

Twenty Years' Experience With Favorite Kidney Medicine

We have been selling Dr. Kilmer's Swamp-Root for over 20 years, and we are so favorably impressed with the remedy that we would not think of running our drug business without a supply of it on our shelves. It is one of the proprietaries most popularly called for by any of our classes, and we consider it a splendid medicine and we recommend it as such to our patrons.

Very truly yours,
ROY STREET PHARMACY,
 Per K.
 Cor. Broadway and Roy Street.
 Dec. 7, 1916. Seattle, Wash.

Letter to
 Dr. Kilmer & Co.,
 Binghamton, N. Y.

Prove What Swamp-Root Will Do for You
 Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Eugene Daily Guard. Medium and large size bottles for sale at all drug stores.—Adv.

"Salt of the Earth" New Kind of Western Play

For those who are tired of "vampy" plays, the show now on at the Eugene theatre will prove a refreshing relief. It is a dramatization of Peter B. Kyne's stories in the Saturday Evening Post, and centers around his two lovable old miners, "Snowshoe Sam" and "Sinfel John." The movie is filled with good, clean fun and interest, and there's a love story, too, featuring Peggy Adams, the little Edison star.

Three Generations Testify to the Efficacy of—

DR. CALDWELL'S Syrup Pepsin

The Perfect Laxative

in maintaining the family health. A combination of simple laxative herbs with pepsin, free from opiates and narcotic drugs, and pleasant to the taste, it acts easily and naturally, restoring normal regularity. First prescribed by Dr. Caldwell more than twenty-five years ago, it is today the indispensable family remedy in countless homes throughout the United States.

Sold in Drug Stores—50 cts. and \$1.00

A trial bottle can be obtained, free of charge, by writing to Dr. W. B. Caldwell, 457 Washington St., Monticello, Illinois

As Age Advances the Liver Requires occasional slight stimulation. CARTER'S LITTLE LIVER PILLS correct CONSTIPATION.

Genuine bears signature *Wm. Carter*

Colorless or Pale Faces usually indicate the absence of iron in the blood, a condition which will be greatly helped by Carter's Iron Pills

EUGENE THEATRE

MONDAY TUESDAY Jan. 28 and 29

SALT OF THE EARTH

FEATURING

PEGGY ADAMS

The Little EDISON STAR.

A western story that differs from the Indian fighting, mine strikers kind that the public has been satisfied with in the past.

THIS IS AN EVENING ENTERTAINMENT THAT YOU WILL ENJOY.

Admission 11c and 17c. Mat., 1:30; Eve., 7:15

MANY PUPILS PASS STATE EXAMINATION

Eighth Grade Pupils Take General Examination and Sixth and Seventh Specials.

Many pupils of rural schools in this county passed the state examinations taken last week. The examinations in geography were given to seventh grade scholars and the physiology examinations to sixth grade pupils. The following are the parties passing:

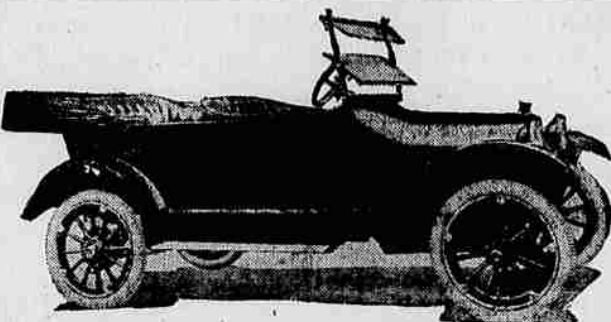

Pass in Eighth.
 District No. 4—Cecilia Aya.
 District No. 19—Carl Bauer, Jessie Courtwright, Asabel Henry Fish, Florence R. Hill, Jesse M. Larson, Edna Moe, Alice Violet Reynolds, Lena L. Safley, Lowell Sikes, William H. Wright.
 District No. 20—Flora Jackson.
 District No. 26—Carl Nichols.
 District No. 35—Elmer Mitchell, Cleo M. Hendricks, Elden Gates, Betty L. Lambert.
 District No. 39—Howard T. Frost.
 District No. 45—Arthur W. Gilbert, Charles E. Spray, Harriet Velma Hart, Jesse DeWald.
 District No. 50—Lester Gilchrist.
 District No. 80—Cora Neal.
 District No. 60—Ove Bodtker, Neil Flint, Thyra Nelsen.
 District No. 101—Earl Lulek.
 Lucille Dilly.
 District No. 105—Edith Watkins.
 District No. 106—Willard Day Morgan.
 District No. 109—Carson E. Jeans.
 District No. 111—Irene Genevieve Eason.
 District No. 130—Laurie Doane, Carleton Fritz Doane.
 District No. 132—Zella Edwards, Viola May Renfro, George Baxter Rhinevaunt.
 District No. 134—Ray Edwin Stacy, Virgil A. Miller.
 District No. 157—Harley Stafford.

