At a cleverly arranged table at the Alpha Chi Omega house on Friday evening of last week during the dinner hour the engagement of Miss Norma Jean Wilson and Rupert R. Hillman was announced. Little dolls were used as covers for powder boxes at each girl's place while two larger dolls coming under the archway were placed in the center of the table. A soft glow was cast over the room from the little doll lamps by which the room was lighted. Snapshots of the couple were the means of conveying the news of the betrothal. The news is of campus-wide interest as both Miss Wilson and Mr. Hillman are prominently identified with university activities. Miss Wilson is the daughter of Mrs. Viola Wilson of Portland. BOBBED HAIR TO BE PASSE FOR FLAPPER IN 1926

Hairdressers Decide to Make Shingle Fashionable Only For Dowager Type After Passing of Present Season

At the left is one of the newest bobbing styles. Note how the hair is made to stand up on the top of the head. In the center above is the tower bob. It is not a hat, but made to resemble one by the use of "rats," puffs and the like and the addition of a few flowers. This style indicates the extreme to which the hair styles of the next two years may

be carried. At the right is another disguised bob style, which is very smart for evening, with bands of fur and ribbon, the head is disguised until it is difficult to tell whether the fair lady's tresses are shorn or not. In the center below is the fuzzy ringlet bob. This effect also is obtained by the use of additional hair.

CHICAGO, May 2.—"Bye, bob! Girls, step forth to weep. That shingle effect you long have loved must go.

Too bad and all that. But the tresses tinkers have so ruled.

By this time next year leading coiffure kings and queens predict, the bob on the young will be scarce than petticoats.

But for the old—for the dowager type—the bob will be becoming and in style.

Daughter must forsake her shorn locks and hand them over to mother. But mother may do as she pleases. She can keep them either long or cut them to suit. Funny business, but that's the style decree of the premier hairdressers of the middle west who have been in convention setting rules and fashions for the crowning glory of mildy for 1925 and the year after that.

Flappers, finale hoppers and sub deba must hike back to the rats of

20 years ago to be up to snuff from now on.

Puffs, fluffs, rats and switches, disguised under queer sounding names have come to take the B out of bob.

These various accoutrements have the less high sounding name of false hair when dragged under the light. But that's calling a spade too familiarly by its name.

The hairdressers would rather that you speak not go of the bob disguises.

"Say they're just added hair," implore the H. D.'s.

But this is how it works in practice.

The bobbed-haired miss of today may, if she doesn't really care too much, wear her hair bobbed under the sunlight.

More properly she really ought to add some false hair, either in the back or along the sides. There are various

ways. Wigs, for example. Some are of spun glass.

But at night—goodness me—she simply must take the extra hair, comb it on the chair and chuck it aboard for a ride to the movies or where else she may be faring.

According to Madame Louise, one of Chicago's fashionable hairdressers, the girl of today who has always worn her hair bobbed, really doesn't know how a good mass of hair feels, and, in order to find out is letting her hair grow.

"Two years from now it will be difficult to predict what hair styles for the young will rule," says Madame Louise.

"Some girls come into my shop and tell me they would like to wear long curls, like their older sisters did 10 and 15 years ago. It may be that, but curls will replace the bob.

"But just now the bob is absolutely passe for evening wear and it should be concealed by day, too.

"How? There are wigs and the extra hair to be worn and added."
