

GULBRANSEN

The Registering Piano

The Registering Piano

The Gulbransen Registering Piano of today is the world's latest achievement in musical instruments. It stands absolutely alone in the artistic results it produces and the ease with which they are obtained. It is played by music roll and pedal, as are other instruments of its type, but there the similarity ends. The Gulbransen registers one's exact "touch" on each note. It can be played with all the feeling, the life, the delicacy of the very finest piano music ever listened to. Because these are facts, we are insistent that the Gulbransen be not confused with other instruments of the same type. We challenge investigation of it as an Easy-to-Play Registering Piano that registers your exact touch, that registers your time, that registers your expression.

AN INVESTMENT IN GOOD APPEARANCE

The Last Ten Dollars

IT'S the last ten dollars you pay for your clothes which decide whether they are "just clothes" or a "real investment."

A \$35 suit is worth, presumably, at least \$35. But a \$45 suit, or a \$55 one, is actually worth considerably more than the extra ten or twenty dollars.

Because of better shrinking of the cloth, better linings and trimmings, better tailoring and more hand operations

Do You Scowl When You Read or Use Your Eyes at Other Concentrated Tasks?

If you do, chances are a thousand to one you need glasses.

You should be able to read ordinary fine print with perfect comfort at a distance of fourteen inches, if your eyesight is all that is should be, and if you read comfortably you will not scowl.

Scowling is a danger signal that should be heeded.
