COME IN AND LOOK

SAY! We have the swellest line of Men's Shirts, Ties and Hose ever shown in this city. They are just what you are looking for.

Shirts from 50c to \$2.00

The Crescent

Notice for Publication. United States Land Office, Roseburg, Or., March 31, 1908. It is hereby given that in compliance with the provisions of the act approved June 3, 1878, entitled 'An act for the sale of timber lands in the states of California, Oregon and Washington territories' extended to all public land in the state of Oregon, filed in this office at Eugene, Oregon, county of Douglas, on the 17th day of June, 1907, his sworn statement No. 8275, for the purchase of SW 1/4 of Section No. 22, Township No. 19 south of Range No. 10 W. M. Or., and will offer for sale the land sought to be patented for its timber or stone for agricultural purposes, and will accept any claim to said land by the applicant and receiver at this office at Eugene, Oregon, on Wednesday 7th day of September, 1908.

A GOOD STOMACH

Means Good Health, Cheerfulness, Ambition, Persistence and Success.

Relief is not cure; opium will stop the most excruciating pain, but it won't cure the disease. And it's just the same with alleged dyspepsia cures which contain opium. The opium will help to digest the food, but the stomach is left in worse condition than it was before. You don't want opium to digest your food; you want the natural juices of your stomach to digest your food. If you have dyspepsia or any stomach trouble, you want to make your stomach so strong that it will digest its own food.

You can make your stomach so strong that you can eat what you want and all you want any time you want it, without distress.

Mi-o-na will cure your dyspepsia or any other stomach trouble by building up the flabby walls and making the stomach so strong that it will digest food without artificial aid.

In other words, Mi-o-na will cure dyspepsia by removing the cause. The Red Cross Drug Company is the agent for Mi-o-na in Eugene, and they say to every resident of Eugene whose stomach is weak, who has indigestion or dyspepsia, that Mi-o-na is guaranteed to cure or money back.

The price is only 50 cents a box. One box is all you need to prove that you are on the right road to health and happiness.

"I can't say enough for Mi-o-na tablets. They have done more for me in one week than all the doctors have for the two years I have been under their care, and I will do all I can to recommend it to my friends. You can also use my name in your ad if you like, for Mi-o-na is better than gold to me. I am like a new man, and am able to work once more for the first time in over a year."—W. A. Ennis, 328 Green street, Syracuse, N. Y.

NOTICE FOR PUBLICATION.

Department of the Interior, U. S. Land Office at Roseburg, Oregon, August 8, 1908. Notice is hereby given that William Clubb, of Eugene, Oregon, who, on July 28, 1908, made application under the Timber and Stone Acts, No. 8519, for the S 1/4 of NE 1/4, Section 12, Township 17 South, Range 7 West, Willamette Meridian, has filed notice of intention to make Final Proof, to establish claim to the land above described, before W. W. Calkins, U. S. Commissioner at his office at Eugene, Oregon, on the 2nd day of November, 1908. Claimant names as witnesses: Hal E. Wood, of Eugene, Oregon; Marvin L. Hammitt, of Eugene, Oregon; Warren C. Smith, of Crow, Oregon; Clark H. Becker, of Walderville, Oregon.

NEW TODAY.

WANTED—You to take your old comforts to the "Enterprise Shoe Shop" for repairing; first-class work only; honest material; low prices. Half soles, 35c and up. 59 East Ninth street. 031

NOTICE FOR PUBLICATION. U. S. Land Office at Roseburg, Oregon, June 17th, 1908. Notice is hereby given that Alex Hassel of Crow, Oregon, who, on March 13th, 1908, made Homestead Entry No. 12503, for NW 1/4, section 12, Township 19 south, Range 4 West, Willamette Meridian, has filed notice of intention to establish claim to the land above described, before W. W. Calkins, U. S. Commissioner, at Eugene, Oregon, on the 29th day of September, 1908. Claimant names as witnesses: Joseph Gates of Crow, Oregon; Earl Parsons of Eugene, Oregon; Earl Baldwin of Panther, Oregon; H. H. Baldwin of Panther, Oregon.

