WEDNESDAY, NOVEMBER 18, 1908

A RESTING PLACE.

The country's always somewhere
  Howe'er the city grinds,
Cool, grassy fields are waiting
  Howe'er the dust cloud blinds,
The oaks we knew aforetime
  Are each one in their place,
And butterflies drift past them
  And cool cloud shadows race,

Howe'er work mars the pattern
  Of things we planned to do,
Howe'er dreams of our dreaming
  Lag in the coming true,
The country waits off yonder
  With balm for work-worn hearts,
Vistas of blowing-blossoms
  To soothe the eye that smarts.

And there are laughs of children
  To meet us down the way,
And the gold of the sunset
  Wipes all the dun and gray
Out of the world before us,
  And howe'er we shall fare,
Whate'er our climbs or stumbles
  The country's always there.
—J. M. Lewis.

COMING OF THE OREGON EASTERN

That is good news which comes from Klamath Falls to the effect that the Harriman engineers have begun work on the permanent location of the Oregon Eastern at that end, working toward Natron. For three years past work has been going on this ... of the Cascades, and it is generally understood that the line is ready for actual construction ... may be announced to start at any time in the near future.

The building of the Oregon Eastern will make a city of the first class of Eugene because it will mean the junction here of two of the largest railroad systems in the West, insuring jobbing and manufacturing interests, as well as shop and terminal yards in this city or Springfield, across the river, which will employ hundreds of men.

Eugene's future is brighter today than ever before in its history, because the people are keenly aware of the natural advantages of its location, and are taking advantage of it by pushing the city ahead in every material way. Fine business blocks, beautiful homes, splendid schools, paved streets and electric railways are laying the foundation upon which will be built the real growth of the Greater Eugene that will come with the construction of the Oregon Eastern across the mountains.

PAPER FROM CORNSTALKS

Chemists of the bureau of forestry and of the bureau of plant industry of the department of agriculture, says a Washington dispatch, believe that they have solved the problem of a cheaper paper that will dispense altogether with the use of wood fibre. The new material, from which already five grades have successfully been made, is the ordinary cornstalk, and officials of the department predicted that the new product when made on a larger scale will be at least 50 per cent cheaper than the print paper now made from wood pulp.

The two bureaus have been working on the problem for years, but not until now have the results been so positively successful as to permit of any announcement. The first practicable samples have been manufactured by Dr. H. S. Bristol and his assistants at the new laboratory on Pennsylvania avenue.

Dr. Bristol has already carried his experiments to the point of making the paper in five shades. One grade is dark gray, thick and heavy like parchment and almost as tough as the sheep skin. Then there is a lighter shade of the same character, two shades of yellow and one of white.

The white paper is made from the hard outside shell of the stalk, and the yellow grade from the pith. The yellow grades have a much longer fibre and resemble paper made from linen rags or cotton. It is very soft and pliable.

Millions of tons of cornstalks will be available for this new manufacture, according to the department of agriculture. At present the stalks are annually destroyed in enormous quantities to get them out of the way, or else are simply turned under the soil with a plow to add slightly to the fertilization of the next year's crop.

The process of manufacturing the new invention is much easier than that involved in reducing wood pulp to paper. The chemists have used in their experiments the "soda cooked" process, which has been found to be the best for making the finer grades of wood pulp paper. But the cornstalks only need about two and a half hours of cooking in this process against the thirteen or fourteen hours needed to soften the wood pulp.

The department will at once take steps to have the manufacture of the new paper undertaken on a larger scale.

If, as the Oregonian asserts, a majority of the people of Oregon do not want Governor Chamberlain elected United States senator, they should have voted against him last June.

This "culture" trust, with an endowment of $100,000,000, which President Butler, of Columbia University, wants established in New York, might get more attention in swollen fortunedom if its denizens were not so engrossed in making the "immunity" 'trust law-proof.

To grasp the opportunity is called business sagacity. A Frenchman is anticipating opportunity by constructing an aeroplane station on the roof of a building in the heart of Paris. Now, what should that be called?

