Don't Let That Cold Turn Into "Flu"
Rub on Good Old Musterole

That cold may turn into "Flu," Grippe or, even worse, Pneumonia, unless you take care of it at once. Rub good old Musterole on the congested parts and see how quickly it brings relief.

Colds are merely congestion. Musterole, made from pure oil of mustard, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold.

As effective as the messy old mustard plaster, does the work without blister. Just rub it on with your finger-tips. You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

To Mothers: Musterole is now made in milder form for babies and small children. Ask for Children's Musterole.
35c and 65c, in jars and tubes.

MUSTEROLE
WILL NOT BLISTER
Better than a mustard plaster

You Can Abuse YOUR EYES
and later on, probably suffer the penalty.
You can neglect your eyes, and when the showdown comes, have a great deal of difficulty in getting them properly fitted:

OR

you can care for your eyes as you would any other precious possession. Have them examined regularly. Wear glasses when needed. Work under correct lighting. Wear tinted glasses for protection against sun and wind. And when your eyes trouble you, consult a reliable optical specialist.

HAYWARD PUTS ON GOOD MEET THOUGH FEW MISS TRIALS

Coach Bill Hayward held the first regular track and field competition Saturday afternoon on Hayward field between the varsity track squad and the freshmen at the University of Oregon. Many of the regulars failed to appear to participate due to classes and other things, but Hayward ran off the events in big meet fashion to get the men used to competition. Prospects for a good track season were evident, although big gaps in the Oregon squad in second and third places were shown.

In the dashes fairly good time was made, Lucas, a Klamath Falls boy, stepped out and won the hundred in almost even time, and he was pressed close by Art Tuck who finished second in the event. This pair of sprinters should annex counters for Oregon in the dashes this spring.

Depends On Spearow.

Captain Ralph Spearow was not able to participate due to a business engagement, but Hayward is not worried about this man's performance as he still is good for first in the pole vault in any meet.

In the 440 Risely and Rosebraugh, veterans in this event ran one of the prettiest races of the day, they fought for first place all the way around the track, and Risely won at the finish by a few inches.

In the hurdles Walt Kelsey, star freshman of last year ran both the highs and lows in good time. Art Tuck in the javelin threw the grecian stick for over 190 feet.

Results of the Meet.

Following are the results of the meet: 100-yard dash, Lucas, Tuck, Snyder; 880-yard run, Gerke, Mauney, McCune; javelin, Tuck, Rosenbaugh, Simonton; shot, Tuck, Johnson, Beatty; discus, Tuck, Johnson, Terjesen; low hurdles, Kelsey, Rodda, Clark; 220-yard dash, Holt, Lucas, Cash; two mile, Keating, Jones; mile, Risely, Conley; 440-yard dash, Risley, Rosebraugh, Wilbur; 120-yard high hurdles, Kelsey, Cleaver, Hunt; broad jump, Rosenberg, Gray, Snyder; pole vault, Rosenberg, Canterbury; no high jump.

Risley and Rosebraugh, both veterans, fought a nice race out in the quarter, Risley winning by a scant margin.

On Saturday, April 26 an interclass meet and tryouts for the University of Washington relays will be held on Hayward field, starting at 2:30 o'clock.

MARKET REPORT

Eggs and Poultry	
Eggs, fresh	18@19c

ANNUAL FOUNDERS' DAY SCHEDULED FOR MAY 3

Portland, April 21.—The eighty-first anniversary and the twenty-fourth celebration of "Founders' Day" will be held at Champoeg, Marion county, on May 3, this year.

The celebration will be under the auspices of the Oregon Pioneer association, and the Oregon Historical society. P. H. D'Arcy, past president of the Oregon Pioneer Association will be president of the day, and George H. Himes, curator and assistant secretary of the Oregon Historical society, compose the committee in charge of the Memorial park, on behalf of the state of Oregon.

