KNIGHTS AND LADIES
OF SECURITY ENJOY
SPLENDID METING
Large Class of Candidates Initiated and Others Voted Upon.

The Knights and Ladies of Security had a very pleasant time at their regular meeting Monday evening in the W. O. W. hall. A large number of candidates were initiated into the order and quite a number voted on and will "ride the goat" later. District Manager W. E. Cummings of Portland, was present and made some very interesting remarks for the good of the order. It was decided at this meeting that the charter remain open for a short time, and two captains were chosen for a contest in securing new members. The Misses Ellen Green and Harriet Purdy were chosen as captains and were allowed to choose sides from the membership roll books alternately. The losing side is to banquet the winning side. Much interest was manifested and a hot contest is expected. The national officers are expected to be present on the 13th of September, when a grand time is looked forward to by all members of this order. The district manager, W. E. Cummings of Portland, extended a most pressing invitation to any of the members of the order who possibly can, to be present at the meetings in Portland, to be held on the 11th and 12th of September when they expect to have the grand officers present with them.

National delegate—John H. Gains, Albany, Oregon.

**GERM IN SALMON
THAT POISONS DOGS
IS DISCOVERED**
Professor Emile E. Pernot, bacteriologist to the state board of health.

has discovered the germ that causes dogs to die when they eat salmon. It has long been believed that the flesh of the salmon was poisonous to dogs. Professor Pernot explodes this idea.

First he discovered that salmon fresh from the sea did not poison dogs that ate the flesh. This led to the further discovery that dogs were poisoned after eating salmon only when the salmon had been in the fresh water of the rivers for some time.

By a close examination of the blood-like material along the back of the fish under a low power microscope Professor Pernot discovered white spots which he quickly discovered to be amoeba, the small organisms that become parasite to the fish but not pathogenic to them. In other words there are organisms that attach themselves to the fish but do not poison the fish.

Professor Pernot found that salmon trout poisoned dogs in the same way that salmon from the sea does. Doses of cod-liver oil in quantities of grains given early after sickness, it was noticed, saved the lives of 21 dogs to whom it was administered by Professor Pernot.

It is believed that the discovery of the cause and the cure of salmon poisoning will prove of high value to many owners of dogs, and for this reason the last board of health bulletin contains an extended article on the subject, reviewing in detail all experiments made.

We are busy these days, and what because we are turning out artistic and nobby photos at a reasonable price and are pleasing our customers. CLARK'S STUDIO, 504 Willamette St.

What do you need in Hardware?

Hop-Picking Outfits

Here we have everything complete for hop-picking. We have made a special effort this year to keep in stock everything that you might need and we can supply you at a moments notice. Here you can get tents, tent stoves, cooking utensils and hop baskets; and you can buy them at prices that are less than you can get elsewhere. Come in and let us outfit you.

Pumps of all Kinds

We want to call your attention just for a moment to our very complete line of pumps. We are the local agents for both the Fairbanks and Hayes pumps and we tell you that there are no better or more substantial pumps made. We have both of these make of pumps in either pitcher or deep-well, and would advise you to come in and let us show you one of them before you buy elsewhere.

A Guaranteed Stump-Puller

We want you to see the Swansen Stump Puller, it does the work quickly and economically and it is guaranteed both by the manufacturer and by us personally. Remember if a Swansen Stump Puller breaks, flaw or no flaw, we will give you a new one; that certainly is a guarantee that assures the purchaser of his money's worth. Come in and let us show you one of them.
