

CITIZENSHIPS ARE DENIED BECAUSE OF LAW CONFLICT

LONDON, Feb. 25.—(AP)—There is a steadily growing group of women living in England who are women without countries. They are former English women whom their government disowns on their marriage to a citizen of the United States and whom the United States refuses to recognize as citizens since the enactment of the bill forcing women marrying Americans to retain their foreign citizenship unless naturalized in America.

At the time the bill was enacted the number of English women married to Americans in England was very small and little notice was taken of the hardship forced upon them. Now there are nationally outcast women in England numbering about 5000 and their predicament is constantly being brought to the notice of the United States consular authorities in England.

Passports Denied

Neither the government nor the consuls will grant passports to these women although requests are made daily for this privilege. The British government according to their law, believes that the woman becomes an American citizen on marriage and therefore refuses passport facilities. The American consuls have relented to the extent of issuing letters explaining that the person cited is married to an American and although technically not an American citizen, requesting that passport privileges be granted. The consuls refuse to accept any responsibility, however, and it is entirely on the suffrage of foreign governments that these women are allowed to enter foreign countries. The letter is required to be used as a passport, but even despite this precaution, many holders have been refused admission to European countries, particularly in the Balkan states.

Laws Left Unchanged

Several attempts to have the matter satisfactorily settled have been made by Anglo-American organizations in England but just now there is no disposition on the part of either government to change the existing laws. The last English government considered the question and went so far as to agree to place the matter before parliament, but the present conservative government is not taking any steps in that direction.

Most of the women affected have no opportunity of residing in the United States for the year required to obtain American citizenship and it is for this class that an appeal will shortly be made by an American women's organization in London to the American government to modify the existing law so as to allow a "declaration of intent" to be substituted for the residential period in America.

The number of these women without a country is increasing at the rate of about 500 a year.

Revival Meetings Declared Obsolete By Omaha Pastor

ST. PAUL, Feb. 25.—Revival meetings are obsolete and new methods are needed to draw converts to the church, Reverend J. E. Wagner of Omaha, told the St. Paul regional council of cities, in an address today.

"The camp meeting was an invention to meet the needs of that day," Rev. Wagner said, "but it has served its day and now has a place in history."

"That was the day of the torch-light parades in politics, the day of mass meetings for every cause. And that day has passed. As our fathers invented expedients, methods, machinery for their day, their sons must invent such as will serve their day."

N. C. O. Railway Files Petition to Intervene in Case

SALEM, Ore., Feb. 24.—The Northern-California-Oregon railway has filed a petition for leave to intervene in the case now before the interstate commerce commission involving the railroad extension in Oregon. This was announced today at the office of the Oregon public service commission.

New Snow Melting Machine is Tried

VIENNA, Feb. 25.—A new development snow melting machine was brought into action here to cope with the snowfall of the last 48 hours.

The snow is pushed into piles by automobile plows and then shoveled into large wheeled basins against the side of which steam jets are projected. By this means 1,250 cubic feet are melted hourly.

Grandmother Shot By Boy of 11 Years

NAPA, Cal., Feb. 25.—Playing hunting with animals, Adolph Slatt, 11 years old, shot and killed his grandmother, Mrs. Ella Holliday, last night, according to the sheriff's office today.

The boy with two younger brothers armed himself with a rifle supposed to be unloaded and ran to the door of his grandmother's room. He fired the "wild animal" when Mrs. Holliday attempted to take the rifle from him, it was discharged, the bullet striking her in the head.

THE WAY THE AIR SERVICE ACTS

Ships no Match for Air Warriors, Declares General Mitchell When He Gives Testimony at Washington

U.S.S. VIRGINIA

1100 LB BOMB FINDS ITS MARK

JUST BEFORE TURNING OVER

GOING DOWN

This is what would have happened to the Washington if the navy had not interfered, according to statements of General Mitchell of the air service. It shows the U. S. S. Virginia being sent to the bottom and is held as a proof by the air service that ships can not withstand an aerial attack.

Attempt to Discredit Air Service Worth is Charged

By LARRY BOARDMAN (Navy Service Writer)

WASHINGTON, Feb. 25.—Failure of the navy to sink the battleship Washington by aerial bombing was an attempt to discredit the effectiveness of air attack.

This is the statement of General Mitchell, army air service chief of staff.

