"If I had the authority," said the local health officer, "I would not allow a single family washing to be done in the home—because the exposure in the house, due to washing and drying clothes, as well as simply washing indoors, in my opinion is a large factor in sending 'flu' cases to the hospitals. Regardless of whether you do your own washing or have a laundress come in, winter washdays mean steaming tubs, drying clothes inside the house, excess moisture in the air—inviting colds and sickness. You can escape all this by taking advantage of one of our modern laundry services. There is a service suited to every family budget. Call us today and have us explain our different services.
