British May Attempt Polar Flight With Dirigible, View

London, Feb. 21.—Great Britain may attempt a north pole flight with a dirigible as a result of the abandonment of the plan of the United States navy department to send the Shenandoah into the Arctic, it was learned here today. The plan is being projected by F. M. Boothby.

U. S. LAGS BEHIND NAVY TREATY TERMS OF ARMS CONFERENCE

London, Feb. 21.—The British cabinet today decided to carry out the naval construction program previously agreed upon and will probably begin work upon six new cruisers immediately.

The labor government, while favoring disarmament, believes that construction of additional warships will relieve the unemployment situation by giving work to thousands of laborers.

U. S. HAS NO PLANS

Washington, Feb. 21. — The United States is being left behind in the development of naval strength to the full extent authorized by the Washington conference treaty, naval authorities said today in commenting on dispatches from London reporting British building.

While the United States has made no plans for the construction of new tonnage in the classes of ships exempt under the treaty, Great Britain has launched an ambitious ten year program calling for construction of 52 light cruisers of 10,000 tons each, and Japan is also forging ahead rapidly, despite financial hindrances caused by the earthquake.

Japan is now building or has authorized eight cruisers, 25 destroyers and 38 submarines.

Even France and Italy, the inferior powers under the conference treaty, are building more than the United States. The French government has authorized the construction of nine new submarines and a more extensive program is now before the French parliament.

The Italian program calls for twenty new submarines and twenty destroyers, with other auxiliary craft.

These figures have just been compiled by the navy department. Naval officers pointed to them today in contrast to the refusal of congress to permit sufficient building to keep the American navy up to the 5-5-3 ratio.

TAX BILL AMENDMENT PUT OVER BY DEMOS

By A. O. HAYWARD
(I. N. S. Staff Correspondent)

Washington, Feb. 21.—The democratic insurgent coalition which wrested control of tax reduction legislation from the republican majority in the house and defeated the Mellon plan in its first test was reported today to be weakening under pressure from the republican leaders.

It was asserted that two or three of the republicans who had lined up with the coalition had been won over by the regular republicans and would go along with them in an effort to substitute the Mellon plan for the Garner plan which has been written into the bill. This opportunity will come when the perfected bill is reported to the house for passage.

Republicans Want Insurgents.

Republican leaders are using several arguments to win the insurgents. They are telling those demanding a soldier bonus that adoption of the Garner plan kills every possible chance of a bonus because the treasury will be left bare. Many of the insurgents are strong supporters of bonus legislation.

The tax bill was taken up today with indications of a number of stiff fights ahead on several sections. One of the most stubborn of these will come when the attempt is made to repeal existing taxes on automobiles repair parts, tires and accessories and reduce from 5 to 2½ per cent the tax on trucks of two tons or less carrying capacity. The repeal and reduction of these taxes are demanded by the farmers.

Other contests will arise over efforts by Frear, republican of Wisconsin, to incorporate in the bill an excess profits tax, a tax on undistributed profits, and a gift tax, and to substitute for the existing state tax a new and higher schedule for such taxes prepared by Ramseyer, republican of Iowa. Garner, the democratic tax leader, has announced his purpose to support the Ramseyer estate plan.

The tax bill was changed in the house today to provide that mutual beneficiary insurance companies not operating for profit and confined to local communities are exempted from taxation.

The house exempted from the corporation tax farmers' insurance or other mutual insurance companies, mutual ditch or irrigation companies, cooperative telephone companies or like organizations if substantially all the income consists of collections from members for the sole purpose of meeting losses and expenses.

QUICK RELIEF FROM CONSTIPATION

Get Dr. Edwards' Olive Tablets

That is the joyful cry of thousands since Dr. Edwards produced Olive Tablets, the substitute for calomel.

Dr. Edwards, a practicing physician for 17 years and calomel's old-time enemy, discovered the formula for Olive Tablets while treating patients for chronic constipation and torpid livers.

Dr. Edwards' Olive Tablets do not contain calomel, but a healing, soothing vegetable laxative.

No griping is the "keynote" of these little sugar-coated, olive-colored tablets. They cause the bowels and liver to act normally. They never force them to unnatural action.

If you have a "dark brown mouth"—bad breath—a dull, tired feeling—sick headache—torpid liver—constipation, you'll find quick, sure and pleasing results from one or two of Dr. Edwards' Olive Tablets at bedtime.

Thousands take them every night just to keep right. Try them. 15c and 30c.

My kidneys acted irregularly, and I had inflammation of the bladder. Doan's Pills relieved the backaches and I felt better in every way."
