PORTLAND MARKET REPORT.
Portland, Or., Feb. 17.—Signs of life, also of strength, were apparent in the hop market yesterday. As on business of consequence had been done previously, this month, it was feared February might pass without the expected movement. Now that a disposition to operate is shown by some of the dealers, it is to be hoped that buying will be on a better scale. The sale of 168 bales of fuggles by Al Jernan, of Silverton, to Klaber, Wolf & Netter at 22 cents was reported yesterday. It was also reported that John Carmichael had bought two lots in the St. Paul district at 20 cents. Isaac Pincus & Sons have also bought several lots from growers. Cables from London yesterday reported a firm market and a better inquiry. There was also some demand for the East at better prices than last week.

Contract For Sacks
Contract for several hundred thousand sacks were awarded at the meeting of the Farmers' Educational and Co-operative Union meeting in Pendleton yesterday, says the Pendleton Tribune, the lowest bidder being the Independent Grain Bag Company, of Walla Walla. It was agreed among the members that the price should not be revealed, so the exact figure is not known. However, it is known that the bids received were nearly cut in half in comparison with prices paid in the past by farmers who bought independently. H. H. McLean, agent for the Independent Grain Growers' Association of Walla Walla, was present and gave an address on the value of the union among the farmers. He cited the case of the high price of sacks in the past, which was nearly 10 cents each, to the present price, and also called the attention of the members to the fall in the price of binding twine, which he said had fallen 30 per cent.

Poultry Slightly Weakened.
The outlook today was for a slightly easier poultry market at the end of the week. Receipts were of fair size, but the demand was hardly up to expectations, and both hens and chickens were quoted at a trifle lower. Best hens at 17c, and mixed lots at 16 1/2c. Broilers held around 17c, and mixed lots at 16 1/2c. 27 1/2c, and live ducks were none too active at 20c a pound. For geese or turkeys there was little call.

The egg market for the time was unchanged at 27¢ 28c, but a further break is probably not far away. In dressed meats, pork was counted firm, 12c, being available for the best offerings, while veal was weaker, only strictly fancy stuff being movable at 12 1/2c.

Canned Corn Market Firm.
Canned corn is one of the strongest items in the grocery line, and wholesalers who are casting about for future supplies predict a material advance in prices on the 1910 pack. Opening prices on the coming output have not yet been announced by the Eastern packers, but a definite statement regarding values is expected soon. Local wholesale grocers say the prospect is for about a normal pack this year, with a heavier demand than that of last season, which would naturally make for higher prices.

Portland Livestock Market
Portland Union Stockyards, Stockdale, Feb. 16.—Market for cattle was quoted slow during the past 24 hours, according to official announcements made by the Portland Livestock Exchange.

The liberal run of cattle in the yards yesterday had a depression effect upon buyers and therefore their wants were all too easily supplied. Top for extra good steers in the yards during the past 24 hours was \$5.65, or 10c below the high value reached several days ago, when the made. Several sales at \$5.65 were made during the day and some very good quality was shown. Sales of good steers were made down as low as \$5, although others of this quality were made up to \$5.40.

Absence of Hogs a Help
The fact that no hogs have been received in the Portland stockyards for nearly a week is helping that market very firm and therefore it seems to be the general opinion of the trade that former top quotations will be easily continued. While the local market is generally based on or compressed by the weight of values in the East and Middle West, the very limited arrivals will scarcely be affected by that condition at present.

Sheep quotations are steady, with no size reported.