Mitchell declared that the navy could have sunk the Washington from the air with greatest ease, but that this was not done because the navy wanted to build a barrier in the way of replacement of battleships by airplanes.

Light Is Shed

Students of aeronautics state that if this be true it sheds light through the folds of mystery which have so far been draped around the episode.

After every effort to save the newly-built Washington had failed, she was towed off the Virginia coast to be offered as a sacrifice to the disarmament pact. The navy was executioner and navy aviators were assigned to administer the death blow.

But the Washington refused to die. Day after day she rode the waves as the navy flyers peppered her with bombs.

At last, after the aviators had failed, she was sent to the bottom by big guns. The point was apparently proven that aircraft are ineffective against modern battleship construction.

But no report on the sinking was ever given out. No pictures were made public. It was impossible to find out what type or size of bombs were used, what hits had been made. All information was withheld on the ground that it was confidential. Even army air service officials failed to get the details. The whole affair was an official navy secret.

This made students of aeronautics skeptical.

Mitchell Tells Why

General Mitchell declares: "No ship that has ever been built or ever will be built can stand up under a real air attack. Any ship can be sunk from the air in a few minutes."

"If a 500-pound bomb won't do the job, an 1100 pound bomb—or a 2000-pound bomb, or a 4000-pound bomb. There's no limit to the size that can be used."

"And if one bomb won't do it, two or three or four of them will. There's no limit to the number that can be used."

The navy didn't sink the Washington by air attack because the navy didn't want to sink her by air attack.

"But the navy was anxious to discredit aerial bombing because the navy doesn't want to see battleships displaced by airplanes."

Battleship Doomed

"The days of the battleship are over. Other nations recognize the fact. The two new English battleships, Rodney and Nelson, are nothing but armed airplane carriers."

"But the navy does not want to admit this. It wants to prolong the battleship tradition. For this reason it tried to establish the false impression that a modern battleship can withstand aerial bombing."

"Army air service has proven what can be done by tests on four battleships—Outfriedland, Alabama, New Jersey and Virginia."

Two Sunk at Once

"The New Jersey and Virginia were sunk at the same time. First we struck the New Jersey and she started sinking slowly. While she was going down we sunk the Virginia in four minutes. Then we went back and polished off the Jersey."

Leopard Skins are In Great Demand

LONDON, Feb. 25.—Leopard skins, with all the tinge of the jungle, but which come from the textile district of Lancashire, are in such demand this spring for afternoon gowns, dress trimmings and coat linings that the mills are unable to keep pace with the rage.

Leopard velvet is the name of the "leopard skin" in trade circles, but in the shops it is "leopard skin" and nothing else.

Many Applications For Bonus Received

WASHINGTON, Feb. 25.—Major applications for the bonus were received today at the War Department.

Acid in Stomach Sours the Food

A well-known authority states that stomach trouble and indigestion are nearly always due to acidity—acid stomach—and not, as most folks believe, from a lack of digestive juices. He states that an excess of hydrochloric acid in the stomach retards digestion and starts food fermentation; then our meals sour like garbage in a can, forming acid fluids and gases, which inflate the stomach like a toy balloon. We then get that heavy feeling in the chest, we eructate sour food, belch gas, or have heartburn, flatulence, water-brash or nausea.

He tells us to lay aside all digestive aids and instead get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast while it is effervescent, and furthermore, to continue this for one week. While relief often follows the first dose, it is important to neutralize the acidity, remove the gas-making mass, start the liver, stimulate the kidneys and thus promote a free flow of pure digestive juices.

Jad Salts is inexpensive, and is made from the seed of grapes and lemon juice, combined with lithia and sodium phosphate. This harmless salt is used by thousands of stomach sufferers with excellent results.

Common Household Medicines

Otherwise known as "simples" have for centuries been derived from medicinal roots and herbs. They are still used and recognized by many of our best physicians in many countries, roots and herbs are cultivated purely for commercial purposes. It is said that the Lydia E. Pinkham Medicine Co., Lynn, Mass., is the greatest user of crude herbs in this country. The success of their Vegetable Compound for ailments of women is now world-wide, and it will certainly pay any woman who suffers from any ailment peculiar to her sex to try it.

