The Test of a Good Piano

You can buy a watch any time from an irresponsible dealer for \$1.35, which he will tell you is "just as good" as a real gold one.

And to be sure it does look much like the watch your old reliable jeweler prices at \$100.

But you don't buy the cheap watch because you know the case is only the near-gold kind and that the works are worse than worthless.

In the piano business it is easier to deceive than in the watch business, because piano values are not as well known as watch values. A well varnished case, masquerading as a good piano, often looks pretty good. But, oh, what a disillusionment when the test of time begins to work.

If you are not an expert judge of pianos, your only safeguard lies in buying from a store whose prices never fluctuate; a firm that does not handle a piano at any price until it has been proven worthy and until it has won on its merits a reputation second to none—a reputation that is not only known to us, but of which you and your ancestors have heard for half a century. Such a piano is THE STEINWAY
