Why Spring Brings Out Freckles and Eruptions.

The sudden appearance of freckles, slight eruptions or fine lines at this season is attributed by scientists to the "actinic ray," which is unusually active during the spring months. Where the skin is so affected by this influence, it may be procured an ounce of ordinary mercialized wax at any drug store, apply a little of it before retiring, like cold cream, the trouble can easily be overcome. When the wax is washed off next morning, minute flaky skin particles come with it. The entire outer cuticle soon is removed in this way, with all its defects. No bleach could so effectively remove freckles, moth patches, liver spots, pimples, or other cutaneous blemishes. The new surface is smooth, clear, fresh looking, youthful. No harm or inconvenience accompanies this simple treatment.

LOCAL MAN NAMED BY FRUIT GROWERS

E. B. Chase of Eugene was elected vice-president of the Lane County Horticulturists' association at its meeting in Eugene Saturday afternoon, and George Davis of Springfield, C. E. Stewart of Cottage Grove and M. H. Harlow of Eugene were chosen on the executive committee. Howard Merriam of Goshen, president of the organization, presided at the meeting. He named a program committee consisting of C. E. Stewart, O. S. Fletcher and Lee S. Turner. Professor A. G. Bonquet of Oregon Agricultural college spoke on the importance of good seed strains in relation to quality products. Canneries are demanding better produce, compared with quality demanded by wholesale fresh vegetable dealers, he said. He stressed the maximum production per acre to get profitable returns. "Pressure Test for the Maturity of Peas," was the subject of Professor Henry Hartman. By the aid of this test pear growers are able to harvest their fruit at a time which would assure the best keeping qualities, he said, and recommended that such a machine be made part of the county agent's equipment. The Beume test for sugar content of the cherry was good, according to the speaker, but the sugar test for prunes is of very little value in determining quality of fresh prunes. A new constitution and bylaws were adopted at the meeting.