Mr. Bryan speaks of the late election as "the mystery of 1908," but he might have a mighty hard time convincing some men—"Teddy" and Taft, for instance—that there was anything mysterious about it.

Conditions in Tennessee, especially editorial conditions, are once more demonstrating that a man may be a sincere advocate of temperance and a teetotaler, and yet be intemperate in the use of language.

Nat Goodwin, the actor, has a new wife and a new leading lady. In the due course of events he will probably have a new divorce in order to marry the new leading lady, a system of rotation which Nat has worked successively for twenty years.

We suppose there is no help for it, and that Miss Helen Taft may just as well prepare to see herself labeled "Princess Helen" by the same fool bunch that foisted the same title on Alice Roosevelt.

Chairman Mack made a noise like a swat when he said Democrats could not expect to win by devoting three and a half to singing the praises of Republicans and six months to condemning them.

Congress will be asked by the war department to appropriate half a million for airships, but there is as much uncertainty between asking and getting from congress as from individuals.

NEW UNIVERSITY BUILDING SOON READY

Engineering Department Will Occupy Its Quarters By January 1

The new home of the civil engineering department at the University, which has been in process of construction since last summer, is nearing completion, and the department, ... into its new quarters during the Christmas holidays. ... engineering department needed room ... the board of regents saw fit to build a frame building at this time rather than a permanent stone structure, which would take a long time to finish. The structure is situated on some of the land recently purchased by the regents east of the present campus. Arrangements are made in this building for a large well-lighted draftingroom, to accomodate freshman and sophomore classes, which are increasing so rapidly each year. Also, a smaller draftingroom for the upper classmen. Bathrooms are lighted with prismatic glass, so that the lights farthest from the windows is just as good as that near the windows. A room is arranged for surveying accessories and a cement testing laboratory will be arranged. In addition to these, there are several lecture rooms, which will be greatly relieve other congested quarters.

Seven Years of Proof.

"I have had seven years of proof that Dr. King's New Discovery is the best medicine to take for coughs and colds and for every diseased condition of the throat, chest or lungs," says W. V. Henry, of Panama, Mo. The world has had thirty-eight years of proof that Dr. King's New Discovery is the best remedy for coughs, colds, lagrippe, asthma, hay fever, bronchitis, hemorrhage of the lungs, and the early stages of consumtpion. It's timely use always prevents the development of pneumonia. Sold under guarantee at W. A. Kuykendall's drug store. 50c and $1.00| Trial bottle free.

NEW LANE COUNTY MAP.

My Lane County Map is now ready from the printer. Those who wish a copy will do me a favor by dropping me a post card. The price is $10.00.

I have only a small block of these maps and as the mounting and coloring is made at a rate of 8 maps a day, they will be delivered at this rate to the subscribers and in the same rotation as they are ordered.

DIED

At his farm near Post, Crook county, Oregon, Saturday, November 14, 1908, Roscoe Knox, aged about 68 years.

Mr. Knox and family resided for many years across the river east of Creswell and was well and favorably known throughout Lane county. He was a brother of Mrs. Laura and Frona McFarland, Mrs. Jane Veatch and Attorney Jerome Knox of Cottage Grove and has many relatives in this county. His brother Jerome was with him at the time of his death. He leaves four daughters and seven sons to mourn their loss, his wife having died last spring. The remains were interred on the home ranch in Crook county near Post Monday. —Cottage Grove ...

MARRIED

In Eugene this afternoon at 3 o'clock by Rev. D. H. Trimble, James C. Parker and Miss Eula Lilwall. The groom is a deputy sheriff and his bride is a daughter of Wm. Lilwall, proprietor of the Willamette House. They both have many friends who tender congratulations. They will leave on this evening's train for Portland, and other points north on their honeymoon trip.

In Eugene, November 14, 1908, Arthur Matteson and Miss Anna Baker, Rev. O. C. Wright, officiating.

OYSTERS—EASTERN OYSTERS

Just received, the first direct shipment of extra select Eastern oysters. For sale in any quantity at Otto's 90c per quart.

