

ODD FELLOWS GIVE PRIZE LIST FOR BIG CELEBRATION HERE

Following is the complete list of prizes as announced by the sports committee of the I. O. O. F. band Fourth of July celebration to be held at the Eugene-Springfield Auto Camp next Saturday.

The program of the day will start at 10 o'clock with a band concert, at 11 o'clock the audience will join in singing "America," led by the band.

Prizes are listed: 1. Horseshoe contest—(Experts) First prize, 12-pound ham, (Broaders market); second prize, side of bacon, (Peoples market); (Amateurs) first prize, box of cigars (Eugene Cigar Factory); second prize, angel food cake (Table Supply Co.).

2. Volley ball contest—Prize, 2-pound box of chocolates (Ottos Confectionery). 3. Fat man's race—First prize, \$2.50 order (Paul D. Green); second prize, necktie, (Green-Kilborn Co.).

4. Nail driving contest for women—First prize, 18 cartons washing powder; second prize, 6 cartons washing powder (White Electric Co.). 5. Pillow fight on horse.

6. Obstacle race. First prize, driving girl radiator ornament (Stewart Auto Supply company). 7. Baseball hat (Hendershot Gun store); second prize to be announced.

8. Sack race. First prize, order on Brownsville Woolen Mills store; second prize, \$1.50 order on Model Shoe store.

9. Three-legged race. Prize, \$1 box novelty Sundry (R. H. Moore Candy company). 10. 100-yard race for men. First prize \$5 meal ticket (Imperial Lunch); second prize, 5-gallon gasoline pump can (Griffin-Babb Hardware company); third prize, order for suit cleaned and pressed (Electric Cleaners).

11. 50-yard race for women. First prize, 100 bars of soap (Stanley's); second prize, order on Luckey's Jewelry store.

12. Race for girls under 15. First prize, jewelry (Hoffman); second prize, pair silk hose (Beard's). 13. Small boy's race. First prize, savings bank with \$1 credit (First National Bank); second prize, savings bank with \$1 credit (U. S. National Bank); third prize, savings bank with \$1 credit (Bank of Commerce).

14. Grease pole climb. First prize, \$5 jack-knife; second prize, \$2 jack-knife. 15. Baby show. Boy under one year, rocking chair (Wetherbee-Powers); girl baby under one year, \$x10 portrait, mounted (Martin Studio).

16. Fat woman's race. First prize, broom (Skaggs); second prize, vanity compact (Wetherbee-Powers). 17. Relay race. First prize, five pounds candy; second prize, three pounds candy; third prize, 2 pounds candy (Gray's Cash and Carry).

18. Oldest married couple. First prize, framed picture (Swafford's); second prize, order on Brauer's Furniture company). 19. Small girls' race. First prize, savings bank with \$1 credit (Bank of Commerce); second prize, savings bank with \$1 credit (U. S. National Bank); third prize, savings bank with \$1 credit (First National Bank).

OAKRIDGE BUCKAROOS BOOST JULY 4 CELEBRATION

Oakridge contingent here to tell Eugene all about the big Independence Day celebration to be held at the railroad town next Saturday, call on Mayor Parks. The group from left to right are: R. F. Setzer, Kenneth Ables, Mayor E. B. Parks, L. W. Peate, "Nig" Yeager, Sid Peate, Bud Gardner, Charles Darnell, Al Haynie, Ernest Ludlow, Sunshine Harvey, Mrs. Sunshine Harvey, two Oakridge rose blossoms, "Sailor" Dixon.

University Geologist Points Out Value of Seismograph to Eugene in Recording Quakes

An accurate seismograph, an instrument for recording earthquakes, placed in Eugene would be of inestimable value to the scientific world, declares Dr. Edwin T. Hodge, geologist of the University of Oregon.

Oregon is very fortunately situated in regard to earthquakes, says Dr. Hodge, but an instrument here would record activity in any quake area. The Pacific Coast, both east where it touches America, and west, where the Orient lies, is one of the two major quake areas of the world.

When a shock is severe in a region, such as that at Santa Barbara, all the seismographs in that vicinity are put out of commission due to the fact that they are delicately adjusted.

Accurate data must come from other stations. A station in Oregon would be ideally located for data on quakes any place on the Pacific area.

So delicately adjusted are these instruments that they record earth movements any place in the world. Accurate data must come from other stations whenever activity is recorded, and this would tend to make the city prominent in scientific circles.

Only about 10 really important stations exist in the world, and it is only within the past few years that the study of seismology has come to the fore, says Dr. Hodge. Within the past year the government has made preparations for a sub-department to care for this science.

Scientists are now of the belief that the time is coming when earthquakes will be fairly accurately predicted as to time and place. New seismograph stations, placed in strategic points, will greatly aid in this advance, it is stated.

A seismograph consists of an instrument built on a substantial steel frame, from which a weight of approximately a ton is suspended by a wire. To this weight are attached writing instruments which make continuous marks on graphs propelled by clocks.

When a shock is received, the weight remains stationary, due to its inertia, while the apparatus is moved by the shock. Variations are thus reproduced on the graphs, and these can be accurately measured

MARINES TO GUARD EARTHQUAKE RUINS

The instrument could be installed complete for about \$10,000, says Dr. Hodge. This sum would allow for a station equal to any in the world. Stations that would be of great service could be obtained for as low as \$5,000, however, it is said.

In addition to the service to other parts of the world, a seismograph would also greatly aid the study of geology at the university, and would permit specialization in this subject here. Seismology is coming to be recognized extensively by insurance companies, which are employing seismologists to determine earthquake risks in different parts of the country.

