

ESCAPED CONVICT TAKEN; PARTNER STILL AT LARGE

SACRAMENTO, May 15.—Floyd Hall, youthful escaped murderer from the Oregon state prison, and master of a vicious career, linked with his partner in crime, has been taken from the prison April 7 last, escaped from the prison April 7 last, and is in the Sacramento city jail, awaiting trial. He was captured late last night without a fight or an attempt at escape, and somewhere in the street at one end and somewhere in the street at the other end of the "pal" Tanko, it is supposed to be a tame one. It is supposed that when the police came upon Hall and Tanko, they came upon them at that act, and took a tip from a citizen Chief of Police Henry Deshan, accompanied by Detective Harry Gamble and Patrolman Harry Smith, invaded a Japanese dining room on Fourth street near the Sacramento river and were walking into a dark room, lit by a light under the bed and there was Hall.

Hides Under Bed
From a brusque order Hall crawled from beneath the bed, hands above his head, was searched and in a few minutes was in a cell at the city jail. Hall had no weapon, although the police stated that he had with him a number of 30-30 rifle cartridges. Hall was taken at about ten o'clock last night, but the news was held up for two hours by the newspapers, upon the request of Chief McShane who had the request of being able to apprehend Tanko as well.

Through the night, the entire police department worked, looking for Tanko. All roads leading out of the city were guarded and rooming houses were being searched. Even the off duty men of the department were called out to search. The sheriff's force of 150 men were held up for two hours by the newspapers, upon the request of Chief McShane who had the request of being able to apprehend Tanko as well.

When arrested, Hall was dressed in a new pair of overalls and a new shirt. A new cap was also found in his room. It bore the label of "Toys" a Japanese merchant at 124 1/2 Fourth street. The man in the city prison Hall mentioned to Chief McShane, the man who had "hooked" them to a point where they were almost desperate.

The tip to the police department was given by a man who says a man he thought was Hall, lives in the Nippon Hotel, Fourth street near L. Following him, the man saw the suspect disappear into the Colusa rooming house and immediately notified Captain Deshan.

It is presumed by officers that Tanko was with Hall in the theater and became suspicious as the two left, probably turning in another direction when he observed his partner was followed.

According to S. Shimada, proprietor of the rooming house where Hall was arrested, a man rented a room about six o'clock last evening, and had a woman with him. Shimada said, registering under the name of "J. Rayon." After that the rooming house man saw no more of him until he was brought downstairs by the officers, he said.

Save for That Trip You Want

Are you one of those unfortunate individuals, who last year had a trip all planned, and was unable to take it on account of lack of finances? The dollar or two you put into a vacation fund here at the First National will hardly be missed. But when vacation time comes those dollars will have grown to many—enough to have a few enjoyable weeks away from the worries of business.

Convict is Caught

Floyd Hall

Joe Tanko

Above is Floyd Hall, youthful escaped murderer, who was caught last night in Sacramento and will be returned to the state prison at San Quentin. Below is Joe Tanko, his partner in crime, who has not been re-captured.

148,831 Cars are Installed in U. S.

Freight cars installed by Class 1 railroads in the United States, including the Southern Pacific, during the first 11 months last year, totaled 148,831, and locomotives 1061, according to a report received today by L. L. Graham, district freight and passenger agent of the Southern Pacific railroad.

Of the total number placed in service so far this year, box cars numbered 67,230; coal cars 47,190 and refrigerator cars 12,640.

Annette Kellerman Sues for \$20,000

LOS ANGELES, May 15.—Annette Kellerman of swimming fame is the plaintiff in a \$20,000 suit on file in the superior court today against the Annette Kellerman Rancho Realty company and the Annette Kellerman Rancho Building company. She alleges the defendants have been selling memberships in a county club project by wrongfully using her name. She is not connected with the project in any way, she says, and estimates her reputation has been hurt to the extent of \$20,000, the amount she asks as damages.

Popular Magazines Taken From Stands

WASHINGTON, May 15.—Ten popular magazines have been ordered withdrawn from sales at newsstands here as "obscene" and "indecent."

District Attorney Gordon, who banned the publications, said forty more were awaiting examination.

One Class Steamships to Europe

When you travel abroad this year, travel the Canadian Pacific "Monoclass" way. Twelve magnificent Monoclass Steamships afford regular Canadian Pacific comfort, service and convenience, combined with one class passage at proportionately lower rates. For either a business or pleasure trip, Monoclass Cabin Service will appeal to you.

Your nearest agent will gladly give complete information and literature.

KLAMATH RAILWAY FRANCHISE AGAIN HALTED BY MAYOR

KLAMATH FALLS, Ore., May 15.—For the second time within a month, Mayor Fred H. Goddard yesterday vetoed a councilmanic resolution which sought to give the Strahorn railroad an exclusive franchise to cross Sixth street. The mayor declared that he would never sign a resolution which would permit one railroad to "bottle up" the entrance to the city. He also urged the city not to give the Strahorn line any permits or easements of any kind until the city's \$300,000 interest in the road should be protected against a "bankruptcy sale" or any other sale of the Strahorn road.

