Council Will Pass On City Ordinance

Monday night there will be a deferred meeting of the city council in which the planning commission ordinance will come up for final passage. The councilmen will also let the bids on six street improvements, the alley in block 12, between Ninth and Tenth streets, east; the alley running from Oak to Pearl between Eleventh and Twelfth streets; Madison street from Cheshire to Fifth avenue; and the constructing of a sewer between First and Second streets from Pearl to Mill.

Ordinances will probably be passed levying assessments for the paving of an alley from Oak to Pearl streets; the paving of Thirteenth from Williams to Charleston streets; the paving of an alley from Williams to Pearl between Fifteenth and Sixteenth streets; and the construction of a sewer in the south Williams district.

An ordinance for the selling of bonds for all of the outstanding street improvements will come up for passage. Between \$75,000 and \$100,000 will be the probable sum involved. In addition to this the regular routine business will be attended to.

Workmen on Roof Cause bad Cave-in

The combined weight of six or seven men working on the roof of new public market building now being constructed in the county jail yard, caused the structure to collapse yesterday afternoon. Although the roofing fell several feet, no one was injured.

The opening of the market may be delayed by the cave-in, according to John Zimmer, in charge of construction. The roofing was put on before the building was ready for it.

FIRE PREVENTION WORK WILL BEGIN

With the fire season almost here, fire prevention officials are beginning active fire prevention work again.

C. I. Dugue of the United States weather bureau at Portland, which offers a special fire weather warning service to all local offices, is this week visiting various forestry officials to give instructions and advice for the coming season.

It has been found that weather conditions favorable for forest fires, is determined largely by the relative humidity of the air. With the air carrying a maximum of 100, in relative humidity, anything above 50 is not favorable for the burning of forest fires, below 50 fires spread rapidly, and with the humidity down to 30 or 40 there is great danger and fires spread rapidly.

The fire weather warning service is able to forecast these conditions from 12 to 48 hours ahead of the danger period, and advance information especially adapted to each locality is sent out by telegraph and telephone to forestry officials and fire wardens.

This information is generally given through the co-operation of the people, to reduce to the minimum the danger of forest fires, if during such dangerous weather conditions, special precautions are taken.

In the local office a record of the weather conditions is kept by the use of a hygrometer, an instrument which automatically records upon a chart

the constant rise and fall in temperature and relative humidity.

This is particularly valuable because it records the conditions during the night, and by the morning reading a drop of 50 degrees during the day, may be anticipated. The relative humidity is always higher during the night, starting to raise about four o'clock in the evening and falling again during the day.

The record kept for the previous year shows that each time the relative humidity went exceedingly low, the number of acres of forest burned over rose markedly.

The special fire weather warning service was inaugurated in July, 1924, by the United States weather bureau, with offices at San Francisco, Seattle and Portland. These offices send out reports whenever conditions seem to warrant them. This forecast is also of value to the farmer in planning his crops. This information proved of great value in forestry work last year. The report will be broadcast by radio from various centers; the service being given from April 15 to October 15 or until the close of the fire season.

Bond Issue Voted Down at Glenwood

Disagreeing over the proposed building site of the new Glenwood school, taxpayers last night voted the \$12,000 bond issue. The vote was 30 against and 11 in favor.

The proposition to have the present site changed to one near the highway was discussed but no agreement could be reached, it was stated. The present building is badly crowded with the fast growing population of the Springfield suburb, it was pointed out.

OAKRIDGE TO HAVE RAILROAD FESTIVAL

Honoring the Nation out-off's recent impetus and developments, a large railroad celebration is being planned to be held at Oakridge July 4 and 5. The fête will be in the nature of a rodeo and carnival, and is sponsored by an association of four business men of Oakridge who call themselves the "End of the Steel Celebration Association."

The Browning Amusement company of Salem, Ore., a real rodeo, passenger airplane and a stunt plane will be some of the main features of the celebration. Other amusements will take the form of boxing, wrestling, dancing, and athletic contests. Prizes to the extent of over \$1000 will be given away during the two-day affair. A special sport job Star touring car will also be given away.

The first affair of its kind to be held in this part of the country, 2000 people are being planned for the association. The roads are in good condition to Oakridge, but committee promises that these will be improved appreciably before the celebration.

The "End of the Steel Celebration Association is financed and was led by Dr. L. W. West, president; F. Setzer, vice-president; C. Crooner, secretary; and Charles Nell, treasurer.
