheriff A. B. Marsters today, say that when they last saw Reid Monday night he was weak from loss of blood, and turned back and told them to save themselves, that he was done for and must have medical help.

BALDWIN'S NEW ARMY BALOON HAS MADE GOOD

Washington, Aug. 7—The new military dirigible balloon built by Captain Thomas S. Baldwin for the United States army made a successful flight this week with Captain Baldwin piloting and Glenn H. Curtis handling the motor.

CAPTAIN THOMAS BALDWIN.
Balloon expert who has built a new dirigible craft for the government.

At 6:40 o'clock, after a final test of the motor, Captain Baldwin gave the order: "Everybody let go but me—let her go, boys." With the propellor revolving at moderate speed the airship rose slowly to a height of 50 feet. Heading for Arlington cemetery to the southeast, Mr. Curtiss increased the speed of the motor. As he did so the speed kept the ship ascending by means of the planes, Captain Baldwin brought it about, head up against the wind. A semi-circle was described to the south and then the ship was brought completely around so that it faced the north, moving with the wind. Passing directly over the starting point, Captain Baldwin made another circuit. The ship was at a height of about 1000 feet. The landing was made within thirty feet of the starting point.
