

W. P. WALTER IS TO ATTEND ESTES PARK Y. M. MEET

The third general assembly of Young Men's Christian association boys workers will be held this year at beautiful Estes Park, Colorado, June 4 to 12, announces W. P. Walter, boys' work secretary of the local Y. M. C. A., who will attend as a delegate from this city. Others interested in boys' service work are expected to attend from this region. It is said.

The assemblies, which are international in scope, are held every three years. The last meeting was held at Fort Hoch, Austria, and Eugene was represented by Roy Leach, then a teacher in the Christian college in Beirut. He sent back a glowing account of the work accomplished, and described the conference as most worthwhile.

Recreation Provided. Estes Park is 70 miles by automobile from Denver, in the heart of the Rocky Mountain national park, and is naturally adapted to such a convention, in the word sent out. Recreation features will include horseback rides into the hills, mountain hikes, motor boating, and other forms of outings.

Many speakers and religious leaders of international reputation will be at the conference to speak, and to lead discussion groups. Small groups for intensive discussion and study will be one of the main phases of the meeting. It is announced. The purpose of all meetings and discussions will be "to determine further the direction, the methods, and the responsibility of the Young Men's Christian association in its efforts to make society Christian, particularly with reference to the needs and place of laymen in that process."

Noted Speakers Engaged. Among the speakers of note will be Rev. Ernest F. Tuttle, of Evinston, Ill., whose knowledge of youth and pulpit ability packs his church each Sunday; Dr. William H. Kilpatrick, of New York, a prominent educator; Dr. Basil Matthews, of Geneva, Switzerland, boys' work secretary of the world's youth; Prof. Harrison (Sunny) Elliot, professor of religious education and psychology at Union Theological seminary, New York; Edgar M. Robinson, of Geneva, Switzerland, senior boys' work secretary of the world's committee; Miss Margaret Slattery, teacher, author, speaker; Dr. Kirby Page, world traveler and writer on economic and peace problems; and Mr. S. Wirt Wiley, recently general secretary of the association at Minneapolis.

Several hundred delegates from all sections of the United States and other countries will be present, says Mr. Walter, and the most successful convention in the history of the Y. M. C. A. work is planned.

ENFORCEMENT FOR LAWS IS STRESSED

(Continued from page one)

The community which approves such administration is making dangerous concessions. There is no use disguising the fact that as a nation our attitude toward the prevention and punishment of crime needs more serious attention. The conclusion is inescapable that laxity of administration reflects upon public opinion, causing cynicism and loss of confidence in both law and its enforcement and therefore in its observance. The failure of local government has a demoralizing effect in every direction.

Issues Are Vital. "There are vital issues, in which the nation greatly needs a revival of interest and concern. It is useless to boast of our liberty when we find that to no shocking an extent it is merely the liberty to go ill-governed. It is time to take warning that neither the liberties we prize nor the system under which we claim them are safe while such conditions exist.

Self-Government Basic. "Our country was conceived in the theory of local self-government. It has been dedicated by long practice to that wise and beneficent policy. It is the foundation principle of our system of liberty. It makes the largest promise to the freedom and development of the individual. Its preservation is worth all the effort and all the sacrifice that it may cost.

Individual Responsible. "The local political units likewise look to the states, the states look to the nation, and nations are beginning to look to some vague organization, some nebulous concourse of humanity, to pay their bills and tell them what to do. This is not local self-government. It is not American. It is not the method which has made this country what it is. We cannot maintain the western school of civilization on that theory. If it is supported at all, it will have to be supported on the principle of individual responsibility. If that principle be maintained the result which I believe America wishes to see produced inevitably will follow.

Individual Responsible. "The local political units likewise look to the states, the states look to the nation, and nations are beginning to look to some vague organization, some nebulous concourse of humanity, to pay their bills and tell them what to do. This is not local self-government. It is not American. It is not the method which has made this country what it is. We cannot maintain the western school of civilization on that theory. If it is supported at all, it will have to be supported on the principle of individual responsibility. If that principle be maintained the result which I believe America wishes to see produced inevitably will follow.

Saws But Stays Up

This chap sat on a limb and sawed it off between him and the tree, but unlike the chap in the story, he had a rope securely tied to it. He is J. D. Fowce, tree surgeon, and is now endeavoring to save some of the magnificent trees in Central Park, New York City.

own liberty. If we cannot govern ourselves, if we cannot observe the law, nothing remains but to have some one else govern us, to have the law enforced against us, and to step down from the honorable abiding place of freedom to the ignominious abode of servitude.

