by Peggy Paige

The Gode, one of Fashion's newest pets, which she introduced to critical society last Fall, met with such wide-spread popularity that it is still with us this season in new and even more alluring form.

There are circular godets, pleated godets, godet insets of new box pleats, godets of colorful prints and gay contrasting color—all adding their graceful touch of fullness to the short and slender frock.

If you will be among the fashionables this Spring—see that in the slenderest of your gowns, somewhere, there's-furking attractive godets.
