I. B. Cushman, of Acme, sent The Guard a salmon Saturday that was one of the finest we ever saw. Rude and Barney Paine as appraisers.

Black for his irrigation scheme it was stated that "he expects to complete 45,000 feet of concrete capacity at the lake by next November, which amount of water will be available for irrigation next summer." It should have read "45,000 acre feet." An acre foot of water is the amount of water that will cover an acre one foot deep, being 43,560 cubic feet, which if frozen solid and cut into cubes one foot square, would make 43,560 blocks of ice one foot square by stating "45,000 feet" without the word "acre," the amount of the reservoir capacity was minimized 43,569 times.
