Members of the city council were approached yesterday by A. Sawyer, representing the state highway commission who inquired as to the city's financial ability to pay its proportionate share of the paving through the city. He also stated that the commission desires to pave through Harrisburg and also from Junction City to the bridge approach as soon as possible. When Mr. Sawyer heard that Harrisburg would pay their share the commission would advertise for bids to do the paving at the meeting next month. It had been previously intimated that the commission would do the surveying for a nominal sum if the city was to pave third street its full width. Recorder Wadsworth referring to this, Mr. Sawyer now states that estimates will be furnished for the 18-foot strip and for the balance of the street as well. He expects the paving used will be concrete and that the 18-foot strip will be eight inches thick but six inches will be sufficient thickness for the balance of the streets width.
