Summer Sunn Rain Many a Complexion
By Florence L. Ganko

"Come to the garden, Maud" has a beautiful poetic sound, but garden in summer time have taken the poetry out of many a girl's looks. It stands to reason that strong sunlight beating down on uncovered heads and unprotected skin is going to work havoc. A whole winter's care of complexion may be ruined by a week's carelessness in the summer time.

Lois's younger sister, Judith said she was not going to be a sissy. She would not fuss around with a hat and complexion creams and all that other out-of-date, mid-Victorian stuff. But Lois was wise. Perhaps it was because Lois wanted to be the prettiest June bride of the season.

At any rate she always put on a wide brimmed hat when she knew she was going to be in the sun for any length of time. Not only did it protect her skin and hair, but it kept her eyes from squinting into mere slits. Wrinkles are easy come, but they are not so easy go.

She found a protective liquid which was soothing to use. It acted as a base for the dusting of powder which she always used before going out. Since she and Roger were going to be near the seaside for part of their honeymoon she looked up waterproof cosmetics, and she invested in a gray-tinted arrangement for her hair. Lois was a wise young person even if Judith did score her precautions. After a time even Judith will know better.

Weddings are much in everybody's minds just now. While to Nancy Page, care of The Guard, asking for her latest on "Weddings" and enclosing a stamped, self-addressed envelope.

CLIMATE SEEKER

Answer: For reliable information on what would be the most healthful climate, by all means consult your physician, since what is a healthful change for one person or own family, another may be better for another. It depends on what is the matter with one's health. Do not prescribe for yourself, but consult a physician.

As working conditions, resources of the states mentioned, and the like, write to the chambers of commerce at Denver, Colo., and Phoenix, Ariz. Tell them what phases most interest you, and they will doubtless send you printed material and perhaps letters on these subjects.

Answer: Someday someone will invent a way of muzzling such meddler, and he will be richer than Henry Ford. But for the present the only way one can do is to pay no attention. Ignoring a condition may not be a means of curing it, but at least it helps one to care less about it through one's very attitude, and it is very discouraging to encounter in anyone.

A married couple is foolish to let anyone tell them what they should or should not do. Their partnership is their own affair, and just as in business no dominating ways would be tolerated from an outsider, so in the home—only more so.

WORLD LEADERSHIP

THE genius that wins leadership never rests. By the time others have struggled to heights attained by leaders, the leaders have blazed trails to new accomplishments.

The unmatched speed and thoroughness which characterized the Maytag of former years has been enhanced by many note-worthy features, in the New Maytag. Important among them is a Soft Roller Water Remover which hugs every fold of the clothes. Both the soap and water are extracted evenly—no wet spots, no yellow drying. It is the most effective method of soap and water removal every devised, yet so gentle that delicate buttons and filmy laces go through unharmed.