RITCHEY CREEK WATER IS PURE UNDER ANALYSIS

The following letter from Dr. W. L. Cheshire to the mayor and city council, and the accompanying reports to which it calls attention are self explanatory:

Eugene, Or., Sept. 29th, 1908. Hon. J. D. Matlock and City Council:

Gentlemen—I hand you herewith reports of the examinations of the water procured, at your request, from Ritchey, Roaring and Bradley creeks.

Samples were taken on September 2d and 24th. These samples were taken in bottles that I had previously thoroughly sterilized and kept airtight until at creek. For filling the bottles I used the same precautions by cleansing my hands and handling the corks with a sterilized instrument. The bottles were sealed at place of filling and expressed to destination, for which you will find receipts enclosed.

The first examination at Corvallis was delayed more than two weeks on account of the absence of the bacteriologist, and because of this delay there was not a true test made, but still no disease producing bacilli were found.

I again procured a sample on September 25th and sent to Corvallis. This, as you will see, gives an excellent test of pure water.

The examination by the State board of Health of Washington is very complete, but shows a little excess of vegetable matters (which no doubt explains the suggestion of the advisability of filtration), which was due to the length of time water was examined after being taken from the streams, but no disease producing germs were found.

I am at a loss to account for the report of our own state bacteriologist in saying that the streams were contaminated with sewerage producing organisms. As a result of the other examinations and the fact that there is no habitation on the streams, I very much doubt the value of the state's bacteriologist's report.

California did not make a report, as you will see, owing to the time in transportation, which would cause too much change taking place in the water.

Most respectfully submitted, W. L. CHESHIRE.

each of these samples two organisms were found—the same in each. One only of the two was suggestive of sewage contamination, and identified. This organism did not prove to be a pathogenic, but belongs to the class of commensals, and, together with the number of bacteria in each of these two samples sent, render both of them suspicious and undesirable for drinking purposes, in their present condition, especially the sample from Bradley creek.

Chemically the few tests of the two waters that could be made from the small quantities of the two waters sent point to no serious recent sewage contamination, but to an objectionable amount of surface drainage.

No account of the manner of the taking of these samples was given and it is assumed therefore that the bottles were carefully sterilized and the samples taken with the scrupulous care so necessary to be taken to entitle the results to the fullest confidence.

Enclosed find a memorandum of charges for the services.

Respectfully yours, ROSE A. BEBB, M. D., Bacteriologist.

University of California, Department of Hygiene, Berkeley, Sept. 10, 1908.

Dr. W. L. Cheshire, Eugene, Oregon.

Your letter of the 4th inst. and samples of water have arrived. I am sorry to say that a bacteriological examination of a sample of water which had been shipped so far would be of no account whatever to you. The changes that take place in water during an interval of this length would make any results that we might obtain by an examination now no index whatever of the condition of the water at its source.

It is possible that a chemical examination could be made which would be of service to you. If you will write to Professor G. E. Colby, of this university, he can probably give you some information about the matter.

Yours very truly, MARGARET HENDERSON.

(The above letter explains why the Washington University analysis showed more bacilli in the Ritchey creek sample than that of the O. A. C. at Corvallis. In the former case the water was a week or ten days old before the analysis was made, while that at Corvallis was begun the day after the water was taken from the creek.)

The University of Chile has adopted a course for the special instruction of persons for the diplomatic and consular service. The course is quite complete.

OREGON AGRICULTURAL AND EXPERIMENT STATION

Department of Bacteriology, Emile F. Pernot

Corvallis, Oregon, Sept. 28, 1908.

Mr. W. L. Cheshire, Eugene, Oregon.

Dear Sir: The following is the result of a quantitative bacteriological analysis of sample of water marked "1, Ritchey Creek," received sealed from the hands of Mr. J. D. Matlock September 25th at 9:30 a. m.:

Average number of colonies in six plates cultures, 46 per cubic centimeter.

Respectfully submitted, E. F. PERNOT.

This analysis shows practically pure water, as the following letter from Professor Pernot shows:

Mr. J. D. Matlock, Eugene, Oregon.

Dear Sir: I have made a quantitative bacteriological analysis of the samples of water received on the 25th inst., and forwarded the report to Mr. W. L. Cheshire.