That the city of Portland will start the new year with a population of nearly 255,000 is the estimate made today by census-takers of R. L. Polk & Co., who are now engaged in compiling the new city directory. If this figure proves correct, Portland has made a net gain of 15,000 people, which, with the possible exception of San Francisco, will prove the best gain in population of any city on the Pacific coast.

"Imperial Car Cleaner" will take pitch or dirt of any kind off a painted or varnished surface without injuring the finish. Chambers Hardware Co.

OREGON FOOTBALL MEN LEAVE FOR PORTLAND THURSDAY

Team Filled With Dogged Determination—Seventeen in the First Squad

Seventeen Oregon football players leave tomorrow noon for Portland where they play the O. A. C. team next Saturday. The early departure is made so as to have the team in the best possible condition Saturday noon, when they go out upon the Multnomah gridiron, before what may be the biggest crowd that ever assembled for a football game in this state. Coach Forbes, Trainer Hayward and Manager McEwen accompany the team, and the remainder of the large squad will probably been quite as strenuous as last week go Friday morning.

The practice this week has not before the Washington game. The idea now is to keep the whole team in the best physical shape.

The chances for an Oregon victory have generally been considered slight, but at present Oregon's chances seem to be much better.. The team all say they are going to win, and the spirit of dogged determination, with confidence will make them harder to down than they were against Washington, when they fought so hard.

No doubt they will try to take the offense at once in the game Saturday, and it may be that O. A. C. will be put on the defense from the beginning and kept in their own territory.

College News.

The address to the faculty and others present by Professor Sweetser last night was greatly enjoyed.

Considerable enthusiasm was aroused at the assembly hour this morning. Besides a rally directions were given for the Oregon rooters to follow in Portland aSturday.

ARE YOU A BOOSTER?

Of course you are. Then turn out Saurday and join the crowd going to Portland. It you are proud of Eugene, proud of its University, help Oregon on to victory. The U. of O. team can win, if it only believes in itself. The public's moral support is all that is needed to make our team invincible.

Be one of two thousand to stand behind our team and victory will be theirs.

Get your ticket now from A. J. Gillette and avoid the crush. Round trip only $3.00. Train leaves Eugene at 7:10 p. m. Returning, leaves Portland at 7:30 p. m.

EUGENE COMMERCIAL CLUB.

RAY LAMPHERE ENGAGED TO MARRY MRS. BELLE GUNNESS

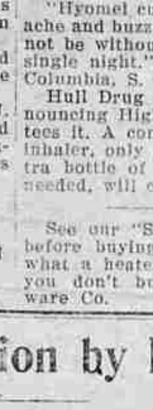
LaPorte, Ind., Nov. 17.—That Ray Lamphere had confessed to intimacy with Mrs. Gunness; that he had chased Andrew Helgelein with a gun, and that Mrs. Gunness had promised to marry Lamphere when he joined some secret society and took out insurance, were the sensational facts testified to today by William Salter, a friend and neighbor of the defendant.

The first positive statement to show the line of defense was made by Mr. Worden, when, in cross-examining a witness, he remarked that an effort would be made to show that Mrs. Gunness committed suicide. Along this line it follows then that the defense will contend that she first murdered her children and then set fire to her house.

Lamphere's attorney said today that from present indications the prisoner will not be palced on the stand in his own behalf.

BEST CATARRH DOCTORS.

Has Cured Thousands—Will Cure You or Money Back.



This is the little Hyomei inhaler, the little doctor that has cured many thousands of sufferers from catarrh, bronchitis, asthma, hay fever, coughs, colds, and grip.

It's so easy and pleasant to cure yourself with Hyomei. Just pour out a few drops in the little inhaler, and breathe in it. The healing, soothing and antiseptic air will reach every nook and crevice of the mucous membrane of the nose and throat; will stop the irritation almost immediately; will allay the inflammation: drive out the foul odor; kill the germs and cure the disease.

"My wife has been using Hyomei for two months past for catarrh and pulmonary trouble. She has received more relief and benefit than from any other treatment."—E. S. Parrett, Jeffersonville, O.

