SALEM DOCTOR CURES CANCER

Mrs. Juliet Adams, Prominent Resident of Polk County, Cured of Cancer of the Face.

To Whom It May Concern:

For six years I suffered with cancer of the face. I was haunted by the realization that it was steadily becoming worse. As a last resort I applied to Dr. S. C. Stone for treatment. He applied a remedy for a few days and the cancer dropped completely out. I am happy to say that I am now completely free from the dreaded disease.

I cheerfully recommend Dr. Stone and his treatment.

Mrs. Juliet Adams, Route 1, Box 14, Salem Ore. November 30, 1917.

I will be pleased to refer you to other Salem people whom I have recently cured of cancer.

A Simple Way to Remove Dandruff

There is one sure way that has never failed to remove dandruff at once, and that is to dissolve it, then you destroy it entirely. To do this, just get about four ounces of plain, common liquid norton from any drug store (this is all you will need), apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips.

By morning most, if not all, of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have.

You will find all itching and digging of the scalp will stop instantly, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better.—Adv.

Recent discovery of ether compound that dries up corns so they lift out.

Good news spreads rapidly and druggists here are kept busy dispensing freebies, the recent discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers.

A quarter of an ounce costs very little at any pharmacy, but is said to be sufficient to rid one's feet of very hard or soft corn or callus.

You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shriveled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue.

This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.—Adv.
