

REORGANIZATION OF U. S. FORESTRY SERVICE

Washington, D. C., Nov. 28.—All preparations have been completed to establish within a few days, the six administrative headquarters in the West and Northwest, which mean a complete reorganization of the forestry service of the government. Heretofore all administrative business, all scientific and other investigations, and in fact all matters connected with the forestry service, was transacted at the headquarters in this city. The rapid and enormous development of the service made it necessary to devise some plan for distributing the work of the department and, at the same time, bring it in closer direct touch with the territory under its care and supervision.

After considerable study and consideration of the problem it was decided, to establish in the West six experts under the direction and supervision of a district forester, residing within his respective district. It was decided to establish the districts and headquarters.

First district—including the states of Montana, northeastern Washington, northern Idaho, northern Wyoming and northwestern South Dakota; headquarters at Missoula, Mont.; W. B. Greeley, district forester.

Second district—including the states of Colorado, southern Wyoming, South Dakota, northwestern Minnesota, Nebraska, western Kansas and southeastern Utah; headquarters at Denver, Col.; Smith Riley, district forester.

Third district—including the states of Arizona, Arkansas, New Mexico and Oklahoma; headquarters at Albuquerque, N. M.; A. C. Ringland, district forester.

Fourth district—including the states of Utah, southern Idaho, western Wyoming, eastern Nevada and northwestern Arizona; headquarters at Ogden, Utah; Clyde Leavitt, district forester.

Fifth district—including the states of California and southwestern Nevada; headquarters at San Francisco, Cal.; F. E. Olmsted, district forester.

Sixth district—including the states of Washington, Oregon, a small part of northern California and Alaska; headquarters at Portland, Ore.; E. T. Allen, district forester.

Under these officers and at their several headquarters will be transacted hereafter the greater part of the routine administrative business connected with the several districts which has heretofore been attended to in Washington. At the head of each office there will be a district forester and an assistant district forester. Under these will be experts in charge of the various lines of work. A chief of grazing will have charge of range matters. A chief of production will handle the preservative treatment of timber, the strength tests and study of market conditions. A chief of lands will look after such matters as land examinations. The office of lands deals with questions involving the validity of claims asserted under the act of June 11, 1906, for agricultural settlement.

There will also be in each district a chief of silviculture, who will have charge of timber sales, planting and silvicultural experiments, and a chief of operation. The latter will supervise the personnel of the forests; the permanent improvement work, through an engineer in charge; the accounts, disbursements and bookkeeping, which will be directly supervised by an expert accountant, and the routine business of the district.

In each of the lines of work the management will be in the hands of a man who is a specialist and who has had thorough experience both in the West and Washington. The establishment of these field districts will bring the service into more immediate touch with the public. It is merely the completion of the movement, started some time ago, to have the forests administered as far as possible by men actually on the ground. The change will not affect the investigation work of the service, which will center, as hitherto, in Washington.

Nearly four hundred foresters, stenographers, clerks and other employees will start from here next week for the respective headquarters to which they will be attached. To most of them the change means an advancement and an increase in their salaries. The latter was necessary owing to the greater cost of living in the West.

Chicago, Ill., Nov. 28.—With 3,167 animals on display, the ninth annual International Live Stock Show opened at the Union Stock yards today for a week's session. Last year the exhibits numbered 7,000 and the result was that the show was so large as to be unmanageable. As a consequence the management decided to limit the number of nominations this year, particularly in the sheep and swine classes.

Texas and the other great cattle raising sections of the United States are well represented, especially in the sections allotted to car load lots of steers and feeders. Canada is better represented than at any of the previous shows held here. Among the exhibitors of sheep is Sir William Cooper of Berkhamsted, England.

Not a little added interest attaches to the show by the nomination of seven animals from the Kentucky farm of J. B. Haggin. Other prominent exhibitors in this division are F. W. Harding of Waukesha, Wis., Congressman Frank O. Lowden of Illinois and D. R. Hanna of Ravenna, Ohio, son of the late Senator Hanna.

As in former years a prominent feature of the exposition is the judging contest for students of the state agricultural college. The agricultur-

al colleges of Iowa, Illinois, Wisconsin, Texas, Ohio, and a number of other states are represented in the contest by teams of their brightest young men. The two best teams will be given handsome bronze trophies and the scholarships established by J. Ogden Armour will be distributed among the schools whose teams make the best showing. The contest was inaugurated soon after the opening of the show today. Notebooks in hand, the students knitted their brows, and looked wise, while they went about their task of testing the skill as experts upon the bodies of animals that were trotted out for their inspection.