Progress is Urged. "The whole world has reached a stage in which, if we do not set ourselves right, we may be perfectly sure that an authority will be asserted by others for the purpose of setting us right.

Divorce Law Stated. "So long as some can go to a distant state for divorce which others are denied at home," he added, "there is not equality in this regard. Then some states grant valuable exemptions from taxation which other states impose, one person may enjoy what another is denied these rights.

Memorial is Held At Nation's Shrine

WASHINGTON, May 30.—(AP)—The nation's Memorial day tribute to the men and women who died in its service centered today in Washington, with President Coolidge leading the exercises in Arlington National cemetery at the tomb of the Unknown Soldier.

Touched by the solemnity of the occasion, thousands of Washingtonians early yesterday gathered in the amphitheatre to hear the president's broadcasting of which was arranged for by several large radio stations.

Assigned to honor places in the assembly were survivors of some of the wars that claimed the thousands resting beneath the rows of tombstones dotting the surrounding hillsides, and now colorful with flowers and hunting.

Oil Reserve Taken. NEWPORT, R. I., May 30.—The navy department already has made plans to administer the naval oil reserves in view of such decision as was rendered by the federal court in Los Angeles yesterday, declaring void the Elk Hills leases and contracts to the Doherty oil interests.

SCIENCE MAY TELL SECRETS OF STARS BY ATOMIC PROBES

LOS ANGELES, May 30.—(AP)—Probing the infinitesimal interior of an atom in Pasadena may solve the secrets of huge stars shining billions of miles away, Dr. Robert A. Millikan, Nobel prize winner and internationally known physicist, told an audience here last night.

With the aid of a discovery made in electronic research some ten years ago, Dr. Millikan explained, he and an associate, L. S. Bowen, have been able to predict within the past year precisely the type of light waves which would be emitted by atoms which had been stripped of their whole outer group of so-called valence electrons.

"We have then found experimentally," he added, "in special sources of light set up in the Norman Bridge laboratory in Pasadena, precisely all these types of radiations, hundreds in number.

"By finding whether these radiations exist in the light that comes to us from the stars we now can gain new information about conditions existing in these stars and compare them with conditions existing in our artificial sources. We can tell with certainty, for example, whether the atoms which give rise to a certain type of radiation (that is, a given set of special lines), have had one or two or three or four or five or six or seven of their outer electrons stripped off from them by extreme temperature conditions."

All of these laboratory researches into the mysterious birth of light rays from atoms, Dr. Millikan went on to say, strike at the very heart of what is perhaps the most fundamental problem of the physical world, namely, the nature of radiation itself, and how it is that energy can be projected through space from an atom in the sun to another atom in our earth.

OUTLOOK FOR DEBT PAYMENTS BETTER

WASHINGTON, May 30.—(AP)—Progress toward clarification of the war debt question continues at a steady pace with significant developments here and abroad. With indications in Washington that Italy advancing step by step, is nearing a basis for formal negotiations for settlement, overnight dispatches from Paris quoting Adolph Ochs, publisher of New York Times, declared headway is being made toward solution of France's debt payment.

Mr. Ochs, who said he "spoke upon the highest authority," disclaimed the role of "even an unofficial observer" but added that he could probably deny that impolite or disagreeable messages had been exchanged between Paris and Washington concerning the debt. His declared President Coolidge has the full support and confidence of the American people in his ability to approach "a settlement in the

highest sense of fairness and generosity."

Another meeting between Italian Ambassador Demartino and treasury officials is in prospect here when the baron receives from Rome information concerning his country's finances for which he called yesterday. The talks thus far are said to have revealed that Italy's capacity to pay will provide the basis for its settlement offer and the information requested by the ambassador is needed before conversations may be resumed. Reports that administration opposition might be thrown against new private loans to countries appearing as backward in debt funding negotiations continue under discussion here. Its formal influence is the government's only weapon in such cases, but this would prove a powerful factor, it is held.

Business in Coast Area Held Steady

SAN FRANCISCO, May 29.—(AP)—Figures for the twelfth federal reserve district for April, 1935, show that business activity remained steady despite the usual seasonal decline and such unusual features as the abandonment of more than 50 per cent of the winter wheat acreage and widespread damage to berries and deciduous crops throughout the district due to unfavorable weather. Decline in total volume of trade as compared with the previous months was less than that which usually occurs at this season of the year. The total volume of credit extended by customer banks of the federal reserve system increased during the month, as did the total deposits of these banks.

