DO YOU?

Expert Battery Testing

Danger in Delay

Regularity

You Are Entitled To This Care

Have your storage battery tested regularly by an expert battery man? YOU CAN NOT get good service out of a battery that is not tested regularly by some one who is qualified to do the work.

If you wait till it stops and won't turn your motor any more you have waited too long, and may then have to buy a new one or get the old one repaired.

It is by far a cheaper and better policy to have a reliable battery man take care of your battery for you twice each month.

The Willard Service Station is here for that very purpose. The care of your battery costs you nothing—and why should it. A battery is not a machine but is an electrochemical apparatus that should be kept in running order by the makers who sell it to you. We will gladly take care of your battery as long as it lasts.
