Trim your hedges and get your parkings and lawns in ship-shape order or the tourist passing through Eugene this summer won't get the impression of your home that you want him to get. This is the first suggestion given out this morning by the committee from the Eugene Federation of Women's Organizations which today started its campaign for a city beautification. From day to day, other suggestions will be offered and when put all together at the end of the week, they will constitute an educational program pertaining to everything that may be beautified on the outside of the home.
The traveler through the city sees parkings, lawns and hedges, if there are any, first, the committee says, and forms his opinion of a city from these. So that is why this particular phase of beautification is placed at the top in the series of steps to be taken from day to day.
In preparation for the city's clean-up campaign, decreed each year by the city officials, it is also suggested that all refuse stored away in enclosures like the garage or house be cleaned out and saw in barrels or sacks in readiness for the trip to the city dumping grounds which is scheduled for this week.
