

# SEATTLE WINS IN FIRST OF SERIES WITH BEAVER NINE

Seattle, aided by the terrific hitting of Frank Bressi and some fast fielding that counted for double plays, took Portland down in the first of the series between the two teams. In the last half of the eighth, with Portland up, two on and none down, Bressi's liner was converted into a triple play by the Seattleites, Tomer to Brady to Baldwin.

The Indians pulled up from behind in the eighth with a five-run rally. The final score:

At Portland—	R. H. E.
Seattle	5 10 4
Portland	5 9 1

Batteries: Sutherland, Moore, Plummer and Baldwin; Menker, Harty, Yarrison and Tobin.

At Sacramento— R. H. E.

# COUGARS HERE TO TAKE ON OREGON

Faced by the heavy-hitting Washington State college baseball nine on the local field this afternoon, the University of Oregon team will go into its second battle of the 1925 Pacific Coast conference schedule. The game will begin at 4 o'clock.

The Cougars defeated the University of Washington swatsmiths at Seattle yesterday, 6-3, and this fact bears out the advance guess that the visitors here today are perhaps the strongest collection of baseball artists in the northwest college circuit. Oregon will have her hands full, that is certain, but since the debuting at the hands of Idaho, the Lemon-Yellow team is determined.

Harrison, who has been ineligible, but who is now on the players list, will probably be called upon to pitch for Oregon.

## Madison Square Garden to Fall

NEW YORK, May 6.—Madison Square Garden, for three decades the scene of big sporting events and public assemblies, has sung its swan song. A turbulent throng of 13,000 last night watched Sid Terris, youthful New York lightweight, outpoint the veteran Johnny Dundee in the building's farewell athletic event.

There was a roar of disapproval against the decision for Terris, as Dundee's plucky stand won him the favor of the audience. Eight fans left the famous old building as a parting "taps" was played by a veteran army sergeant.

## Ride on GENUINE LOW AIR PRESSURE

IF YOU can cut down the air pressure in your balloon tires it will add just that much more to their cushioning effect.

Maybe you can't do this safely with your present make of balloon tires.

But you can with the new U.S. "Royal low-pressure Balloons—

Because—

These tires have the new U.S. "Low-Pressure Tread." This tread gives a much greater area of road contact than a round tread.

It distributes the load evenly over the tread surface and reduces the weight on the individual tread blocks. This does away with early, uneven and disfiguring tread wear.

U.S. Royal Balloon gives long service even at lower air pressures than have been recommended in the past.

For in addition to this new Low-Pressure tread they are built of Latex-Treated Web Cord. The only cord construction in which the cords are webbed together with pure rubber latex. This gives maximum strength and maximum flexibility.

Don't compromise on balloon tire pressures any longer.

Ride on genuine low pressure.

It will surprise you to know what a difference it makes.