Why Suffer? Create Hyomei and Kill the Loathsome Catarrh Germs. Just as long as you have catarrh your nose will itch, your breath will be foul, you will hawk and spit, and you will do other disgusting things because you can't help yourself. The germs of catarrh have got you in their power; they are continually and persistently digging into and irritating the mucous membrane of your nose and throat. They are now making your life miserable; in time they will sap your entire system of its energy, its strength, its vigor and vitality.

If you do not kill the loathsome germs of catarrh, their desperate assaults will in time undermine your reason, rob your brain of its brilliancy and activity, and leave you not only a physical but a mental wreck. This picture is not overdrawn; the writer has seen thousands of just such cases. He has personally experienced the demoralizing results that come from the ravishing attacks of the horrible catarrh germs, the greatest pest of civilized nations.

But there is one remedy that will kill the germs and cure catarrh, and that is Hyomei, the Australian dry air treatment. There may be other remedies, but they are not guaranteed as The Red Cross Drug Company will guarantee Hyomei to cure catarrh, or money back. Don't delay this pleasant antiseptic treatment. Every day you allow these germs to exist in your system you bring nearer complete demoralization. The Red Cross Drug Company will sell you a complete Hyomei outfit for only \$1. Ask him about it. It is also guaranteed to cure bronchitis, asthma, colds, coughs and hay fever.

Remember the name—Doan's—and take no other. A GREAT BARGAIN! Having found it necessary to change my occupation on account of throat trouble I now offer my home in Springfield consisting of three acres of land and a fine nine-room house, barn, open park, etc. I have young fruit trees, such as apples, cherries, peaches, etc. Also small lot.

An ideal home at a bargain if sold at once. Enquire of J. O. Richmond, four doors north of school building, Springfield, Oreg. N28

Watched Fifty Years. For fifteen years I have watched the working of Bucklen's Arnica Salve; and it has never failed to cure any sore, boil, ulcer or burn to which it was applied. It has saved us many a doctor bill," says A. F. Hardy, of East Wilton, Maine. 25c at W. A. Kuykendall's Drug Store.

Abstracts furnished and land titles examined. Fred Fleck, Merchants' Bank Building, Eugene, Oregon.

INTERNATIONAL LIVE STOCK SHOW OPENS

Chicago, Ill., Nov. 28.—With 3,167 animals on display, the ninth annual International Live Stock Show opened at the Union Stock yards today for a week's session. AROUND THE WORLD BY AUTOMOBILE

New York, Nov. 28.—Probably the most extensive automobile trip ever undertaken is that planned by Mr. and Mrs. H. A. Hoover, who sailed on the steamship Republic today for Algiers. The home of the Hoovers is near Los Angeles, Cal., and in completing the trip by auto from that city to New York, the couple have already finished the first lap of their ambitious journey. When they land at San Francisco, as they plan to do in the winter of 1912, they expect to have covered more than 75,000 miles.

Mr. and Mrs. Hoover will spend this winter in touring Algeria and Egypt, with as far reaching excursions into the Sahara Desert as may prove practicable. Early in the spring their car will be carried over to Italy and for three successive years tours will be made across every country in Europe at least one way. They even hope to penetrate western Siberia. In the winter of 1911 they expect to turn south into Turkey and from there into Palestine and back to the coast. On the homeward voyage stops will be made in India, China, Japan, the Philippines, Australia, New Zealand and Hawaii, and in every country as much motoring will be done as the circumstances will permit. Sailing from Hawaii to San Francisco in the winter of 1912 they will have completed the trip in about four years.

The trip is not being taken as an endurance test, and it is not their intention to try to break any speed records. Mr. Hoover, who has spent the greater part of his life perfecting systems of irrigation in the West, was in poor health last winter and he has undertaken the trip around the world with the outdoor life which it offers as a means of getting well. The start from the southern California was made early last April. Their route to New York was by way of San Francisco, Portland, Spokane, Omaha and Chicago.

