

REVIVAL PROGRAM FOR WEEK IS GIVEN

Subjects for next week's services at the Seventh Day Adventist evangelistic services at the tent auditorium, Thirtieth avenue east and Oak, are announced as follows:

Monday—Who are the angels? Are they our dear friends?

Tuesday—Is there a personal devil? If so, who is responsible for his existence?

Wednesday—Spiritualism. Do the dead actually appear to the living?

Thursday—What, when and where is hell?

Friday—Divine healing.

Song services begin at 7:45 o'clock each night except Saturday, which is rest night. Attendance has been gratifying, those in charge report.

Glimpses of the Road From Eugene Auto Camp

Red suits, blue suits, yellow suits with green stripes, and green suits with yellow stripes; even overalls were commensured by the kiddies and used as bathing suits, for almost everybody at the auto camp was in the water on Friday afternoon. Folks from town as well as the campers were enjoying "in cool waters of the Willamette." Two tourists from Wyoming just stopped at the camp long enough to take a swim. "We heard that there was a dandy river here," they said, "and as we never miss a chance to take a swim, we stopped. We are on our way north, but the swim comes first, let's go!" They went.

Mr. and Mrs. Silvernall from Stockton, Cal., are on their way to Milltown, Wis. They report a wonderful time, and say that they have been very fortunate in not striking any bad roads. They will probably stop at the Eugene camp on their way back home.

On their way from Melone, Washington, to California, are Mr. and Mrs. J. H. Hill and family. They were very much pleased with the auto camp, especially with the river and the trees on the butte. They say that so many of the camps are so sunny, with no grass and no trees, that kiddies who are now

WHERE DO THE IMMIGRANTS GO?

Former occupations and climatic conditions determine their selection of homes in the United States. North Atlantic frontage and Upper Mississippi Valley get the bulk of them.

Announcement in the New York press that many of the immigrants now entering the United States are making hasty departure for the farm and cities of the Northwest renews interest in the question as to the sections of the country which are to receive the greatly diminished supply of immigrants now being admitted to the country. The records of the movements of the new arrivals indicate that former occupation and climatic conditions still control the immigrant in determining his future abiding place in the United States.

This is particularly noticeable in the movements of the new arrivals from northern Europe, a large percentage of the Scandinavian arrivals in the opening month of the new fiscal year having already departed for the Upper Mississippi Valley, notably the farms and cities of Minnesota, the Dakotas, Wisconsin and Illinois. With those from the countries of central and southern Europe the opportunities in the factories and mines of the North Atlantic frontage are more attractive and the bulk of the small additions to our population made under the law which limits the number of each nationality permitted to enter will find homes in the area bounded by the Potomac and Ohio on the South and Rocky Mountains on the West.

This distribution of the new arrivals follows the custom of earlier years. Compilations by

the Trade Record of The National City Bank of New York show that of the 14,000,000 persons of foreign birth now living in the United States, about 5,000,000 are residents of the Upper Mississippi Valley, 5,000,000 in the Middle Atlantic States, 2,000,000 in New England, about 1,000,000 in the South, and approximately a half million on the Pacific coast.

It is in this detailed study of the final distribution of the immigrants arriving in earlier years, says the Trade Record, that the disposition of the home seeker to select climatic conditions and occupational opportunity similar to those of his former home becomes apparent, and this is sharply illustrated by the announcement in the press of New York that the bulk of the Scandinavian arrivals of the new fiscal year have already taken their departure for the farms and cities of the Upper Mississippi Valley, especially to the states of Minnesota, the Dakotas, Wisconsin and Illinois.

The last census of the United States shows the distribution by states of the 14,000,000 persons of foreign birth, which still remain out of the total of more than 30,000,000 of arrivals since 1830. Of the more than 1,000,000 Scandinavians in the country in 1920, 220,000 were in the state of Minnesota, nearly 100,000 in the Dakotas, 90,000 in Wisconsin, 150,000 in Illinois, and 60,000 in Iowa, while the great manufacturing state of New York retained less than 100,000 of the more than a million entering through its doors. The Germans, while seeking climatic conditions similar to those of their own country, are less devoted to agriculture than their Scandinavian neighbors, and of the 1,686,000 in the country in 1920, 295,000 were in the state of New York, 120,000 in Pennsylvania, 205,000 in Illinois,

