

LARAWAY'S

Real Music—"As You Like It"

Do your own playing! It's so much more fun than to have others do it for you. To go to your Gulbransen—and actually play—gives you a real sense of accomplishment. It interests—satisfies! It is one of the most delightful experiences imaginable!

Delightful because Gulbransen music is so expressive! So full of feeling—so full of life—you take a personal pride in producing it!

Accented, for instance. That's important! For in any piece you play there's a strain of "melody" you must pick out and accent properly, to give it a pleasing rendition. But, where are the melody notes? In what part of the keyboard do they occur? With the ordinary player-piano that's a real problem. But by observing the Melody Indicator—a simple and convenient little patented guide—you know where the melody notes are, and just where to accent them, on the Gulbransen!

that one man and two children had already been burned to death in the little town of Tutbill, S. D. Tutbill is in Bennett county. This town, advisers said, had been completely destroyed. Reports from the burned over area are very meager, but it is known that one large ranch has been completely burned out. The sky to the north was red with the reflection of the flames. The wind last night attained a velocity of 40 miles an hour and all forests today has been blowing a 27 mile an hour gale. Small success has so far been obtained in checking the flames, advisers said. Backfires have been started and are proving to be the most effective method of fighting the flames. No moisture has fallen in this region for several weeks, a condition that is aiding the progress of the fire. The front of the fire last night is known to have extended from White River, S. D., to Nerriman, Neb., a distance of approximately 50 miles. Extensive precautions are now being taken to keep the sparks away from Valentine, although a lake fortunately is in the path of the flames.