The steamer, Lurline, has been chartered for the excursion to Champoeg, and will leave the foot of Alder street, Portland, at 7 o'clock a. m., and arrive at Oregon City at 8:15. No stops above Oregon City except at Wilsonville will be made. Arrangements have been made with the tenders of the Morrison and Madison bridges, to open the draws when called for by the steamer whistle, thus enabling the excursion to start promptly at the hour named with the hope of arriving at Champoeg at 12 o'clock.

The days program at the grounds will comprise basket dinner, songs, and brief remarks by past presidents. Memorial services will be held in honor of ex-governor, T. T. Geer, past president of the Oregon Pioneer Association.

LEGION TO NAME REPRESENTATIVES TO STATE MEET

Nomination of delegates to the state convention of the American Legion in Portland this summer will be a feature of the meeting of Lane county Post No. 3 of the Legion on Thursday evening in the Chamber of Commerce rooms. Initiation of a number of new members of the post will also have a prominent part in the program, it was announced today.

Committees will be appointed to look after the big-top circus to be brought here by the Legion post during the latter part of May, a rifle team will be organized from among the post members, and a program of boxing, wrestling, tumbling and music will be carried out.

Men who served in the navy during the World war will have charge of the program of entertainment, and a navy bean "feed" will be given during the course of events.

CASTLE—"Don't Doubt Your Husband."
REX—"The Last Hour."

Heilig Offering New Morton Organ For First Time

A specially prepared concert for the opening of the Heilig's new silver-toned Robert Morton orchestral organ has been prepared by Elbert Lachele for this evening. The program has been arranged to please an audience that appreciates the finer class of music, and those who will enjoy the late popular selections. The concert will be 15 minutes in length and will be played immediately after the feature picture, 8:50 p. m. The program is as follows:

Overture, "Poet and Peasant". Suppe
Medley of Old Standbys. Elbert Lachele
"March Militaire" .. Franz Schubert
Collection of Popular Hits.

To Repeat "Broken Blossoms."

After carefully looking over the field of pictures available to find one that would be suitable for the opening of the organ, the management has chosen D. W. Griffith's "Broken Blossoms" for a return engagement.

Miss Dana's New Film Scores Hit

Viola Dana has never had a more delightful starring vehicle than "Don't Doubt Your Husband," the new Metro picture that opened this afternoon at the Castle theatre for a run of two days.

Everyone who's married or who thinks of getting married should see this merry satire on the suspicious wife who is always leaping at conclusions and keeping the matrimonial nest in a turmoil. It's clean, wholesome fun, spiced with the paprika of smartness and sizzling with tense situations.

Miss Dana, as the pretty little suburban wife, whose intensity of affection for her husband takes the form of wanting to supervise all of his actions, never looked more beautiful in her array of chic, fashionable gowns, and never romped through a role with more fascinating humor.

Sills Picture Is Called Masterpiece

Milton Sills and Carmel Myers are heading the cast of "The Last Hour" which is playing today and Tuesday at the Rex.

New York reviewers called this picture one of the few screen masterpieces of the year: It is a story of regeneration, sacrifice and love.

"The Last Hour" answers this question in the only way it can be answered. It contains several thrills which are hair-raisers according to advance reports. However, critics have been unanimous in according to "The Last Hour" the most logical continuity of any picture these last several years. The thrills are a necessary part of the story—to leave them out would be to destroy the story itself. In many cases a story which does not depend for its strength upon "punch" scenes is filled with obvious mechanical "thrillers" just to "put the picture over."

MERVIN PETERS

Cottage Grove, Ore., April 21.—Mervin Peters who died Saturday, April 19, at the Mercy hospital in Eugene, was born in Manitoba, Canada, May 10, 1904. He would have been 20 years old had he lived until May 10 of this year. He leaves a brother, Lee Peters of Cottage Grove and another brother in Eugene. The funeral was today at 2 p. m. from the Mills chapel, Rev. A. J. Adams officiating. Burial was in the I. O. O. F. and Masonic cemetery of Cottage Grove.

