Plan to Build Houses for Poor Men to Be Paid for in Installments

Ralph Emerson Pearce returned to Portland last night after taking preliminary steps looking to the establishment of an office of the Co-operative Home Builders, of which he is a representative, in Eugene. The plan as outlined by Mr. Pearce is to build homes on the installment plan stretching out the installments so as to render their payment easy. This plan has worked wonderfully well in Los Angeles and Mr. Pearce says conditions in Oregon are better than those in the southern part of the "Golden State." The company builds mostly small residences for people of humble means. They buy all the material of home dealers and employ only home labor in constructing the houses. It is proposed to establish offices in 29 towns outside of Portland, where they are now established. Mr. Pearce will return in about 10 days and expects to establish the office immediately on his return.
