**Eye Strain**  
is the invariable result of neglected defects of sight. In the involuntary effort to obtain distinct vision a severe strain is caused to the muscles of the eye. Headache of a peculiarly painful kind results which can only be relieved by glasses. We adapt glasses which accurately compensate for all defects and which thus remove all strain. Bear in mind that the sight often seems good when eyestrain exists.

MUSIC is something everybody needs and enjoys. Every Family Should Have the Means of Producing Good Music  
The Gulbransen Registering Piano, the Victrola and Brunswick Phonographs, the Kumba and Fischer Ampico Reproducing Pianos have all made it possible for those who are not skilled technically to know as much of the beauties and benefits of music, and to enjoy it as fully as the trained musician.
