

# CONVENTION PLAN, DEFEATED ONCE, IS PASSED BY HOUSE

STATE HOUSE, SALEM, Ore., Feb. 25.—During a lull in the storm after taxation measures in the house yesterday afternoon, house bill 422, defeated last Saturday, was re-introduced and passed.

The measure, introduced by the Oregon county delegation provides for the election of two precinct committeemen instead of one in precincts of counties other than Multnomah.

It is a virtually pre-primary county convention scheme, providing for the drawing up and laying down of party platforms and the selection of candidates.

Representative Cowgill explained that the bill did not interfere with the present primary law and that the precincts of the country were as one in determining its passage.

In a lengthy list of house bills passed by the senate were all the principal appropriation bills of the session, aggregating \$4,225,392.24.

The largest appropriation item was that of \$3,072,717 for the regular state institutions located at Salem, Troutdale, Roseburg, and the blind school in Portland, which were embodied in one bill and totaled \$3,072,717.

The quarter mill road tax was repealed.

The bills for repealing half of the millage tax under the bonus and loan act, amounting to half a mill or about \$115,000 for the biennium passed. Some bills killed bills to increase the salary of the state superintendent of schools and the state dairy and food commissioner.

Among bills passed by the senate were:

H. R. 238, game code amendment, making open season on birds and deer uniform throughout state; changing opening of deer season from August 15 to September 15 etc., reducing bag limit on birds.

There will be no legislation at this session to strengthen the blue sky law. The senate yesterday killed by a majority vote the Bailey bill, which was prepared by Oswald West and several days ago the Joseph bill was killed. The Joseph bill had the support of W. E. Crews, state corporation commissioner. Senate bill 191 which proposed an appropriation of \$125,000 for the establishment of 20 branch normal schools in the state was defeated in the senate.

Senate bill 48, providing for the appointment of two high school inspectors and senate bill 193 providing for teacher training centers in 10 Oregon high schools was killed.

## Glands need Glands

Feed them extracts from glands

One of the greatest discoveries in modern medicine is how to make glands active. It is done by extracts and secretions from like glands. New-day science is doing wonders in that way.

The liver is our largest, most important gland. We have learned that drugs do not affect it. But ox gall does. So we are now getting through the liver results we never knew before.

Poisons in the Blood

Torpid liver means to most people merely constipation. But it really brings a vast percentage of our troubles.

The liver supplies bile—a quart a day when normal. That bile checks germs in the intestines. When that bile is scant, the germs breed unmolessted. And they feed a constant stream of poisons to the blood.

Some results appear quickly—bad complexion, dull eyes, pimples, falling hair. But there are greater results, and some are disastrous.

These poisons may cause heart and kidney troubles, high blood pressure, premature old age. And the only way to stop those troubles is to check the poisons.

See How Things Change

See how ox gall changes things. Results start in 24 hours. In a few days it may bring results which may change your entire life. You may find that this is all you need.

But get genuine ox gall. It comes in tablets called Dioxol. Your druggist can supply them. Each tablet is guaranteed to supply ten drops of purified ox gall. You get the full effects.

Remember the name—Dioxol. Use it now. Let it correct whatever troubles it can end. To many it means priceless help, which no drug method can attain.

Guarantee: Anyone not satisfied with results from the first box of Dioxol may return the empty box to the makers and receive his money back.