GUIDE FOR LAZY PEOPLE PROVIDED

WASHINGTON, Feb. 25.—(AP)—A guide by which people can figure out just what motions are effort-saving and what postures will tire them least is provided by a report by Dr. Francis G. Benedict, director of the Carnegie Institution's nutrition laboratory.

By a series of tests conducted at the laboratory in Boston and described by Dr. Benedict in a communication to institution headquarters here, the amount of energy required for various motions of the body has been determined on the basis of the amount of heat each produces.

The corner loafer, Dr. Benedict says, might better stay at home in bed, since it costs 10 per cent more energy to stand up than to lie down.

"The heat produced in 24 hours in a human body," the report continues, "is made up, first, of an irreducible minimum going on all the time to maintain the fires of life at a normal rate, when in complete repose in bed. To sit quietly in a chair calls for practically no increase, but there is an increase of 10 per cent when standing."

"Changes in posture make a great difference. Some persons actually require 40 per cent more energy to stand than to lie, but the best and most comfortable posture, with a minimum of sway or balancing, such as would be assumed by an artist's model, results in the smallest increase of heat. Evidently skill is required to learn how to stand easily and most effectively."

"Many small movements may be expressed in heat units. If when lying one brings the hand to the forehead and back, as in a military salute, one such movement each minute actually raises the heat output about 1 per cent and with delicate new instruments this increase can be accurately measured. Crossing or uncrossing the legs while lying increases the heat output five times more than moving the arm."

"From this one can easily see that every little movement has a calorie of its own until, when working to the limit of human endurance, a man may increase his normal heat output 1000 per cent."

Business Block at Springfield Sold; \$10,000 Involved

SPRINGFIELD, Feb. 25.—(Special)—A two-story brick and concrete-reinforced building with 24-foot frontage between Third and Fourth streets on the north side of Main street owned by the Eugene Bible university was sold this morning to Mrs. Charlotte Donnelly, of Eugene, but mother for the University of Oregon Y. M. C. A. No consideration has been given, but \$10,000 has been mentioned by Springfield business men in connection with the deal. The building at present houses Hall's Cash store, with insurance offices and beauty parlor occupying the second floor rooms.

Negotiations for the building have been under way for some time, but the papers were not made out until this morning. Dr. E. C. Sanderson, president of the Bible university, represented the Bible university in the deal.

The A. F. Flowers Realty company will move on Monday from offices at the corner of Fifth and Main streets owned by the First National bank, to offices in the Donnelly building, formerly occupied by the company.

French Aviators Reported Missing

PARIS, Feb. 25.—(AP)—The French aviators, Captain Lemaitre and Lieutenant Arcaud, who early this month made a long non-stop flight from France to the Rio Oro, in an attempt to reach Dakar in the French Senegal without a stop, have been missing in the desert of Sahara since February 20, it became known today.

The two aviators left Timbuctoo last Friday flying north in an attempt to reach Oran or Algiers and have not been heard from since.

King George is Reported Better

LONDON, Feb. 25.—(AP)—The improvement in King George's condition continues. No bulletin was issued this morning by the physicians. In fact they have not considered it necessary to give out a formal statement on his illness since Sunday night, when they made their announcement that they had advised his proceeding to the south of Europe for a cruise on his yacht after reaching the stage of convalescence from his attack of influenza.

RUSSIA HAS NEW BEE

BRILJIN, Feb. 25.—(AP)—Professor Moschulowich of Moscow, is reported to have bred a new type of bee which is a cross between a mother bee and a working bee. This bee, upon the development of which the Russian scientist is said to have been working for over a year, has the ovaries of the mother bee fully developed and also the wax glands of the working bee. The professor believes it may be of great value in bee culture.

Liverpool, Eng., is the greatest timber market in the world.

ECZEMA

You will be compelled to admit that the results of S.S.S. are really amazing!

Many people imagine that eczema or tetter needs only some external application on the skin in order to get relief. This is because the attention of the sufferer is so violently directed to the intense burning and itching which accompanies this disease. Try as they may—permanent relief will never be theirs until the diseased lacer blood is thoroughly cleaned.