Since the instruments would result in a great deal of value to the city and state, the investment would be entirely worthwhile, believes Dr. Hodge. The increase in interest in Eugene and Oregon would be great, it is pointed out, and the city would become one of the scientific centers of the west.

The data obtained from the station here could be combined with that from instruments in Alaska, Washington, and California to the immense advantage of all, it is said.

A seismograph in Eugene would have been of real service during the Santa Barbara quake, points out Dr. Hodge, since the shock was so severe that the instruments could not be used in the quake area. Data would be available from here immediately.

The faculty at the university is well qualified to handle a station, Dr. Hodge has had some experience with seismography, and has been doing considerable work along these lines. Other experienced geologists are also available, and the department is well equipped with research data and equipment, it is said.

Water is Sufficient

The only curtailment on the use of water, Nunn said, is a ban on irrigation for a few days until storage facilities are improved. The system suffered only nominal damage in Monday's earthquake.

One small storage reservoir and a few lesser unams were injured, but the city's major source of supply, a large artificial lake behind Gibraltar dam on the Santa Ynez river, was unharmed, Nunn said, after an official survey.

Ten people have lost their lives in the earthquake, described as the heaviest to visit the Pacific. Five major shocks have been recorded since the first tremor on Monday, but throughout the time there have been slight, almost imperceptible shocks of nearly a score.

No exact estimate of the loss has been announced, but it has been described between \$20,000,000 and \$25,000,000. A graphic eye witness account of the antics of the earthquake in the mountain regions was brought to Santa Barbara last night by J. M. McAvoy, owner of a quicksilver mine in the Santa Ynez river.

Breakfast Broken Up. "We were at breakfast when the first shake occurred," he said. "Our table seemed lifted from the floor, nearly turning a somersault and scrambling the breakfast on the floor."

"The floor seemed tilted at an angle of 35 degrees and then swung like a pendulum back in the opposite direction. We rushed or rather staggered from the house and some of my companions were thrown to their shock."

"As I looked out across the range hands and knees by the impact of the mountains, they swayed perceptibly. A great dust cloud was thrown up by the agitation, accompanied by a deep rumbling read almost sickening in its intensity."

STATISTICS BORN GILBERT—At their home in Eugene, Monday, June 29, 1925, to Mr. and Mrs. R. J. Gilbert, a son. BEAMER—At the Pacific Christian hospital, Tuesday, June 30, 1925, to Mr. and Mrs. Glen Beamer of Creswell, a daughter.

APPEAL SOUNDED BY SCOUTS FOR CAMP EQUIPMENT

An appeal to Eugene citizens to aid the local Boy Scouts attending the first annual summer camp at Mapleton on Knowles creek July 13 to 27 is made by Kenneth C. Ables, Dr. D. C. Stuard, W. R. Robertson, Leland Johnson and C. R. Clark of the camp committee today.

On account of failure to obtain the equipment needed for the camp the scouts are asking for the loan of various camping utensils needed for the two-weeks jaunt. With the limited funds available the scout council is not able to purchase locally the material wanted, and are asking Eugene people to help.

Eight or 10 large camping tents, sufficient to care for four to six boys each are the most immediate need. The scouts promise to take the best of care of all material loaned, and to pay for anything damaged.

A trip was taken to the scene of the camp yesterday by the advance delegation, where water was piped from a nearby mountain stream. Those making the trip were Lester Smith and H. Paterson, assistant scout masters in Eugene, and John Allen, Bradford Datson and Robert Allen scouts. They report everything in readiness for the camp, and the scouts making the trip will be all set for their two weeks outing if Eugene people will respond with the loan of the following articles:

One bread board, 1 egg beater, 6 buckets, 1 rolling pin, 1 hatchet, 2 ladles, 1 meat pan, 2 wash tubs, 1 wash board, 8 serving pans, 1 flour sieve, 3 large bake pans, 2 five-gallon cooking pails, 3 four-gallon cooking

pails, 2 two-gallon cooking pails, 2 butcher knives, 2 paring knives, 3 stirring spoons, 2 can openers, 12 dish towels, 12 hand towels, 8 lanterns, 2 large dish pans, 3 wash

boilers, 4 wash basins, 1 pancake turner, 1 meat fork. Service clubs, local organizations, citizens, housewives or any person wishing to donate any of the foregoing

articles will confer a favor on the scouts of Eugene by notifying the scout office in the city hall by telephoning 1974-J.

In Peacetime Prepare for War

During the summer months we want to keep busy if there is any possible chance. In order to do this, we are offering summer prices on our work—prices way under our seasonal price. We can do this for three reasons—

- 1. Keep our machinery busy—to keep going. 2. We are our own labor—nobody to pay but ourselves. 3. Our shop is in our own home—no rent to pay.

Thus our overhead is cut to the minimum. The money we save, you save in suits and alterations. Alterations for either men or women.

\$236.50 Combination Electric Range which has been used as demonstrator, in all white and nickel, equipped with large glass door oven and 3 element top—also wood and coal section—top slightly stained, now \$198.50

Have you seen the new "mottleton" wall finishes? They are quite the vogue in the newer homes, and many older homes are being done over to secure these up-to-the-minute wall effects. Wonderfully attractive color combinations in mottletoning are possible with FLAT COAT WALL PAINT. You first paint the wall with one color and let it dry; then apply a second color, and while wet, stipple by "dabbing" it with a folded piece of cloth or paper. The result is a charming blending of two colors in an irregular pattern. And your walls are washable. Ask for a color card which gives full directions for mottletoning, and shows some of the effects that can be obtained.

You can now paint your property and pay on the Bass-Hueter Monthly Payment Plan. Call and let us explain this plan to you.
