Life Insurance Day

In making up your budget for the coming year do not fail to include the small amount necessary for the first premium on a policy in the New York Life Insurance Company. Hear what the Banks of Eugene have to say about it:—

The First National Bank of Eugene says: "Strange as it may sound, man's responsibility does not end with death. He leaves behind him, usually, those who had learned to depend upon him for support. So it is evident that it is the duty of every man to provide adequate Life Insurance to care for his loved ones in comfort. Life Insurance is one of the splendid provisions modern business has made for the building up of an estate."

The Bank of Commerce of Eugene says: "Carry your full share of insurance no matter what the sacrifice you may have to make to do it. This is the fairest, the most practical and considerate thing you can do for those dependent upon you."

The United States National Bank of Eugene says: "The trend of modern business is coming, more and more, to the realization of the important factor which insurance is to credit. The two—Credit and Insurance—are closely allied."

"We are glad to greet the man with the foresight to not only truly and adequately protect his family and their future with life insurance, but also provide his business activities with this necessary protection."

When the three big financial institutions of the community recommend Life Insurance as an investment, for the building up of an estate and for the protection of family and property, is it not time to consider seriously, the necessity of protecting YOUR interests by taking out a policy in this greatest of all life insurance companies, the NEW YORK LIFE? If you are interested, sign the enclosed postal card, drop it in the post office, and we will call and explain all the details of a modern policy to you.
