New trials were immediately requested, and Judge Carpenter set February 4 for hearing the plea. Sentence was reserved pending disposal of the motion. The maximum penalty is two years' imprisonment and a \$10,000 fine or either. The jury interrupted its consideration of a verdict at the end of four hours to ask the court concerning its right to consider overt acts committed beyond the jurisdiction of the trial and was informed that the verdict must be confined to acts within the jurisdiction of the court. The principal overt act charged by the prosecution to have been committed in this district was the alleged payment of \$5,000 cash to Forbes by Elias H. Mortimer, chief prosecution witness, in a hotel here June 20, 1922. Mortimer says he paid this money as Thompson's agent.

State authorities are careful to limit the certification to those who desire that their pupils receive credit from public educational institutions for work done under private instruction. Opportunities for favoritism and exercise of political influence. It has never been made mandatory that every teacher giving music instruction for a fee shall be certified by some central authority. EXPERIMENTS WITH SERUM SUCCESS IN HARD FEVER CASES

CHICAGO, Jan. 31.—(AP)—Successful results with severe and complicated cases of scarlet fever as indicated in a dispatch from Hartford, Conn., Thursday night, have been obtained by the use of the Dochez serum, the American Medical association announced today.

The serum used was that of Dr. Alphonse H. Dochez, a well known medical investigator in New York City, formerly of the staff of the Rockefeller institute for medical research, who isolated the specific scarlet fever organism a year and a half ago. Dr. Dochez was born in San Francisco.

Presumably a strong serum was used in the cases reported, according to Dr. Fishbein, whose records showed that while the general death rate among children afflicted with scarlet fever is from 6 to 8 per cent, in the complicated cases the death rate is as high as 18 per cent, while the cases observed by Dr. Blake there was only one death in a total of 28 cases with complication and that death occurred among the 19 patients who were not treated until after the fourth day.