SPEAKER TALKS ON CHRISTIAN SCIENCE

Following is a lecture on Christian Science that was given last Friday night at the armory:

A LECTURE

ON CHRISTIAN SCIENCE THE RELIGION OF RIGHT RESISTANCE.
By JOHN C. LATHROP, C. S. B.
(Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.)

General Foch of France said, "A battle won is a battle in which one will not own one's self beaten." Ruskin wrote, "When the heart sinks, the boat sinks." Persistance in right will move mountains. Right control, right resistance, and persistance will master all things. This pathway of life is the pathway of true common sense, and true common sense is the sense common to God and His man. It is the sense that will become more and more common as men grow more and more in spiritual understanding; it is the sense that makes a man the master of himself and of all circumstances.

I ask you: Is it common sense to obey the beliefs of fear, superstition, and ignorance, which result in disease, discord, and death? Is it common sense to believe that the earth is flat or that the sun revolves around it just because the sense of sight so testifies? Would it be common sense to believe that the clock in your room is not ticking plainly because your ears do not always hear it? Or would it be common sense to say you are not wearing clothes because you do not always feel them on you? Is it common sense to walk by sight and not by faith as Paul admonished, or is it common sense to give up solving any big problem just because the material senses do not comprehend it? Then neither is it common sense to accept the material testimony about disease and pain just because the lying material senses say there is life and sensation in matter. Can mindless matter feel pain, or is it thought that feels it? If it is not the thought, then why do doctors stupefy the thought with an opiate to lessen the pain?

The question of healing disease or sin is, as Mrs. Eddy sums it up, the question of the correct government of the body. It is the great question of control or right resistance. Shall the material body control man, or shall man govern and control the body and all its beliefs? This virtually means: Shall man control matter, or shall inert and mindless matter control man? You see a snake in a dream; but when you wake up and see only a table, the snake ceases to alarm you. It is just so with the beliefs about matter and the material body. We should wake to see the real man, and we should awake now.

Christian Science is becoming universally accepted, and is doing its great healing and redemptive work because of its correct teaching about God and man. Christian Science awakens the thought to understand a God who is ever present, practical, and provable, and to a man who is obedient to God's nature and government, a man who is like his creator—in other words, who reflects God. God and man are shown to be not corporeal, limited, and erring, but are proved to be spiritual, eternal, loving, vital, active, and to be so here and now. God is Spirit, All-in-all, the one Father-Mother Mind, the one and only creator or parent of man, who is God's spiritual idea, the perfect likeness or child of God.

Having shown that thoughts are things, and that matter is mindless, harmless, and unreal, Christian Science takes the next step and shows that there is a right thought resistance and a wrong thought resistance, a right control, and a thought control which is decidedly evil and harmful. It shows that resistance, to be corrective and healing, must have behind it the unlimited power of the divine Mind, and not have behind it the limited influence of the so-called material mind or human will. The human will, based on the belief that life, substance, and intelligence are in matter, is selfish, blind, aggressive, and is capable of doing all evil. Such thoughts are the very opposite of the unselfish and pure thoughts of Truth, Life, and Love.

Christian Science shows that the sick and the sinner cannot be really healed by superficial methods, and therein it proves its great mission and vitality. It proves that faith in material methods merely lulls to sleep or covers over the underlying error. This error is always mental, and while it may be temporarily quieted, it is not destroyed until the false sense of life and pleasure in matter is overcome. Then the liability of repetition or relapse of the error is removed. This is how Christian Science proves itself to be the Holy Comforter or Spirit of truth foretold by Jesus, by holding out the hand of complete hope and healing to all sufferers, including those who are said to be beyond the power of material means.

