THE CENTAUR COMPANY, 17 MURRAY STREET, NEW YORK CITY.

## NORTH DAKOTA, NEW BATTLESHIP, LAUNCHED

MARY L. BENTON.

Miss Mary L. Benton of Fargo, chosen by Governor Burke of North Dakota to act as sponsor for the battleship named for her native state.

Quincy, Mass., Nov. 10.—Into the waters of the Fore river, on whose shores several of the finest ships of the "new navy" have been built, there was launched today the great steel hulk of what will be the formidable battleship North Dakota. The occasion was a notable one, as the North Dakota is the first United States 20,000 ton all-big-gun battleship of the Dreadnaught type. Built by the Fore River Shipbuilding Company, the big vessel is 60 per cent completed, and will be turned over to the government in less than a year. The keel for the North Dakota was laid on December 10 last, the date of the sailing of the Atlantic fleet on its globe-encircling trip, and in her construction all time records for the building of American naval vessels have been broken.

**Named by North Dakota Girl**  
Shortly before the hour set for the launching, while the wedges were being driven in to lift the weight from the ground to the sliding ways, the naming party, led by Rear Admiral Bowles, president of the shipbuilding company, made its way through the crowd and ascended the launching stand. The sponsor, Miss Mary Benton, daughter of Colonel John D. Benton, of Fargo, N. D., received an ovation, as did also Governor John Burke and other members of the North Dakota party.

The launch of the big vessel was entirely successful and was witnessed by an immense crowd. When the

word was given the great mass of steel began to move majestically down the greased ways for its initial plunge into its native element. Miss Benton dashed against the prow a bottle of wine decorated with the national colors. As she did so she exclaimed in firm accents:

"I christen thee North Dakota." A great wave of enthusiasm swept over the crowd of spectators as the christening ceremony was performed. Down in the crowd and up on the stand men and women waved hats and handkerchiefs, while thousands of throats joined in the wild cheering which greeted the new queen of the sea. Shriek whistle blasts from the nearby factories and the fleet of tug boats assembled in the river joined in the chorus, and almost drowned the notes of the national anthem, valiantly played by the band.

**A Magnificent Battleship**  
The North Dakota is a sister ship of the Delaware, which is under construction at Newport News. The initial outlay for the huge battleship was \$10,000,000. Her guns alone will cost about \$1,000,000. She will have a long forecastle deck, extending from the bow almost to the center of the ship. The ten twelve-inch guns will be arranged in five turrets, two to a turret, the forward turret being so located that the axes of its guns will be twenty-four feet above the water line, and just abaft of this turret will be another, the barbette of which will be sufficiently high for its guns to clear the roof of the forward turret.

Abaft the break of the forecastle deck, and also situated on the axis of the ship, will be two more twelve-inch gun turrets, the guns of the forward turret in this pair firing over the roof of the after turret. Aft and near the stern will be the fifth and last of the big turrets. Naval men declare that no navy in the world possesses a ship of the Dreadnaught type in which the guns are better arranged.

For repelling torpedo attacks the North Dakota will carry a secondary battery of fourteen five-inch guns. These guns are all to be mounted broadside.

The vessel will be driven by turbines of 25,000 combined horsepower. These powerful turbines must drive the powerful battleship through the water at the rate of at least 21 knots an hour on the four-hour trial run, if the contract is to be fulfilled. The officials of the company confidently assert that they will be able to do this and go the government one better, making at least twenty-two knots speed. If this can be done it will be a record to be proud of, for it will eclipse the present world's record of the Dreadnaught, twenty-one knots, and that, too, for a considerably larger battleship.

The length of the North Dakota is 510 feet and beam 85 feet. Her complement will consist of nearly 900 officers and men.

## COMMERCIAL CLUB'S MEETING LAST NIGHT

A meeting of the subscribers to the promotion fund of the Commercial Club was held last evening and several matters of importance discussed. The first matter to come up for consideration was the election of a board of governors and resulted in the re-election of the old board.