Building activity is approaching record levels. Twenty of the principal cities showed a total of \$41,593,382 or 20 per cent greater than in April, 1934.

However, estimated total construction costs were about one per cent less during March and April than during January and February. The employment survey of the reserve district bank during April shows a slight increase in volume of employment in Oregon as compared with March, due to declines in the number of workers in the lumber industry. Approximately 53.4 per cent of the winter wheat acreage was abandoned, there being but 1,750,000 acres remaining to be harvested out of a total of 3,753,000 acres sown. This abandonment was largest in Oregon and Washington, where the crop in many areas was destroyed by cold weather, which preceded the winter snows, which preceded the abandoned acreage has been reseeded to spring wheat, however, and weather and soil conditions have aided the growth of this crop.

GOVERNOR GETS BAIL. TACOMA, May 30.—(AP)—Former Governor Louis F. Hart, of Washington state is at liberty today under \$2000 bail.

Hart was arrested in Olympia yesterday evening, charged with soliciting a bribe from Guy E. Kelly and Forbes P. Haskel, Jr., out of the trust fund created from the assets of the defunct Scandinavian-American bank of Tacoma.

He was arrested two hours after Prosecuting Attorney Seldon had sworn out a warrant before Judge W. O. Chapman in superior court here.

WAR DEBT HISTORY BROUGHT INTO NEW PAYMENT REQUEST

WASHINGTON, May 30.—(AP)—The war debt discussion has been turned back to 1917, as America borrowed from France to provide one of the two latest developments.

Senator Borah, chairman of the senate foreign relations committee in a letter has declared the treasury's official records prove that America not only did not haggle over the amount of France's loan, but in paying the debt included \$250,000 too much.

The other development is that Belgium, battle ground of the World War, is likely to be the first power to fund its loans from the United States. Senator Borah, in a letter to the London Observer, made public here, answered a letter by the author of a biography of Beaumarchais questioning the senator's statement that America has over-paid her loan from France, which was neglected through Beaumarchais.

The senator cited the records to show that the loan was entered with this notation: "Over paid by the United States 3,426,787 livres."

Admitting that there was a delay in final settlement, Mr. Borah declared this was due to the failure or inability of Beaumarchais to render an account on which congress could act.

Benjamin Franklin, in 1776 and 1782, he asserted, wrote repeatedly to Paris in an effort to get an accounting and added that nowhere was there any evidence that this country has sought to dispute the amount or repudiate the debt.

CHANGES OF ROUTE OPPOSED BY BOARD

PORTLAND, Ore., May 30.—Representatives of the Oregon state motor association yesterday afternoon asked the state highway commission to order a new highway built to cut dead hill off the Pacific highway so motorists may escape a speed trap which the association charged was maintained in that town. They said California motorists were threatening to boycott southern Oregon because of the alleged speed trap.

William Doby, chairman of the commission declared that if the action was demanded merely because of arrests for exceeding the speed limit, he saw no reason for throwing away a bridge which cost \$50,000 and 2 3/8 miles of pavement, which cost \$25,000 a mile.

The association promised to have its own engineer do some surveying and present data to the commission next month.

An order was issued for a survey of several miles from Lakeview south to the California line, to make an interstate connection. The commission is also considering the application for building a few miles of the Klamath Falls-Lakeview highway in Quartz valley.

Experts TEST before they buy

9 OUTSTANDING FEATURES

- 1 Washes faster.
- 2 Washes cleaner.
- 3 Largest hourly capacity in the world.
- 4 Most compact washer made—takes floor space only 25 inches square.
- 5 Cast aluminum tub—can't warp, rot, swell, split or corrode.
- 6 Easily adjusted to your height.
- 7 Clothes can be put in or taken out with the washer running.
- 8 Tub cleans itself.
- 9 All metal wringer. Self adjusting. Instant tension release.

9 REASONS FOR WORLD LEADERSHIP

Naturally we turn to her with the Maytag Gyrafoam Washer. We ask her to compare the Maytag with any or all other washers before she buys. Further than that, we ask her to actually do the biggest, most soiled washing she can gather together, and we offer her a Maytag with which to do it.

Then there will be no question answered—no doubt in her mind about the washer her home must have. She'll find the Maytag twice as fast as others, and much more thorough and careful in its washing. The secret, of course, is the exclusive Gyrafoam principle.

We'll bring a Maytag right to your home. Buy as the expert buys. Test it—wash with it. The only obligation is the one you owe yourself. Phone without delay.