151,000 in Wisconsin, 100,000 in Minnesota and the Dakotas. The Poles, while accustomed to climatic conditions of northern Europe, are apparently less devoted to agriculture than some of their immediate neighbors, and they are found in those states offering opportunities in the mining and manufacturing industries, for of the 1,140,000 Poles in the United States in 1920, 247,000 were in the state of New York, 178,000 in Pennsylvania, 162,000 in Illinois, 103,000 in Michigan, and about 150,000 in New England as a whole. The cosmopolitan Britisher distributes himself very widely. Of the 850,000 in the United States, 135,000 were in New York, 147,000 in New England, 90,000 in Pennsylvania, 54,000 in Illinois, 47,000 in Michigan, 43,000 in Ohio, 87,000 on the Pacific coast, and 45,000 in the Mountain States. Of the 1,037,000 natives of Ireland, the states having big cities get the bulk, New York 294,000, Massachusetts 183,000, Pennsylvania 121,000, and Illinois 75,000. Of the 1,400,000 Russians, the mining and manufacturing states had the bulk, New York 529,000, Pennsylvania 161,000, Illinois 117,000, New England 147,000. This is also true of the Italians, for of the 1,610,000 in the United States in 1920, 545,000 were in New York, 222,000 in Pennsylvania, 157,000 in New Jersey, and 117,000 in Massachusetts.

The South gets but a small percentage of the home seekers, due probably to climatic conditions and what is presumed to be a more plentiful supply of labor, for of the 14,000,000 persons of foreign birth in the United States in 1920, the entire south had less than 1,000,000, while the single state of New York had 2,876,000, Pennsylvania 1,300,000, Illinois 1,200,000, and Massachusetts 1,077,000.

Mill and Elevator Ready to Run Soon

With three millwrights and two carpenters on the job of remodeling the Eugene Mill and Elevator company plant at the foot of Fifth avenue east and installing the new equipment being put in, the factory will be ready to run at capacity not later than August 1, says Walter K. McKnight, office manager. The elevator and machinery has been in process of rearrangement all this month, to be ready for a two-shift run when wheat comes in and perhaps for a third shift if required later.

President of Mills Heads U. Women

Portland, Ore., July 21.—Entrance of the United States into the League of Nations and participation in the permanent world court of international justice were favored yesterday in two resolutions adopted at the closing session of the annual convention of the American Association of University Women held all this week in Portland. Both resolutions were adopted without discussion, being a part of the report of the committee on resolutions which was accepted and adopted as a whole.

Dr. Evelyn Henry Reinhardt, president of Mills college, California, and vice president of the association, was elected president. She succeeds Miss Ada Comstock, new president of Radcliffe college, who resigned before completing her four-year term to devote her time to her profession. Mrs. A. W. Cooper, president of the Portland branch, was elected secretary of the north Pacific section of the association.

Hardwaremen Defeat Growers; Are Second

Eugene-Springfield Game is Called Off

Manager Kelly of the Eugene baseball team has been unable to dig up a pitcher for Sunday's scheduled mix with Springfield on the normal lot, and as a result Eugene will forfeit the mix to all aggregation. This gives added zest to the pennant race, for it puts the other teams on much the same footing as Eugene. It should be a close scrap from now on.

Navigation Problems Absorb Attention of Passengers on Big Ocean Liners.

Officers of trans-Atlantic passenger vessels find that there is an ever increasing desire on the part of their passengers to familiarize themselves with the operation of the liners on which they are traveling. This particularly applies to steamships of up-to-the-minute construction, such as the *President Harding* and *President Roosevelt* of the United States Lines. These two steamships, American built within the past few years, have many points about them which prove exceptionally interesting to passengers of both sexes.

Explaining Liner's Course to Fair Passengers.

It is the bridge, however, which causes a feeling of wonder and holds the interest of many for hours. Here the "brains" of the *President Harding* are located—the instruments which "control" the engines "way down in the liner's hold. Here also is the chart room where the position of the vessel is ascertained and recorded daily. The Chief Officer of the *President Harding*, Captain W. Wilkinson, finds that passengers are becoming more and more interested in the manner in which the vessel is navigated, and takes pleasure in expounding on his work at length.

PICKWICK STAGES CITED

Portland, July 21.—An order was entered yesterday by the Oregon Public Service commission, meeting in Portland, citing officers of the Pickwick Auto Stages to appear in Salem, August 1, and show cause why the company's permit to operate in this state shall not be cancelled. This action is chiefly due to the recent crossing crash in Linn county in which two passengers of a Pickwick stage lost their lives.

The commission is prepared to inquire carefully into the company's practices and compliance with laws of the state.