Physiology and Geography.
 District 4—Sisters School: Geography Andrew Coghlan, Harry McDougall, John Edward Frank, George Frances Schaefer, James Leo Maxwell, Reva M. White, Otto Louis Vitus. Physiology: Alice Van Houtte, Mary Aileen VanHoutte, Sadie Coe, Helen Jacobs, Geneva Elizabeth White, Bessie Gallagher, Francis H. Coghlan, Harry Kennedy, Paul F. Brauner.

PUBLIC REST ROOMS MAY BE FURNISHED

Civic and Educational Bureau of Chamber of Commerce Asks City to Act.

Eugene will have more rest rooms and public toilet accommodations if the requests of the civic and educational bureau of the chamber of commerce are heeded. Darwin Bristow appeared before the city council Monday evening and asked that the city take action to furnish rest rooms and toilet room for ladies in the city hall, and announced their intention of asking the county court to provide such facilities in the addition to the court house, for which plans are now being drawn. Outside of the rest cottage in the county park there is no public rest room in the city for ladies, Mr. Bristow stated, and he believes others are much needed.

The request for action by the city was referred by Mayor C. O. Peterson to the health committee of the city council with instructions to report at the next meeting.

United States' Chief Aim

(Continued from page one)

ous to the United States. My thought was only to unite the opinion of the world so far as I could in protecting against the flagrant violations of right and of international justice which had been committed. At no stage of this distressing war have I ever entertained the slightest idea of making any combination for the special benefit of the United States. My thought has been merely the establishment of international justice and human dealing and the safeguarding of universal interests.

"With regard to the question whether the war and the participation of the United States in it has served to strengthen the common bond between the democracies of the western hemisphere, I will say I think it has. I think that thoughtful men in all the democracies of that hemisphere are beginning to see the real purpose and character of the United States. She is offering in every proposal that she makes to give the most sacred pledges on her own part that she will in no case be the aggressor against either the political independence or the territorial integrity of any other state or nation, at the same time that she is proposing and insisting upon similar pledges from all the nations of the world, who have its peace at heart and are willing to associate themselves for the maintenance of that peace. The very strength of her appeal in this direction comes from the fact that she is willing to bind herself and give pledges of the utmost solemnity for her own good faith and disinterestedness. If this is understood there could be no question of fear or suspicion.

"I am very much interested to learn of your return to Latin-America and I wish you bon voyage with the greatest heartiness.

Cordially and sincerely yours,
 (Signed) "WOODROW WILSON."

Letter of Special Significance.

The letter is particularly significant at this time because it has been known for several months the government has been cognizant of the insidious efforts of the German agents in South America. The Germans maintained an effective organization throughout the continent which for a long time the United States has no effective means of combating.

The improvement in the situation is attributed to the policy of the United States in seeking nothing for itself except what it asks for every other democracy in the world. That the real aims and objectives of this country have finally been made clear is attributed to a large extent to the improved exchange of news between the northern and southern continents, the lower cable rates and the efforts of the committee on public information. The South American diplomats at Washington in close touch with the actions and policies of the United States are said to have contributed materially to establishing the better understanding.

Hoover States

(Continued from page one)

the shortage in which will, we hope, not exceed 10 per cent. We should be able to accomplish this by a reduction in the manufacture of confectionery and sweet drinks of say 20 per cent and these very manufacturers could substitute other things and maintain their volume of production.

"During the recent shortage we made a patriotic appeal to such manufacturers to reduce their consumption of sugar by 50 per cent and placed it at this figure because we did not wish to destroy the livelihood of 250,000 women and girls pending fuller supplies of sugar. I have specifically before me the case of one very large manufacturer who followed this suggestion implicitly, only to find that over a score of manufacturers of imitation goods sprang up on all sides, supplied the trade to his great damage and loss, and we were powerless to give him any protection in his patriotic action. Surely it is better that the conservation of sugar should be made in the luxury trades and that they should have protection in making it than that we should draw on household supplies.

Distribution Not Organized.

"The recent experience with sugar also serves to prove the necessity to have some further powers in distribution. During the entire sugar shortage the gross supply amounted to 80 per cent of normal consumption, yet we had sporadic famines and privation all over the country because no organized distribution could be effected. The greedy got the sugar and the others went without.

"As to conservation measures necessary to apply to commodities needed for the production and preservation of food-stuffs, I may cite the case of ammonia, which is crucially necessary to maintain our cold storage warehouses, in which must repose over \$500,000,000 worth of food from time to time. The production of ammonia in 1917 was about 130,000,000 pounds; of this, the demands of the army and navy for explosive purposes are estimated to us as being 150,000,000

pounds per annum and that the amount necessary to maintain cold storage warehouses is 40,000,000 pounds per annum. In other words there is an absolute shortage of 60,000,000 pounds per annum at the present moment, which must later on be partially reduced by increased production.

"Yet, ammonia is being used to a considerable extent in the maintenance of skating rinks, in the cold storage of furs, alcoholic drinks, household ammonia, etc.

It is inexpensive and entirely reliable, therefore harmless.—Adv.
