PEARY FILES CHARGE AGAINST HIS RIVAL

Bases His Allegations Upon the Testimony of Eskimo Boys

New York, Oct. 12.—The following statement of Commander Robert E. Peary, which he submitted together with the accompanying map, to the Peary Arctic Club, in support of its contention that Dr. Frederick Cook did not reach the north pole, is now made public for the first time. The statement and may have been copyrighted by the Peary Arctic Club. Sized statement of Peary, Bartlett, Melville, Burup and Henson in regard to the testimony of Cook's two Eskimo boys:

"The two Eskimo boys, I-Took-a-Shoo and Ah-Pe-Lee, who accompanied Dr. Cook while he was away from Annotok in 1908 and 1909, were questioned separately and independently, and were corroborated by Panikpah, the father of one of personally familiar with the first third and the last third of their journey.

"To go more into details, one of the boys was called in and, with a chart on the table before him, was asked to show where he had gone

with Dr. Cook. This he did, pointing out with his finger on the map, but not making any marks on it.

"As he went out the other boy came in and was asked to show where he had gone with Dr. Cook. This he did, also without making any marks, and indicated the same route and the same details as did the first boy. When he was through Panikpah, the father of I-Took-a-Shoo, a very intelligent man, who was in the party of Eskimos that came back with Dr. Cook from the southern end of Nansen strait, who is familiar as a hunter with the Jones Sound region, and who has been in command in Peary's various expeditions for 15 years, came in and indicated the same locations and details as did the two boys.

"First boy was brought in again and then with a pencil he traced on the map their route, members of our party writing upon the chart where, according to the boy's statement, they had killed deer, bear, some of their dogs, seal, walrus and musk oxen. The second boy was then called in and the two went over the chart together, the second boy suggesting some changes, as noted hereafter. Finally Panikpah, the father, was again called in to verify the details of the positions of the route with which he was personally familiar.

Tell Course Cook Cook

"The narrative of the Eskimos is as follows:

"They, with Dr. Cook, Francke and nine other Eskimos, left Annotok, crossed Smith Sound to Cape Sabine, slept in Commander Peary's old house in Peary Harbor, then went through Rice Strait to Buchanan Bay. After a few marches Francke and three Eskimos returned to Annotok. Dr. Cook with the others then proceeded up Flagler Bay, a branch of Buchanan Bay, and crossed Ellsmere land, through the valley pass at the head of Flagler Bay, indicated by Peary in 1898, and utilized by Sverdrup in 1899, to the head of Sverdrup's Bay Fjord, on the west side of Ellsmere land. Their route then lay north through this fjord, thence north through Sverdrup's 'Heureka Sound' and Nansen Strait.

"On their way they killed musk oxen and bear and made caches, arriving eventually at a point on the west side of Exhelbergland of Sverdrup, to the south of Cape Thomas Hubbard. A cache was formed here and the four Eskimos did not go beyond this point. Two others, Koolootingwah and Inughito, went on one more march with Dr. Cook and the two boys, helped to build a snow igloo, and then returned without sleeping.

"These two Eskimos brought back a letter from Dr. Cook to Francke, dated March 17. The two men rejoined the other four men who had left to Annotok, arriving May 7. This information was obtained, not from the two Eskimo boys, but from the six men who returned and from Francke himself, and was known to us in the summer of 1908, when the Roosevelt arrived at Etah. The information is inserted here as supplementary of the narrative of both boys.

"After sleeping at the camp where the last two Eskimos turned back, Dr. Cook went in a northerly or northwesterly direction with the two sledges and 20 odd dogs, one more march, when they encountered rough ice and a lead of open water. They did not enter this rough ice nor cross the lead, but turned westward or southward and returned to Helbergland at a point west of where they had left the cache and where the four men had turned back. Here they remained four or five sleeps and during this time Shoo went back to the cache and got his gun, which he left there, and a few items of supplies. After being informed of the boys' narrative thus far, Commander Peary suggested a series of questions to the boys in regard to this trip from the land out and back to it. The questions and answers are as follows:

Crossed No Open Water.

"Did they cross much open leads or much open water during this time? Answer, none.

"Did they make any caches on the ice? Answer, none.

"Did they kill any bear or seal while out on the ice, while north of Cape Thomas Hubbard? Answer, no.

"With how many sledges did they travel? Answer, two.

"How many dogs did they have? Answer, did not remember exactly, but something under twenty.

"How many sledges did they have when they got back to land? Answer, two.

"Did they have any provisions left on the sledges when they came back to land? Answer, yes; the sledges had about all they could carry, so they were able to take but a few things from their caches.