The spiritual understanding of how rightly to resist ignorance, fear, and sin will prevent such thoughts taking effect as sickness, sin, and death. This spiritual understanding, which all may acquire through the study of Christian Science, is not a blind faith in the intervention of a personal God, but quite the opposite: it is bringing thought into harmony with God, the divine Mind: it is the understanding that all disease and sin are nothing more than the false beliefs of life and intelligence in matter, which right thoughts about God and man will rightly resist and destroy. Such resistance is claiming man's spiritual oneness with God, with all the harmony and happiness this includes, and such claiming is true believing which successfully resist evil and disease, and which constitutes true prayer to God.

Prevention of fear is one of the chief functions of Christian Science, and its complete success in this would alone justify its holy mission.

Fear of disease of all kinds, fear of loss and poverty, fear of accident and suffering, fear of sin and fear of death, all fear, is the effect of a false belief of life, substance, and intelligence in matter. Change these thoughts with the ideas of Truth and Love, as taught in Christian Science, and you prevent and destroy the fear. Every one can master fear, ignorance, and sin, but to do this requires much more than blind faith, will-power, or suggestion. It requires an understanding of God, and of man as made in His likeness.

My friends, posterity will judge Mary Baker Eddy by her works,—the millions of healed and benefited lives resulting from her discovery and labors. Mrs. Eddy was unselfish and consecrated beyond what the world knew. The members of her household will all attest the fact. Night and day the year around for fifty years she was at her post watching and working for you and for me. All will admit that it must have required rare virtues to carry on this Cause through years of darkness, and finally with God's help to bring it into the light.

Christian Science has come to show that Jesus' promises must be fulfilled; that his rules and commands cannot be escaped. Excuse, evasion, procrastination, pride, ingratitude, fear, or ignorance will never get a man into heavenly harmony, for "whatsoever a man soweth, that shall he also reap."

GLOBE NOTES.

Globe, April 19.—The school at Globe closed Friday. A picnic dinner on the school grounds was well attended. Chas. and Joe Fowler, Warren Surcamp and Louie Porter of Alma were the only men present. After dinner the women and children overlooked the building of a bridge across the Wildcat just below the school house.

Walter Lyons has finished his logging here on the Meredeth timber, and is putting in planking on the truck road he is building to tap the timber bought of Mr. Atkinson.

Mr. Oglesby and wife are in again for a few days.

The Adams family, late of Eugene, have their new house so far completed that they have moved in, and are making garden. Friends and relatives had intended to give them a house warming party, but the weather, of late has been better fitted for home staying than for outings or other sports.

Gardens here are looking well. Hardy, early planted stuff looks especially well for the season. More berries, especially strawberries, are being planted here than ever before.

The Oglesbys gave a dinner April 17 to celebrate the second birthday of their niece, little Mary Eleanor Whittaker.

108 PHEASANT EGGS HATCHED AT STATE GAME FARM HERE

One hundred and eight Chinese pheasant eggs hatched Saturday and Sunday at the state game farm northeast of Eugene. One hundred and twenty more eggs are due to hatch Thursday, and from then on other hatchings will be under way every day, according to Lawrence Demogloski, superintendent of the farm.

Every day now a dozen Rhode Island Red hens are being set with 20 pheasant eggs each, and during May 18 hens will be set daily.

Practically 20,000 eggs will be set this year at the state game farm, unless some of the eggs are sold by the state game commission. At any rate, there will be fully 15,000 eggs set, according to plans now being made at the farm.

Last year there were 10,363 pheasants liberated. This year it begins to look as though the record would be doubled.

On Sunday there were 250 Chinese pheasants collected, and from now on the laying is expected to increase daily. The peak of the laying season will be reached in May, it is believed.

The imported Chinese pheasant hens, brought direct from China this winter, are laying a few eggs now.

So far there have been 2,500 eggs set, and at the rate things are going now another 2,500 or more will be set by the end of the month. During May more than 10,000 eggs will be set, according to the plans of Mr. Demogloski.

The first of the fluffy, striped little pheasant chicks will be placed in brood coops on Tuesday, and in about three weeks will be put in the big pens.

The state game farm is beginning to present a busy appearance, with activities just commencing for the summer's work.