Berkeley, Cal., Nov. 26.—The cods of the University of California today are looking for R. Livingstone, a young man who terrorized them a few months ago by his pestiferous attentions and his eccentric conduct, and kept college circles in a ferment until he was arrested and committed to the state hospital for the insane at Napa. Word has just been received from the asylum that Livingstone has escaped and he is expected to appear in his old haunts.

Livingstone made a real sensation at the university. He wrote fervent letters to the prettiest college girls, ramblingly incoherent about "affinities" and other things, and he had no bashfulness about accosting the objects of his admiration in the library alcoves and telling them woful tales about unrequited love.

One of Livingstone's successful tricks was to ride on the campus on his bicycle and tumble off just in front of a young woman. He would lie in the road groaning as if in pain and when the young lady bent over him solicitously he would seize her hand and make love to her in a way hardly expected of a wounded man.

Big Land Opening. On January 20th, 1909, at Roseburg, Oregon, 91,500 acres are to be withdrawn from the Umpqua forest reserve. This embraces lands in Benton, Lane, Douglas and Coos counties.

Not all of this land is subject to entry. For \$2.50 we will send you prepaid 18 large lithographic township maps with above vacant lands colored thereon. Also full instructions as to dates, manner of filing etc., etc.

DOUGLAS CO. ABSTRACT CO. (Successor to Frank E. Alley.) Roseburg, Or.

CALL FOR CITY WARRANTS. Notice is hereby given that all city warrants from No. 49 to No. 202, both inclusive, registered to June 24, 1908, and warrants Nos. 537 and 538 and 650, registered November 18th, 1908, all drawn on the general fund, will be paid on presentation at my office. Interest will cease on November 24, 1908.

FRANK REIBNER, City Treasurer, Eugene, Oregon, November 18, 1908.

IF YOU KNEW. The merits of Texas Wonder you would never suffer from kidney bladder or rheumatic trouble. 41c bottle (two months' treatment) sold by O. J. Hall, or by mail. Send testimonial to Dr. E. W. Hall, 232 Olive street, St. Louis.

Watts for Watches. Umbrellas and parasols repaired and recovered. Work practical; no second hand material used. Call on M. B. Watson at Potts' cigar store 544 27th.

WELCOME WORDS TO WOMEN

Women who suffer with disorders peculiar to their sex should write to Dr. Pierce and receive free the advice of a physician of over 40 years' experience—a skilled and successful specialist in the diseases of women. Every letter of this sort has the most careful consideration and is regarded as sacredly confidential. Many sensitive modest women write fully to Dr. Pierce what they would shrink from telling to their local physician. The local physician is pretty sure to say that he cannot do anything without "an examination." Dr. Pierce holds that these distasteful examinations are generally needless, and that no woman, except in rare cases, should submit to them.

Dr. Pierce's treatment will cure you right in the privacy of your own home. His "Favorite Prescription" has cured hundreds of thousands, some of them the worst of cases.

This is the only medicine of its kind that is the product of a regularly graduated physician. The only one good enough that its makers dare to print its every ingredient on its outside wrapper. There's no secrecy. It's bear examination. No alcohol and no habit-forming drugs are found in it. Some unscrupulous medicine dealers may offer you a substitute. Don't take it. Don't trade with your health. Write to World's Dispensary Medical Association, Dr. R. V. Pierce, President, Buffalo, N. Y.—take the advice received and be well.

Dr. Pierce's treatment will cure you right in the privacy of your own home. His "Favorite Prescription" has cured hundreds of thousands, some of them the worst of cases.

Black Motor Vehicles

A Practical Car for Business or Pleasure

Inexpensive, cost less than half as much as the ordinary automobile, low speed 2 to 6 miles an hour; high speed, 6 to 26 miles an hour.

Neat in appearance
Travels any Road

praise Peru-na boy's life."

AN HOCHMUTH.

EST HOCHMUTH, 1701 Des Moines, Iowa, years ago our little boy, taken down with scarlet fever, cold with it, and insipidities coming to the lungs and weeks we watched by night expecting him to die.

He became a little better and then he commenced to get worse all the while. The coughing spells would last completely exhausted, and then a great deal. Every day he had consumption.

While at the drug store, my wife bought a bottle of Peru-na almanac and she read in it a paragraph of his case and we would try Peru-na. We quit everything else, and he got well.

Two-thirds of the bottle cough had almost gone, taken two bottles he was well. He has not seen a sick child since, healthy boy.

Always praise Peru-na, for it's life."