The bacterial content is very low, 46 colonies being the average number in six plates.

My responsibility rests solely with the samples while in my possession, and not with the aseptic precautions exercised in securing them.

Very truly yours, E. F. PERNOT.

State of Washington, Board of Health and Bureau of Vital Statistics

410 Marion Building, Seattle, Wash., Sept. 14, 1908.

Hon. J. D. Matlock, Mayor Eugene, Oregon.

Dear Sir: The three water samples sent to this laboratory in care of Dr. Elmer E. Heg, secretary of the Washington State Board of Health, have been examined by me for the purpose of determining whether suitable for a city water supply.

A thorough bacterial examination has been made, including the identification of the important micro-organisms present, together with a determination of their numbers. Such chemical tests were also made as were possible from the small amount of water sent.

Sample No. 1, from Ritchey creek, is the best of the three waters. In this were found 450 bacteria per one cubic centimeter, present, grown at body temperature. No coli, streptococci or other sewage organisms were found, and there is, apparently, no recent sewage pollution. At body temperature an almost pure culture of an organism corresponding very closely to the proteus zenkeri was found. This putrefactive bacterium here, in the absence of sewage organisms, probably indicates the presence of putrefying vegetable matter.

Chemically, moderate amount of nitrate and nitrite, moderate amount of chlorine, low oxygen consumption and the absence of free ammonia combine the results of the bacterial examination.

Sample No. 2, from Roaring creek, contains, as received, 800 per 1 cc., and sample No. 3, from Bradley creek, 1200 bacteria per 1 cc. In

ROOSEVELT WILL NOT TAKE STUMP FOR MR. TAFT

Washington, Sept. 30.—Secretary Loeb today made the statement that President Roosevelt has no present intention of making a speaking tour in behalf of Taft. Mr. Loeb says the president never has stated he would take the stump.

Washington, Sept. 30.—President Roosevelt will not reply to the latest letter of Mr. Bryan, given out by him last night at Rock Island, Ill. Secretary Loeb stated the president felt that inasmuch as Bryan's letter was simply an attack upon him personally there was no reason why he should answer it.

WANT BONAPARTE TO GIVE RECORD

Chicago, Sept. 30.—Josephus Daniels, chairman of the Democratic press committee, today made public a letter written to Attorney-General Bonaparte at the instance of the Democratic National committee asking the attorney-general how many of the 287 so-called trusts of the country have been proceeded against in the courts by the federal government and how many more cases he expects to file.

Mr. Bryan's Latest. Rock Island, Ill., Sept. 29.—"I have lived in vain if your accusations lose me a single friend," said W. J. Bryan in a letter addressed to President Roosevelt, replying to that of the president, written Sunday last. Mr. Bryan points to his record and declares that it is sufficient answer to the insinuations of the chief executive that he is in sympathy or controlled by the trusts.

Reverting to the charges against Governor Haskell, Mr. Bryan says that the president, in response to his request, did not deign to suggest a tribunal which could determine those charges, but instead proceeded to pass judgment upon him, and he informs the president that the occupant of that high office cannot deny to the humblest citizen the right to protect his reputation and vindicate his name in the courts.

Complaint Against Critic

Taking up the president's assertion that certain trust magnates, fearing prosecution under Mr. Taft, will support the Democratic candidate, Mr. Bryan charges that the president worded his statement in such a way as to claim the support of all the trust magnates "and yet put it on the ground that they are supporting your party for patriotic reasons rather than for the promotion of a selfish interest."

Such an argument, he contends, is ingenious, but not sound. In proof of the fact that he would not be controlled by the trusts, Mr. Bryan says that, if election, he will enforce the anti-trust laws, "not spasmodically and intermittently, but persistently and consistently."

STEAMSHIP ASHORE WILL BE TOTAL LOSS

San Francisco, Sept. 30.—The Merchants' Exchange has a cable from Manila stating that the United States steamship Tarlac was driven ashore on Borongan Island, one of the Sulu group, September 23. She will probably be a total loss.

GOOD PROSPECTS FOR SAVING VESSEL

Victoria, Sept. 30.—The work in the preliminary attempt to float the Humboldt is now in progress. The weather is good and the sea as smooth as a millpond. It is expected the attempt to float her will be made tomorrow at high tide.

