

Do not be misled. The only kind of sound-reproducing machine that is perfect is the one that Edison invented and the one that Edison makes.

It is the one with the smooth and perfect sapphire point that doesn't require changing with each record and that doesn't scratch—two points alone that should influence your decision.

Only in the Edison do you find the music-reproducing idea at its best.

Don't take our word for it. Compare the Edison Phonograph with all other instruments side by side, on the same music, if possible, and then you will know better than we can tell you.

Edison Phonographs are sold everywhere in the United States at the same price, \$12.50 to \$125.00. Standard Records, 25c. Amberol Records (twice as long), 50c. Grand Opera Records, 75c. ## HOPS MAY GO AS HIGH AS 30 CENTS SOON

Twenty-five Cents Being Freely Offered Now — Dunn Thinks 50 Cents

Local hop dealers and growers are jubilant over the rapid advance in the price of hops. The reports from Portland indicate that they will go as high as 30 cents soon, 25 cents now being freely offered. As stated by The Guard a few days ago, F. E. Dunn, who has bought and sold hops since the past twenty years, looks for a still higher price. When he received the receipt of the price had advanced to 25 cents, he made the statement that he thought they would reach as high as 50 cents this year and still cling to the belief that they will go considerably higher than 30 cents.

A report from Salem this morning to the effect that Oswald Wolf sold 125 bales there yesterday to Julius Wolfe, of Silverton, at 25 cents.

Apples Scarce Secretary Holt, of the Eugene Fruit Growers' Association, says the Lane county apple crop is scarce this year and the association will not have enough by far to fill orders. He received a letter from a Sacramento firm yesterday asking for a large shipment from here, as there is nothing but Watsonville Bellflowers there, but Mr. Holt thinks the association will ship none to California this year.

Eggs are still retailing at 35 cents per dozen, the commission houses saying 30 cents. They are reported very scarce and dealers look for a further advance soon.

### PORTLAND MARKET REPORT

The northwestern market was lifted half a cent yesterday when Gray Grafton bought 80 bales of Yakima hops from J. Knox at 25 1/2 cents. They were grown in the Tampoico section. No further business at 25 cents was reported in Oregon, but the dealers had their mind out scouring the country for choice lots. Most of the growers who have that quantity at waiting for 30 cents to be reached. There were rumors of offers by leading exporters, but they lacked verification. The J. W. Seavey Hop Company bought several lots aggregating 200 bales during the day and in the past two weeks purchased about 1600 bales at the ruling prices.

The following very bullish cable was received by Isaac Pinens & Sons from John Barth & Sons, of Nuremberg:

"Market is advancing rapidly. Good inquires from new sellers. Sellers are realizing the shortness of supply and a raise may be expected. There is a decided improvement in our market and a better inquire prevails." Great Strength in Foreign Markets. Every mail advice from England and the Continent tells of a stronger tone in the hop market there. Since it has been generally known that Oregon is the banner hop producing section of the world, will produce only a fraction of its former big yields growers on the other side are stiffened in their views and all are now clinging to an advance.

In New York state hops have been quoted very firm since the opening of the season and present values there justify within a fraction of 30c a pound here.

Contracts Win Out Pacific coast dealers who have been contractors of this year's hop crop have won out against the hop growers and dealers who have made every effort to hit prices. Local people were secured for a third time for the outcome of the market here, for a while dealers were afraid to buy because they had already paid up about as many bales as could be handled on margins advanced by the banks. Now that the east is anxious to buy the local people have jumped into the market and are carrying prices upward over faster than they themselves had anticipated.

Wheat in Country Expected to be sold at a profit. Carried over from last week and receipts for the first two days of the week are good. In excess of the demand, the poultry market today shows a weak appearance, and some dealers freely predicted lower prices within the next few days unless meanline

there should be a material decrease in the receipts. The demand for all lines was such as to move but a small portion of the stocks on hand, but better trade generally is expected the latter part of the week. No price changes for the time were made, but in the event of continued heavy receipts the market is sure to slump. Eggs were fairly active at 22 to 32 1/2 cents a dozen for fresh range stock. Pork and veal moved in a satisfactory way at the last quotations. Wheat Moves Freely. Wheat is coming in freely, yesterday's receipts being 121 cars, as compared with 100 cars this day last year. The recent heavy movement is due to the better service given by railroads and follows the active buying of a week or ten days ago. At the present time buying has slackened up somewhat. Local prices advanced yesterday were unchanged. The high prices paid for bluestem at Seattle are credited to Puget Sound millers. But for the buying of the Portland market bluestem might command the same price in this market.

Oats and barley showed a reasonable degree of strength, with a fairly active demand. Hay Market is Higher. An advance of about 50c a ton being quoted in the better grades of hay by local buyers. Producers are now disposed to offer scarcely at all just now and the liberal early purchases by dealers are well nigh exhausted.

PORTLAND LIVESTOCK MARKET. Oregon Stockyards, Stockdale, Oct. 6.—Market for steers shows increasing dullness and the price is now down to \$4.25 for the best offering. This a decline of 10c from yesterday's quotations and is due primarily to the liberal holdings by killers and the continuance of fair arrivals. While it is possible that a slightly higher value than this would be obtainable by providing quality was good enough, nothing better than \$4.25 stuff has recently been offering here and this therefore makes the top of the market. Lamb Market is Depressed. While practically no lambs are now coming forward in the yards, now are wanted except extra-select quality, and these as formerly, bring top quotations. Killers are well loaded with lambs and are not anxious to take more at this time, although it is quite evident that the market will do better after a while. Run of sheep during the past 24 hours was quite good and demand took care of all that came, former prices being the standard. Good Showing of Hogs. A very good showing of hogs is noted in the Stockdale yards at this time. Arrivals are increasing but demand is absorbing most of them, especially the good stuff and receivers are maintaining the price at \$8 for the best.

The following is the general range of livestock values in the yards: Cattle—Best steers, weighing 1200 pounds, \$4.25; medium steers, \$3.75; \$3.40; best cows, \$3.25; medium cows, \$2.75; best heifers, \$3; bulls, \$2.25. ## OREGON WILL HAVE A THIRD CONGRESSMAN

State Will Gain Additional Representative With New Census

One additional congressman at least will be gained by Oregon in the coming census, and it is quite possible that Multnomah county alone will be made the new district. Portland now has more people than either the First or Second congressional district could boast of in 1900, the last census was taken in 1900. The population of Portland is now variously estimated at between 250,000 and 300,000, whereas in 1900 the Second district had but 220,507 and the First district 102,924. The census for the state of Oregon then showing 413,536.

At present 190,000 people are entitled to a congressman. It is supposed, however, that the ratio of representation will be changed as a result of the coming census, but whether the ratio is increased 25 per cent or remains as at present, Oregon will have one more congressman and perhaps two. Only the most enthusiastic politicians look for two additional representatives.

There is a suggestion that the new district be formed of Multnomah, Clatsop and Clatsop counties, but as Multnomah will have more than enough for a congressman in itself. Such an arrangement would satisfy Eastern Oregon as it would eliminate the possibility of Eastern Oregon congressional aspirants having to fight a Multnomah county for the nomination at every election. Making Multnomah county a congressional district would throw the fight into this country, while the two outside districts could look after their own affairs.—Telegram.
