**LUMBER CUT OF UNITED STATES FOR LAST YEAR**

Official Figures Sent Out From Government Sources in Washington.

Washington, D. C., June 24.—During the year 1908, 31,231 sawmills in the United States manufactured 33,289,369,000 feet of lumber, according to a preliminary report just issued by the Bureau of the Census. These mills also cut 12,106,483,000 shingles and 2,986,684,000 lath. Lumber manufacturing, like every other industry, felt the effects of the business depression which began in October, 1907. Consequently the production in 1908 was below that for the previous year. In 1907 the cut of 28,359 sawmills was 40,256,154,000 feet, the highest production ever recorded. Notwithstanding, therefore, that in 1908 reports were received from eight per cent more mills than in 1907, the decrease in lumber cut reported by them was slightly over seventeen per cent.

Washington, as for several years past, still ranks first among the states in lumber production, its cut in 1908 being 2,915,928,000 feet—a decrease of 22.8 per cent over the cut in 1907. Nearly all the lumber manufactured in Washington is Douglas fir, the market for which was seriously affected by the panic. Louisiana ranks second, with 2,722,421,000 feet, a decrease of 250,000 feet or 8.4 per cent over the cut in 1907. Louisiana is first in the production of both yellow pine and cypress. Cypress is a particularly useful and valuable wood, and apparently the manufacturers of it did not suffer as severely from dull times as did the manufacturers of yellow pine and Douglas fir. Mississippi was the third state in lumber production in 1908, with a total of 1,861,016,000 feet—a decrease of 11 per cent from the cut in 1907. Arkansas ranks fourth, with 1,655,991,000 feet—a decrease of nearly seventeen per cent over the previous year's output, and Wisconsin fifth, with 1,613,315,000 feet against 2,003,279,000 feet in 1907. In Texas where the lumber industry is confined almost exclusively to yellow pine, the falling off was very heavy. The total cut of the state in 1908 was 1,524,008,000 feet, a decrease of 31.6 per cent over the cut in 1907. Eight other states manufactured more than one billion feet each of lumber last year. In the order of importance they are: Michigan, Oregon, Minnesota, Pennsylvania, Virginia, Alabama, North Carolina, and West Virginia, California and Maine. Other states which reported more than one billion feet each in 1907, went just below that figure in 1908. The totals for a few states were greater in 1908 than in 1907, but this was chiefly due to the larger number of reports secured in those states in 1908. In Georgia, for instance, a particularly close canvass increased the number of mills reporting nearly one-third, while the resulting increase in reports of total production was only six per cent. In Massachusetts, 610 mills reported a cut of 384,526,000 feet in 1908 as compared with a cut of 364,231,000 feet by 518 mills in 1907. In Colorado, 254 mills cut 182,036,000 feet in 1908, while in 1907, 239 mills cut 134,239,000 feet. A particularly large gain in mills reporting was made in Oklahoma. In 1907, 129 mills in that state cut 140,015,000 feet, while in 1908, 214 mills cut 153,765,000 feet.

While there are many very large sawmills in the United States, the small mills far outnumber the large ones, and it is particularly interesting to note how many of these small mills there are in the states which are not now of first rank in lumber production. The statistics for New York were collected by the Forest, Fish and Game Commission of that state, which secured reports from 2,291 mills. In Pennsylvania 2,224 mills reported to the Census, and in Virginia, 1,937 mills. In North Carolina reports came from 1,740 mills, and in Kentucky from 1,530 mills. The number of mills reporting from Tennessee was only forty less than from Kentucky. In West Virginia, Georgia, Missouri, Ohio, and Indiana between 1,000 and 1,100 mills each were engaged in cutting lumber last year. The average output per mill was 350,000 feet in New York, and 5,260,000 in Louisiana, these two states presenting nearly the extremes of production of small and large mills.

Yellow pine, Douglas fir, white pine, oak, hemlock, and spruce, in the order named, were the woods cut into lumber in the largest quantity. Yellow pine has ranked first since it surpassed white pine in the later nineties, and it is still far in the lead. More recently, white pine has also been superseded by Douglas fir, so that now it occupies a third place. Washington has been the principal shingle producing state since the use of red cedar shingles became general, and it supplied three-fifths of the total output of shingles last year. Among the other shingle producing states, Michigan, Louisiana, Maine and California were the most important. The shingles cut in Michigan and Maine are chiefly of white cedar, those in Louisiana of cypress, and those in California of redwood. Lath are generally a by-product of lumber manufacture, and are made to some extent from almost every wood that is cut into lumber. Among the kinds of lath that are most prominent are white pine, Douglas fir, spruce, yellow pine, cypress and hemlock.

**NEWS NOTES FROM COTTAGE GROVE**

Bert Lawson has the blue prints of the building he expects to have constructed soon. They call for a dandy building with every modern convenience.

J. I. Jones was in attendance at the meeting of the board of trustees of the Willamette University at Salem last week of which board he is a member.

Mr. and Mrs. C. H. Van Denburg, accompanied by their daughter, Miss Eunice, left Sunday evening on No. 14 for Eugene. Mr. Van Denburg returned yesterday, but the others will remain this week for commencement exercises.

Monday morning shortly before 11 o'clock, O. E. Rice, a pioneer of this section who has been ailing for some time was suddenly attacked by heart failure and taken to his home by Mr. Thompson, proprietor of the Thompson hotel. Mr. Rice is among the early pioneers of Lane county, having resided for some time at what is known as the Rice Hill ranch near Oakland. His wife was paralyzed for some time before her death several years ago.—Western Oregon.

**LOW RATES TO LETHBRIDGE, ALBERTA.**

I am making the low rate of \$25 from any point in the Willamette valley to Lethbridge and return, including berth. The Lethbridge district is the best hard winter wheat district in the world, where yields as high as 70 bushels of wheat to the acre were harvested last year. For further information write to S. Y. EVANS, Lethbridge, Alberta.

In sickness, if a certain hidden nerve goes wrong, then the organ that this nerve controls will also surely fail. It may be a stomach nerve, or it may have given strength and support to the heart or kidneys. It was Dr. Shoop that first pointed to this vital truth. Dr. Shoop's Restorative was not made to dose the stomach nor to temporarily stimulate the heart or kidneys. That old-fashioned method is all wrong. Dr. Shoop's Restorative goes directly to these falling inside nerves. The remarkable success of this prescription demonstrates the wisdom of treating the actual cause of these falling organs. And it is indeed easy to prove. A simple five or ten days test will surely tell. Try it once and see. Sold by all dealers.

Our Fourth of July stock of fireworks, fire crackers, flags, balloons, drums and Chinese lanterns, etc. is now complete. Come and select what you want before our stock is broken. They are going fast. Red Cross Drug Co.

**EIGHTY RECIPES by Mrs. Janet McKenzie Hill, the Authority, Editor of the Boston Cooking School Magazine published under the title "The Cook's Book," Absolutely Free**