"Hyomei cured me of terrible earache and buzzing in the head. I would not be without it in the house for a single night."—Mrs. S. P. Fuller, Columbia, S. C.

Hull Drug Co. sells Hyomei (pronouncing High-o-me) and guarantees it. A complete outfit, including inhaler, only costs $1.00 and an extra bottle of Hyomei, if afterwards needed, will cost but 50 cents.

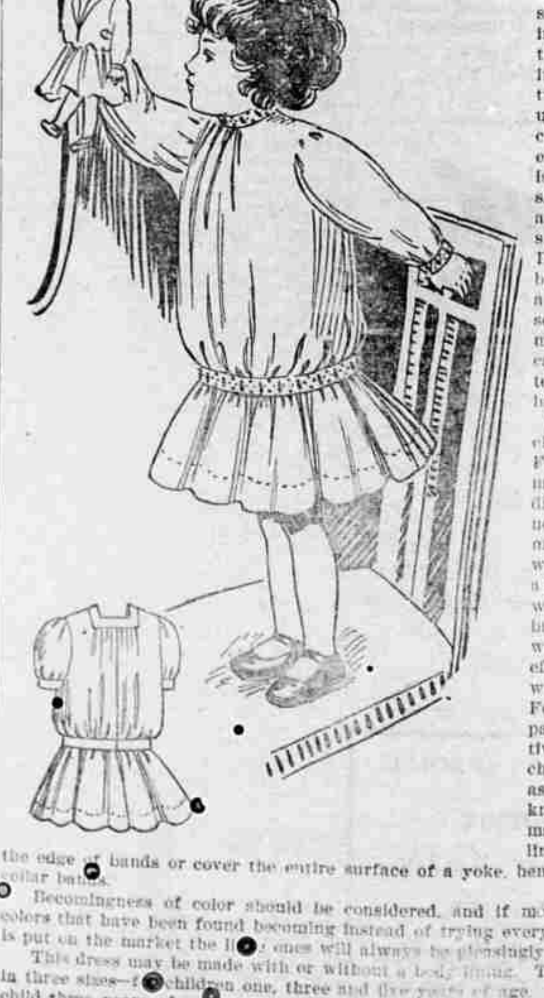
See our "Superior" wood heaters before buying; they will show you what a heater ought to be, even if you don't buy. Chambers Hardware Co.

Today's Suggestion by Ellen Stan.

FRENCH DRESS FOR A LITTLE GIRL.

THE little French dress shown is an attractive and simple model. It is desirable for woolen materials as well as wash fabrics. Panama, nun's veiling, albatross, henrietta and challis are all desirable materials, but perhaps a lightweight serge is the most serviceable for dresses that are to receive good, hard wear.

The standard diagonal weaves are most favored, but the new novelty weaves are very pretty. Those with alternating stripes of plain and checks in pretty color combinations are particularly attractive. But wash fabrics are generally selected for school. Such materials as gingham, linen, pique and percale are neat and serviceable.



For morning wear substantial frocks should be provided in preference to those of finer quality. Little or no trimming should be used with the exception of bands of embroidery to finish the yoke and sleeves. If copied after the design shown the square Dutch neck could be filled in with a tucked yoke of some sheer wash material. The belt can be of the material or of the embroidery.

For winter wear challis, veiling or French serge will make attractive dresses for afternoon wear. They may have a tucked white lawn yoke and be trimmed with bands of embroidery. Needlework is always an effective finish for woolen garments. Featherstitching is particularly attractive and suited to children's dresses, as are also French knots. The latter may be used to outline tucks, finish the edge of bands or cover the entire surface of a yoke, hem and sleeve and collar bands.

Becomingness of color should be considered, and if mothers will select colors that have been found becoming instead of trying every new shade that is put on the market the little ones will always be pleasingly gowned.

This dress may be made with or without a body lining. The pattern is cut in three sizes—for children one, three and five years of age. To copy it for a child three years of age requires 2½ yards of material 27 inches wide or 1⅞ yards 36 inches wide.