See Watts for alarm clocks from a dollar up.

WILL APPOINT WATER COMMISSION

To the Voters of the City of Eugene:—The law provides that a water commission shall be appointed when the city has a water plant in operation. As soon as the Willamette Valley Company turns over the water plant to the city I will appoint the commission from among the best financiers of the city. I had already selected them and was awaiting the announcement of their names when the Willamette Valley Company refused to accept the city bonds or to turn over the plant to the city. The city council and myself are very anxious to get rid of this responsibility and will appoint the water commission as soon as it can be done under the law. Respectfully, J. D. MATLOCK, Mayor

RITCHEY CREEK WATER IS GOOD

Eugene, Oregon, September 29, 1908. Editor Guard:—I wish to state that I visited Ritchey creek on September 28, 1908, and found as pure looking and pure tasting water as there is in Oregon, and I am satisfied that there is more water there than Eugene will ever use. I do not think the people of Eugene can do any better than to vote the bonds and get Ritchey Creek water. Yours for Ritchey Creek water, A. G. ANDERSON.

RAILROADS WILL RAISE RATES TO PACIFIC COAST

Chicago, Sept. 30.—By the first of January the trans-continental railroads hope to be able to increase freight rates on more than 30 commodities westbound and on about 20 eastbound, between all points on the Pacific coast. Conference are being held frequently and traffic men admit that all commodities are being gone over with a view to making increases where possible and equitable. The proposed increase will average between five and eight per cent above the present rate.

NEW MUSICAL DIRECTOR AT METHODIST CHURCH

MRS. DAISY MIDDLETON IS SELECTED AT OFFICIAL BOARD MEETING LAST NIGHT

At the first official board meeting of the M. E. church for this conference year, held last evening in the church parlors, among other items of business was the election of Mrs. Middleton, recently from McConnellsville, Ohio, to the office of musical director for this year. This selection is highly gratifying to her host of friends, as she has become quite favorably known in our midst.

Her first public appearance in this city was at the military review held in the army last spring when Governor Chamberlain and staff were present. Her two contralto solos, for which Professor Read had written band accompaniments for that special occasion, were the most attractive features of the evening and placed her in the first rank among Eugene's foremost musicians. It is fortunate for this city that Mr. and Mrs. Middleton have decided to locate here and the Methodist church is to be congratulated on having secured her services. She intends devoting her entire time to music, especially to vocal instruction.

Miss Nellie Gilbert, who is so well known to all that she needs no introduction, has also been employed and will greatly strengthen the choir with her rich soprano voice. She spent several months in California last spring assisting Bishop Bell, of the U. B. church, in evangelistic work.

Mr. Ogden, the efficient pipe organist, who served the church so acceptably last year, will continue as organist.

DELICIOUS BANANA CREAM

This recipe is highly recommended by one of our correspondents; try it for dessert tomorrow. Peel five large bananas, rub smooth with five teaspoonfuls of sugar. Add one teacup sweet cream beaten to a stiff froth, then add one 10c package of Lemon JELL-O dissolved in 1-2 cups of boiling water. Pour into mold and when cold garnish with candied cherries. Serve with whipped cream, or a good pudding sauce. JELL-O is sold by all grocers at 10c per package.

NOTICE FOR PUBLICATION.

U. S. Land Office at Roseburg, Oregon, July 15, 1908. Notice is hereby given that Harrison K. Shirk of 725 E 11th St., Eugene, Oregon, who, on July 14th, 1908, made application under the Timber and Stone Acts, No. 9217, for W 1/2 of NE 1/4; SE 1/4 of NE 1/4; and NE 1/4 of SE 1/4, Section 8, Township 19, South, Range 6, West, Willamette Meridian, has filed notice of intention to make Final Proof, to establish claim to the land above described, before W. W. Calkins, U. S. Commissioner, at his office at Eugene, Oregon, on the 7th day of October, 1908.

Claimant names as witnesses: Louis Hoselton of Crow, Oregon; Louise Hoselton of Crow, Oregon; John Lewis of Crow, Oregon; Albert M. Hendricks of Eugene, Oregon.
