Hair Often Ruined by Washing With Soap

Soap should be used very carefully, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it.

The best thing for steady use is just ordinary multifaceted coconut oil (which is pure and greaseless), and is better than the most expensive soap or anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage.

You can get multifaceted coconut oil at any pharmacy, it's very cheap, and a few ounces will supply every member of the family for months.—Adv.

You Know---

It is not what you eat that makes you fat; it's what you digest.

It is not what you read that gives you knowledge; it's what you understand.

It is not what you earn that makes you rich or gives you financial independence; it is what you save.

WORKING MEN AND WOMEN

You are getting good wages now, in fact the best you have ever had. Don't spend your earnings foolishly. Every dollar you save now will serve a double purpose. It will buy double the amount of comforts, after the war and by not spending it now you are helping to end the war by helping the allies to win.

JUMPER BERRY CROP WILL BE RESULT OF RECENT HEAVY RAINS

Early Estimates of \$50,000 Harvest of Evergreens to Be Eclipsed as Result of Improved Growing Conditions.

Early estimates of \$50,000 for the evergreen blackberry crop in Lane county will be eclipsed as the result of the recent heavy rainfall which has served to increase the quantity and improve the quality of the berries in the opinion of buyers who are offering six cents a pound for the product of these bushes, which grow wild in all parts of the county, and advertising broadcast in their efforts to induce people to pick. The picking season has just begun and will cover a period of several weeks. The berries grow very prolific and it is estimated that a man or woman under average conditions should be able to pick 150 pounds.

In former years thousands of tons of these berries have been permitted to dry on the vines. It has been only recently that bakers have come to regard this berry as the best of all varieties for making pie, because of its meaty nature and the fact that under heat it does not all turn to juice. Last year the United States government came into the market for the first time and the supply of these berries desired for the use of the army and navy this year is largely responsible for the prevailing high price. The berries first began to have a market value five years ago when the Eugene Fruit Growers' association purchased a small amount. Last year the association handled 368,000 pounds and expects to purchase 400,000 pounds during the present season.

J. W. Shumate is buying berries here for the W. H. Paulhamus company, of Puyallup, Wash., and has been purchasing about two tons of berries a day. He stated Wednesday that he expects to handle about 150 tons of berries during the season. These berries are placed in barrels here, shipped to Albany where they are frozen before being shipped to Washington.

The evergreen berry vine has long been regarded as a pest by farmers and especially sheep owners. The vines when a sheep is entangled hold so securely that death results unless the animal is found and released.

FIRING IS REPORTED OFF ATLANTIC COAST

Shooting Heard by Captains of Fish Boats May Indicate Battle With U-Boat.

An Atlantic Post, Aug. 21.—Reports of heavy firing 85 miles off the Atlantic coast, which may indicate a battle between a steamer and a submarine, were reported by captains of several fishing vessels.

Captain George F. Perry, of the schooner Goodspeed, reported seeing a large steamer firing at an object in the water early yesterday morning. The steamer was running at good speed and the flash of her guns could be plainly seen, according to Captain Perry.

Other captains also reported the firing. Captain Perry declared he heard one shot which was followed a few seconds later by four more shots. Later a naval vessel was seen making full steam in the direction from which the firing came. The captain of the schooner Horstema reported a suspicious tramp steamer, which apparently carried no flags, cruising about the locality where other captains reported they heard the firing.

That the firing was naval gun practice was not considered likely by the fishing captains.

"Hunger Stone" Again Shows for Germans

The "Hunger Stone" beneath the chain stone appears it means there is not enough water for crops. Across the face of the stone the German words, which mean "When you gaze upon me then cry," are carved. There are many dates showing low water marks, the oldest being 1417. This year the water has reached the lowest level in the river ever known.
