UNIVERSITY TO HOLD TWO SUMMER TERMS

Courses and faculty for the two summer schools of the University of Oregon this year at Portland and Eugene have been announced by Earl Kilpatrick, director of the summer session. Registration in the Eugene school will be had June 21 and in Portland June 21. Dean Colin V. Dymont will have charge of the Eugene school and Dr. George Reber the Portland session.

Besides the regular University faculty members who will teach during the summer term at Eugene, are Samuel H. Harnister Harding, Ph.D., professor of history at the University of Wisconsin, and Orville C. Pratt, superintendent of schools at Spokane, Washington, and formerly head of education at De Pauw university; Ben H. Williams, Ph.D., University of Pennsylvania; and J. H. Richerson, University of Idaho. Mrs. Eric W. Allen, wife of Dean Allen of the school of journalism, will instruct in English.

The Portland session faculty will also include a number of well-known scholars. Edwin T. Devine, associate editor of the Survey and one of the leading sociologists of the nation, is probably the biggest figure of the group. J. Duncan Speth, Ph.D., professor of English literature at Princeton, is also a dynamic leader who has been practiced for work. Faculty members from other institutions are: Clyde Englehart, M. A., South Methodist university, Dallas, Texas; Emilio Goggio, Ph.D., Romance languages, University of Toronto; Edward L. Schaub, Ph.D., education, Northwestern University; R. M. Wasley, Ph.D., millinery, University of Michigan; William H. Boyer, music, Portland public school; and E. Albert Cook, Ph.D., Pacific University, Forest Grove.

MARITAL TROUBLES CAUSE OF SHOOTING

Portland, April 21.—Two persons were suffering from severe wounds here today and one man, J. R. Chamness, 27, a laborer, was dead following a shooting in the Fulton district late last night. The shooting occurred at the house of a friend of Chamness and was caused by the dead man's anger at his wife's refusal to return to him after a separation.

Mrs. J. L. Cave, mother-in-law of Chamness, and Harry Post, friend of Mrs. Chamness, were the two wounded by the bullets from Chamness' revolver. The bullet which hit Mrs. Cave was intended for Mrs. Chamness. After wounding the pair Chamness turned the gun on himself with fatal effect.

Radio and Light Waves Same Thing, Says Expert

New York, April 21.—Two of the most startling announcements ever made in the field of radio activity were contained in a lecture by Dr. Charles P. Steinmetz, chief consulting engineer of the General Electric company, delivered from a broadcasting station Wednesday night.

They were, first, that radio waves and light are the same thing, and, second, that the theory of "ether" must be abandoned as unsound and unreasonable. The only difference between radio and light, Dr. Steinmetz declared, is in the wave length. The wave length, he explained, has a length of 300 metres. The wave length of a beam of light is only twenty-thousandths of a centimeter. The wave length of the X-ray is 100 times shorter, and on the other hand, the electro-magnetic wave of long distance transmission lines has a length of 5,000,000 metres.

"A radio wave passes through a brick wall," he said, "because the thickness of the wall is only a small fraction of the wave length, while a light wave is stopped by a thin sheet of metal because its thickness is even the thinnest sheet of metal is many times the wave length of a light wave."

Passing on to the question of ether, Dr. Steinmetz declared that the belief in ether must be abandoned as being contradicted by Einstein's theory of relativity, which is now meeting general acceptance.

"For a long time we have believed," he said, "that light is a wave motion of some hypothetical thing called the ether. This theory never was satisfactory, because it required that the ether must be so extremely thin that the earth and all bodies move through it with terrific speed—100,000 feet a second—without any trace of friction, and at the same time the ether must be a solid body of high rigidity. This is unreasonable."

Dr. Steinmetz explained the production of electro-magnetic waves, which "if they alternate nearly a hundred billion of million times a second, form a beam of light."

Northwestern States Talk Of Reclamation at Spokane

Spokane, Wash., April 21.—Relation of the Columbia basin reclamation project to the smaller projects of the state and to the Smith-McNary reclamation bill, was explained in a resolution introduced today at the conference of chambers of commerce from four Pacific northwest states, meeting in Pasco. Delegates from Washington, Oregon, Idaho and Montana were present.

Union Printers of Valley Meet in Eugene Tomorrow

Printers from nearly every town in the Willamette valley as well as a few from southern Oregon are expected in Eugene Sunday to attend a trade conference. Working conditions, a uniform wage scale as well as national problems, confronting the International Typographical Union are to be discussed.

\$1,000,000 Asked With Which to Fight Floods

Washington, April 21.—Congress today came to the aid of the flood-stricken lowlands along the Mississippi river. Within an hour after reconvening, both houses passed an appropriation making \$1,000,000 immediately available for strengthening the river levees.

President Harding's signature is expected late today or tomorrow.

Illinois Town Flooded
Vincennes, Ind., April 21.—Russellville, Illinois, was flooded today when a levee holding back the Wabash River gave way.

Homes in the little town of 200 crumpled in the heavy sweep of water. Homes had a boat tied at the doorstep and when the warning was spread that the levee was giving away the entire town fled to the hills and swept down stream. At Vincennes, five miles south, they joined the colony of 1,000 driven from their homes here when thirty-five city blocks were flooded.

CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Try it! Your druggist sells a tiny bottle to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

AGGIE TUMBLERS TO BE CIRCUS FEATURE

Oregon Agricultural College, April 21.—The varsity tumbling team has been picked to take part in the Shriner circus to be held at Eugene May 10, according to "Bob" Hager, coach of the team.

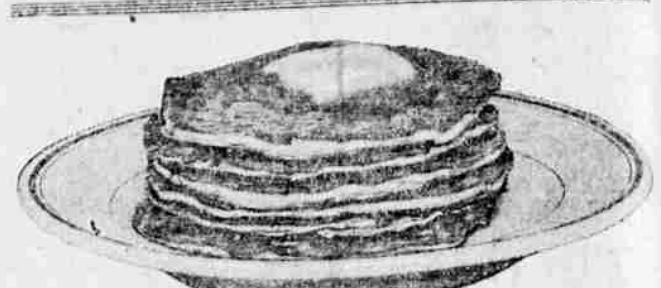

The Shriners plan on having a two-day three-ring circus. Hager's team can perform only on one night because they are scheduled to show here during Junior week-end. Personnel of the Aggie team is "Bob" Hager, "Duke" Rutherford, "Hippo" Kuchta, "Dizzy" Conley, "Blond" Montgomery, Darwin Peavy, "Chick" Patchin, Hugh Kennedy, and Julian Burroughs. The men practice in the advanced gymnasium room on Monday, Wednesday and Friday afternoons.

NOTICE TO REALTY DEALERS

Lady Astor Declares League of Nations Necessary

New York, April 21.—In honor of Lady Astor, who described herself as a sort of connecting link between the English-

speaking peoples, more than 850 men and women, scores of them leaders in sundry fields of labor, attended a dinner last night under the auspices of the English-Speaking Union.

Presiding was John W. Davis, American ex-ambassador to the court of St. James, who showered Lady Astor with compliments.

In her speech Lady Astor put in a good word for the accomplishments of the League of Nations which she thought enough of to make every woman in America want to join it in some form or other, particularly those who had sons in the war.

Will Erect New Addition to Oregon Chemistry Building

The erection of an addition to the University of Oregon Chemistry building at a cost of \$18,000 is being planned

AMERICA IS READY TO DISCUSS DEBTS

Washington, April 20.—American foreign debt refunding commission has formally notified the nations owing the United States \$11,000,000,000 in war debts that it is ready to proceed with the refunding of these obligations, it was learned officially at the treasury department today.