The regular meeting of the club followed the subscribers' meeting. After the reading of the minutes the call for reports was made. Free Thomas, of the membership committee, stated that he had sent out 316 letters, but as yet had received no accessions to the membership.

The matter of the club's excursion to Albany was then presented by Mr. Hartog. He said that a good representation from this city would show to the people of Albany a very pleasant courtesy. Mr. Hartog also urged that a good representation of the club members accompany the football team to Portland on the occasion of the Oregon-O. A. C. game. Manager McEwen, of the football team, stated that the people of Corvallis have made arrangements to accompany the team from that city, and that Eugeneites should show the same spirit in regard to the University. President Campbell moved a resolution that it be the sense of the club that as large a contingent as possible should accompany the Oregon team to Portland and give them every encouragement possible. Motion passed without a dissenting vote.

Manager Hartog then made public a request which he had received that the club send to the authorities at Washington a request that the material for the new federal building be white brick instead of red, as the specifications called for. On a call for opinions it was apparent that such action was very likely to cause delay, and the matter was dropped.

Mr. Hartog stated that the city nightwatchman had rendered a bill to the Willamette Valley Company for \$3 for services in turning off the lights in show windows and that the company had refused to pay the same. The matter was referred to Walter Griffin for adjustment.

Mr. Hartog then read a letter from Mr. McMurray at Portland, which stated that this section could secure from the department of agriculture at Washington experts who would make an analysis of the soil hereabouts and publish data with illustrated maps. A motion requesting the service for Lane county was passed.

President Williams followed Mr. Hartog, stating that he had a matter which he had been requested to present a number of times—the issuance of the \$300,000 in bonds for the taking over by the city of the water system and the extension of the same. He stated he considered it very proper for the club to interest itself in and to prevent, by injunction if necessary, any action of the council which would place the city deeply and unnecessarily in debt. After a call for expressions of opinion only a few present responded. It seemed to be the prevailing opinion that the subject was not a proper one for discussion by the club at this time.

Manager Hartog offered a resolution to the effect that the city council go ahead with all possible dispatch with the taking over of the water plant and the sale of such bonds as were necessary for its purchase and improvement. The resolution was passed unanimously, after which an adjournment was taken.

## SEVERAL NEW MEN FOR GENERAL STAFF

Washington, D. C., Nov. 10.—Major-General William P. Duval and Brigadier-General Frederick Funston, William H. Carter, Winfield S. Edgerly and William W. Wotherspoon, comprising a board of army officers appointed for the purpose, met today to make selection for detail of officers to fill vacancies occurring in the personnel of the general staff. At present there are three vacancies, and seven more will occur next year.

## CELEBRATED BUCKS STOVE CASE DELAYED

Washington, D. C., Nov. 10.—The case of President Samuel Gompers, Secretary Frank Morrison and Vice President John Mitchell, all of the American Federation of Labor, and who are charged with contempt of court, was called today in the district supreme court. The case grows out of a suit for injunction instituted against the labor officials by the Bucke Stove and Range Company, of St. Louis. Owing to the absence of President Gompers and Secretary Morrison in Denver, where they are attending the annual convention of the American Federation of Labor, a further delay in the hearing of the contempt proceedings is likely.

## BASEBALL MEN IN SESSION AT CHICAGO

Chicago, Ill., Nov. 10.—Minor league baseball owners and patrons will be particularly interested in the annual meeting of the National Association of Baseball Clubs, the great minor league organization, which began at the Auditorium Annex today. There is some talk of redistricting the minor league territory and the matter may be discussed at the present meeting, though it is not at all probable that any action will be taken toward redistricting. There is no war talk this year, and all indications point to a harmonious session. The re-election of President Pat Powers is assured.

## RHODE ISLAND'S HEROIC DEAD HONORED

Vicksburg, Miss., Nov. 10.—The monument erected in the National Military Park here in memory of the Rhode Island soldiers who fell in the siege and battle of Vicksburg, was dedicated today with interesting exercises in the presence of a large throng. A part of twenty-five persons, including the leading officials of the state, were on hand to represent Rhode Island. The monument is of granite and of artistic design and was erected at a cost of \$5000.