Coincident with this executive veto, it became known that Hill line surveyors are planning to locate a line across Upper Klamath lake, which would put the new road nearly four miles from Klamath Falls if such a route were taken. It is believed here that this line is being surveyed to protect the Hill line in the event that Klamath Falls does not give it a feasible entry into the city.

SCIENTIST SEES END OF EARTH

(Continued from page one)

"picking up" the smaller meteorites in its path.

"Then—about five billion years ago—its growth slowed down. It had virtually 'cleaned up' its orbit of smaller bodies.

"It is still growing, but very gradually. Scientists estimate it is being struck by two hundred million meteorites every day. While some of these meteorites are fairly large, many are no bigger than pinheads.

Moons Formed Same Way
"The various moons—our moon, and those of the other planets—were probably formed in the same way, but they were formed within the influence of larger bodies.

"The sun was probably formed by two great masses of meteorites crashing together as their orbits crossed. Those which collided stuck together and transferred the center of gravity to the entire mass.

"Movement is a form of energy, and energy cannot be destroyed. When a moving body is suddenly stopped, its energy of motion is changed into heat.

"Now, however, the sun has attracted virtually all the meteorites around it. Its growth has stopped, which means that no new heat is being generated by striking meteorites.

"It is possible that the sun may have another source of heat, generated by atomic energy."

"Most scientists agree that the sun has passed its hottest point and is now slowly cooling.

"The earth, too, is gradually losing the heat generated by collision of the meteorites which formed it.

"To offset this it is receiving atomic heat and heat from the meteorites still striking it.

End of the Earth
"As to the end of the earth, we know that new planets are constantly forming and old planets constantly disintegrating.

"It seems logical to suppose that the meteorites which form the new planets are fragments of the disintegrated old planets which have fallen apart.

"The theory I hold to is that after disintegration sets in—in a track which has crystallized through age—the planet's atomic energy runs down and loses its powers of gravitation.

"When this occurs, there being nothing to hold its fragments, they are simply whirled off into space by its centrifugal force.

"This is a theory with a 'W.' So far it has not been proven that the atomic energy of a disintegrating planet runs down.

"But neither has it been disproven and the theory at least provides a satisfactory explanation for a self-perpetuating solar system—which is what we have."

138 JOBS FILLED BY LOCAL OFFICE

More persons applied for jobs and got them during the last week than in any other week this year, reports Frank L. Armitage, superintendent of the United States employment office in Eugene. A total of 138 positions were filled, through the office in the last six days, and of this figure, 123 were for positions requiring men, and 15, women.

"We still have many more applicants for work that we are able to supply jobs for," says Mr. Armitage. "There is very little call for positions in Eugene, and when a call is made there are always several men at the office ready to take it."

Classification of the various positions is as follows:
Men: Farmers, 14; carpenters, 6; painters, 1; casual workers, 22; bookkeepers, 1; common laborers, 22; cooks, 2; kitchen workers, 2; logging camp hands, 25; lumber mills, 25; mechanics, 1; track workers, 1; teamsters, 2; engineers, 2; firemen, 1; watchman, 1; total, 125. Women: Housework, 7; waitresses, 3; cook, 2; kitchen workers, 1; total, 13.

Fisherman Loses Life in Columbia

ASTORIA, Ore., May 15.—John Anderson, 28, fisherman, residing at 174 West Exchange street, was drowned near Peacock Spit at the mouth of the Columbia river Wednesday morning about 11:00 o'clock according to reports reaching this city today.

Anderson, who had been in this country three years, was fishing with his brother-in-law, A. Roberts, also of Astoria. Their boat was blown away and in an effort to recover it from the surf on the spit their boat capsized. Anderson was drawn down by the net, but Roberts, clinging to the boat and was rescued by Nella Anderson, another fisherman.

The boat and net were recovered but Anderson's body has not been found.

Seventeen men out of every 100 in Norway follow the sea or are dependent on it for a livelihood.

Common Household Medicines

Otherwise known as "simples" have for centuries been derived from medicinal roots and herbs. They are still used and recognized by many of our best physicians as unequalled for certain ailments in many countries roots and herbs are cultivated purely for commercial purposes. It is said that the Lydia E. Pinkham Medicine Co. of Lynn, Mass., is the greatest user of crude herbs in this country. The success of their Vegetable Compound for ailments of women is now world-wide, and it certainly has an army of women who suffer from any ailment peculiar to her sex to try it.

CONCRETE MIXERS

We stock a small, tilting-drum concrete mixer that is especially suited for general use on small jobs. Capacity—3 cubic feet. Can be operated with a 1 1/2 horse power engine. Call on us for concrete wheelbarrows and cement workers tools.

Divorce Decided

MEDFORD, Ore., May 15.—By a decision handed down Wednesday in the divorce action of Alice I. Black against W. A. Black, both of Ashland, the wife is granted a divorce. In the decision, it is provided that Gordon, 12, stay one month with his father, and one with his mother, and when 16 years of age, shall choose which parent he desires to live with, until 21 years of age. During this period, neither parent shall take him from the city of Ashland, and he shall attend school.
