

Forced to Move Out

The Big Crescent Store Quits Business

There is Your Opportunity to Buy New Seasonable Merchandise at Great Money-Saving Prices. Allow Nothing to Keep You Away. We are determined to attract, interest and tempt you—at prices so low you can't help buying.

We are compelled to close out everything and vacate the room. Fixtures and lease of building have been sold and our only alternative is to dispose of our immense stock as fast as possible. Our time is limited, therefore, prices are no object. We are determined to clean up everything, *and do it quickly*. This is the greatest opportunity ever offered you in this, or any other city, to buy new, seasonable merchandise at such prices as are listed below. This is not a bait, thrown out to fool the people, but a modest invitation to come here, make your purchase, and save your good money. The more you buy, the more you save, and the poorer we become. But the goods must go, so come join the big crowds that daily throng the store.

STATEMENT BY

EUGENE CONTRACTORS

Decline to Recognize Newly Organized Union of Carpenters

We, the undersigned, contractors, being informed that there is an effort to get all carpenters and joiners into a union, for the purpose of controlling the action of all carpenters and joiners in their relation to the contractors of the city, and to control and keep within the union that class of labor within our city, to shorten the hours of work in those lines, and thus increase wages, do express our opinion in regard to the move as follows: That the movement will work to the detriment of the city of Eugene, and to the detriment of the local carpenters themselves, for the following reasons:

(1) That the local carpenters and joiners have in the past, in this city, been receiving good wages, and steady employment; and that these demands have largely been and are being agitated by men who have recently come to the city, and who are practically non-residents, men who are inferior mechanics, and unable to hold a job under ordinary conditions in competition with the older mechanics of the city; that they have drifted into the city by reason of the conditions here being superior, and the wages better than in other places.

(2) That cutting the day's labor from nine to eight hours a day, on the same wages, will tend to attract more men here from the outside than are needed by the local demand, causing loss of labor by resident mechanics.

(3) That under present conditions only a good mechanic is able to get a job at any time, and such conditions have existed for years past, but under union conditions skill and integrity on the part of the mechanic will count for but little.

(4) That the carrying out of the demands of those agitators will tend to deter those who contemplate building, and have a tendency to thus cut the demands for labor in our city still further. That this statement is no theory, several prospective builders have already announced their intention to throw up intended building operations for the coming year, if such conditions as are threatened exist.

(5) That so far as the contractors themselves are concerned, it really makes no difference to them what wages are paid, or what hours of labor shall be forced upon them by the union, except as the same shall affect the general building conditions; and the interest of the contractor in such conditions are identical with the interests of the workmen.

(6) We believe that the matter of wages in this city should be largely a matter of adjustment between the contractor and the workmen, as many of the workmen are of but little value to the contractor, while others are highly skilled and valuable, and worth much more to the contractor, and we believe that such workmen should receive greater consideration at the hands of the contractor, and wages commensurate with their services.

(7) The contractors of this city are not in any way organized, but each one attends to his own business in his own way. We have been called together by the service of a notice on each of us, of which the following is a copy, and we deem it advisable that the matter be made public, with our views on the situation:

Eugene, Or., Nov. 25, 1909.
To the Contractors of the City of Eugene, Oregon—

Gentlemen:—We, the undersigned, carpenters of Eugene, having been legally appointed to represent "Local Union No. 1445" of Eugene, Oregon, do hereby notify the contractors of said place that, at a meeting of said "Local Union No. 1445," held in their hall, November 22, 1909, it was unanimously voted that on and after January 15, 1910, eight hours shall constitute a day's work for carpenters and joiners of this city, it being understood that all contractors made prior to Nov. 25, 1909, shall be completed at the old schedule of hours and wages. And we respectfully request your acceptance of the above proposition on or before January 15, 1910.

A copy of this resolution has been presented to each contractor of Eugene.

Respectfully submitted,
A. B. SWANAY,
J. O. STOOPS,
J. W. GARD,
J. N. ST. CLAIR,
Committee.

(8) We believe that it would be wise to let well enough alone, and not undertake to remedy imaginary wrongs—to meet conditions that do not exist with us here, but to be satisfied with good conditions, steady employment and good pay.

That viewing this movement as we do, we declare it to be our unalterable position that we will in no way recognize the demands of the union, but will continue to conduct our business in the future as we have in the past, and deal directly with our employees, without the intervention of the union.
