TODAY —Sky Rockets Now —1,600,000,000 Years —Clothes, \$900 a Month

By ARTHUR BRISBANE (Copyright, 1924, by Star Company) Wall street buys and sells two million shares a day now, and nobody notices it. We quickly get used to prosperity. Brokers would consider a "million share day" an insult. But call money with which lumps gambled went to five and a half per cent yesterday. A few days ago it was two and a half. Wall street does notice that it's rather hard to pay for gambling money as high an interest rate as merchants and manufacturers have to pay for legitimate business loans. The real stock gambling will begin early in this new year. Then look out for skyrocketing, to be followed by some falls that will humpty the speculators know just how Humpty-Dumpty felt. Senator Underwood, and others
