Safe Investment

Florence is attracting investors from all parts of the country. The history of Aberdeen, Washington, with its 15,000 population, surely will be repeated at Florence, Oregon.

With its improved Harbor now assured and the Carver Railroad building in that direction from Monroe, conditions at Florence will be similar to those at Aberdeen with the exception that Florence has more than twice the Natural resources as that of the Gray's Harbor City. Real Estate investors are already looking toward Florence as a profitable field for operations. An investment made there now before activity begins will yield big profits.

Florence lies at the head of the Siuslaw Valley; one of the most fertile and richest valley in the state of Oregon. Florence being a seaport town will have advantages of either rail or water transportation, thereby affording cheap freight rates.

With the proposed Eugene-Florence Railroad, the Carver Railroad now building from Monroe towards Florence, the Government appropriation of $800,000 for harbor improvement, the wonderful resources of the Siuslow Valley, the making of Florence is assured.