We know there is one thing that stops eczema and that is more red-blood-cells! S.S.S. builds them by the million! You can increase your red-blood-cells to the point where it is practically impossible for eczema to exist. We know that as blood-cells increase in number, blood impurities vanish! We also know that night follows day. Both are facts! But have you, eczema sufferers, ever actually taken advantage of this wonderful fact? Thousands just like you have never thought about it. Skin eruptions, eczema, with all its fiery, skin digging torture, and its scabbing, unrelenting itching, pimples, blackheads and boils, they all pack up and go, when the tide of blood-cells begins to roll in! Blood-cells are the fighting giants of Nature! S.S.S. builds them by the million! It has been doing it since 1825.

S.S.S. is one of the greatest blood-cell builders, blood-cleansers and body strengtheners known to us mortals! When you put these facts together, then to continue to have eczema and skin eruptions is like a man fighting a disease, eczema, with all its fiery, skin digging torture, and its scabbing, unrelenting itching, pimples, blackheads and boils, they all pack up and go, when the tide of blood-cells begins to roll in! Blood-cells are the fighting giants of Nature! S.S.S. builds them by the million! It has been doing it since 1825.

S.S.S. is sold at all good drug stores in two sizes. The larger size is more economical.

Church Begun 250 Years Ago May be Completed Soon

PARIS, Feb. 25.—(AP)—A Paris church begun over 250 years ago, but never finished, has at last a chance of being completed after the original plans. Between 1650 and 1700 work was begun on the church of Saint Nicholas du Chardonnet, in St. Victor street, with the painter Le Brun as architect. Want of funds put a stop to building and the church, without a front, has stood for years, a mournful and dilapidated object.

A mutual benefit society now plans to erect a magnificent office just opposite the church, but hesitates as the old building would be an eyesore. Completion of Le Brun's plans would cost 300,000 francs, but the municipal council, although more than usually embarrassed for funds, has the matter under consideration.

Minister Resigns To Make Study of World's Marriages

OAKLAND, Cal., Feb. 25.—(AP)—Dr. Albert Ehrhott, pastor of the Thousand Oaks Baptist church, near here, has resigned to make a world-wide investigation of the church here. In a statement to the church he said: "I have had an increasing passion to make a modest contribution toward the Christianizing of marriage and the home. With this in mind, I plan an early and extended tour. This will take me to distant lands and make me stay away quite indefinitely."

Dr. Ehrhott urges a more intelligent and sympathetic preparation for marriage.

"Young people are too superficial in their judgments," he explained. "Love is the only excuse for marriage. What is love? The answer is that when two young people are genuinely in love they don't go around asking what love is. They know it instinctively. They hear the same song heard singing their love song, but unfortunately, many make the mistake of listening to a mocking bird echoing the songs of some one else."

Animal Lovers Unite in Efforts To Abolish Traps

WASHINGTON, Feb. 25.—(AP)—A three-year campaign before state legislatures, with the backing of prominent humanitarians and humane workers, is about to be launched for the suppression of the steel trap and other non-killing devices for capture of fur-bearing animals.

The American Humane association leads the list of organizations supporting the movement, and Mrs. Min-

An Old Recipe To Darken Hair

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome.

Nowadays we simply ask at any drug store for "Wyneth's Sage and Sulphur Compound." You will get a large bottle of this old-time recipe improved by the addition of other ingredients, at very little cost. Everybody uses this preparation now, because no one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears and after another application or two, your hair becomes beautifully dark, thick and glossy and you look years younger.

Before you Build, Buy or Rent, get "The Electrical Flow" for Household. This Booklet is free from any contractor or retailer who displays this seal

Pop Bottle Takes Long Water Journey

LONDON, Feb. 25.—Donald McElhinney, 15-year-old high school boy here, has received a letter informing him that a pop bottle, in which he placed his name and address two years ago at Windsor, Ont., was picked up by a sailor off the coast of Santa Barbara, Cal.

Presumably it went out through the lakes and St. Lawrence route to the Atlantic ocean, and then followed the coast line southward, probably passing through the Panama Canal into the Pacific waters. It then appears to have started northward, to be picked up on February 10, by J. W. Hegarty, of the U. S. S. Tennessee.

Neuralgic headaches

Sloan's gives quick, positive relief

That unendurable pounding in your temples that makes neuralgic headache so hard to bear yields quickly to treatment with Sloan's.

It stimulates the circulation throughout the aching tissues. Immediately the throbbing eases down. Soon you find that the pain is gone. The liniment does not even have to bother to rub it in.

Call or write for my FREE book on Piles and other Rectal and Colon disorders.