"From here they went southwest along the coast of Helbergland to a point indicated on the map as Sverdrup's Cape Northwest. From here they went across the ice, which was level and covered with snow, offering good going, to a low island which they had seen from the shore of Helbergland at Cape Northwest. On this island they camped for one sleep. The size and position of this island as drawn by the first boy was criticized by the second boy as being too large and too far to the west, the second boy calling the attention of the first to the fact that the position of the island was more nearly in line with the point where they had left Helbergland (Cape Northwest) and the channel between Amundringnes land and Ellefvingnes land. This criticism and correction was accepted by the first boy, who started to change the position of the island? but was stopped, as Commander Peary had given instructions that no more changes or erasures were to be made in the route as drawn by the Eskimos on the chart.

"From this island they could see two lands beyond Sverdrup's Ellefvingnes and Amundringnes lands. From the island they journeyed toward the left-hand one of these lands (Amundringnes land) passing a small island, which they did not visit. Arriving at Amundringnes land the Eskimos killed a deer, as indicated on the chart."

Answer This Question

When shown positive and reliable proof that a certain remedy had cured numerous cases of female ills, wouldn't any sensible woman conclude that the same remedy would also benefit her if suffering with the same trouble?

Here are two letters which prove the efficiency of Lydia E. Pinkham's Vegetable Compound.

Red Banks, Miss.—"Words are inadequate to express what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered from a female disease and weakness which the doctors said was caused by a fibroid tumor, and I commenced to think there was no help for me. Lydia E. Pinkham's Vegetable Compound made me a well woman after all other means had failed. My friends are all asking what has helped me so much, and I gladly recommend Lydia E. Pinkham's Vegetable Compound."—Mrs. Willie Edwards.

Hampstead, Maryland.—"Before taking Lydia E. Pinkham's Vegetable Compound I was weak and nervous, and could not be on my feet half a day without suffering. The doctors told me I never would be well without an operation, but Lydia E. Pinkham's Vegetable Compound has done more for me than all the doctors, and I hope this valuable medicine may come into the hands of many more suffering women."—Mrs. Joseph H. Dandy.

We will pay a handsome reward to any person who will prove to us that these letters are not genuine and truthful—or that either of these women were paid in any way for their testimonials, or that the letters are published without their permission, or that the original letter from each did not come to us entirely unsolicited.

What more proof can any one ask?

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

No trouble at all to brighten an oil painting, the colors of which have grown dingy by age and exposure.

With a clean sponge apply cold water in which a little Ivory Soap has been dissolved.

The same treatment will materially improve the appearance of the frame.

What Dr. Cook Says

Cleveland, O., Oct. 12.—"It is the same old story," said Dr. Cook to-night, when shown the statement issued by Commander Peary, together with the map accompanying it.

"I have replied to the points raised a dozen times," he continued. "The map published by Commander Peary in itself indicates that the Eskimos have respected their promise, made to me, that they would not give any information to Peary or his men. The Eskimos were instructed not to tell Peary or any of his party of our trip over the Polar sea. They were told to say we had been far north. They have kept their word."

Eskimos' Replies Twisted

"Mr. Whitney has said that during the cross-examination conducted by Commander Peary and others of his expedition the Eskimos did not understand the questions put to them on the map which was laid before them. Their replies have been twisted to suit a perverted interest.

"I will not enter into any argument about the matter, but will bring the Eskimos to New York at my own expense, and they will prove, as did Mr. Whitney, that I have claimed."

"Dr. Cook would not consent to go over the details contained in Mr. Peary's statement further than the latter's remark that 'the Eskimos are only too willing to say something they think will please their questioners.'"

A PLEASANT WAY TO CURE CATARRH

Poor dejected victims! Continually sprinkling and spraying and stomach dosing. What are you doing it for? Try to kill the catarrh germs? Might just as well try to kill a cat with fresh milk. Sticking a piece of chewing gum in the upper left hand corner of the right ear would slaughter just as many germs. You can't kill the germs that cause catarrh unless you get where they are. You can get where the germs are by breathing Hyomel, the powerful yet soothing antiseptic, which is prepared especially to kill catarrh germs. Just breathe it in, that's all, gives joyful relief in five minutes. It is guaranteed by the Red Cross Drug Company to cure catarrh, or money back.

It is sold by leading druggists everywhere. A complete outfit, including inhaler, costs \$1.00. Extra bottles 50c. Cures sore throat, coughs and colds.

"I take special pride in recommending Hyomel to asthmatic sufferers, as I know by experience that it is a remedy that cures. I have not since using Hyomel had any recurrence of asthma."—Mrs. Wm. Burton, Orono, Mich., June 22, 1909.

MI-ONA Cures Indigestion

It relieves stomach misery, sour stomach, belching, and cures all stomach disease or money back. Large box of tablets 50 cents. Druggists in all towns.
