teachers of the Eugene school system, according to H. R. Goold, district superintendent.

Brief talks an da musical program were presented, with a general air of amusement prevailing. Although slated for the leading talk of the evening, on "The Cash Value of Adonistic Propensities Upon State Legislators," State Superintendent of Public Instruction C. A. Howard was unable to attend, having sent word late Wednesday.

The girls' sextet of the Eugene high school and the instrumental quartet from the high school entertained with a few numbers. Delbert Moore presented violin solos.

Talks were presented by a number of those present, including Harry B. Johnson, Fay H. Robertson, Leone Barger, Stanley D. Eaton, Harley A. Notter, Floy A. Kirkham, Willard A. Elkins, Ada R. Shuey, H. R. Goold, Ellis R. Parker, Mertle Chamberlain, Ida Patterson and Hugh Rosson. Singing of "Oregon, My Oregon," closed the banquet.

McKINLEY INSURES ANYTHING

McKINLEY INSURES ANYTHING

Misery of Goitre

Mrs. J. Lanore, St. Maries, Idaho. Says, "I will tell or write how I prevented a goitre operation with Sorbol Quadruple, a colorless liniment, easy to apply and not expensive." Get more information from Stevenson's, Inc., or write Sorbol Company, Mechanicsburg, Ohio. Sold by all druggists.

STOP COUGHS

Foley's Honey and Tar compound quickly stops coughs, heals inflamed tissues, and, without effort, raises phlegm, clearing the throat of irritating mucus. No chloroform to dry up natural and necessary secretions. No opiates to constipate—a superior blend of pure pine tar, fresh laxative honey, together with other cough and tissue healing ingredients. Insist upon FOLEY'S, the original Honey and Tar Compound, and accept no other. Ask your druggist. For sale by Tiffany-Davis Drug Co.

FARM STORY

(CONTINUED FROM PAGE 1)

places in Oregon where cream hardly fit for human consumption gets the same price at the creamery as a good product.

Oregon Production

"Oregon produces from 3,000,000 to 4,000,000 pounds more butter yearly than is consumed here, and for the most part we must rely on the California markets for disposing of the surplus. California is no longer satisfied with low grade butter. Even the bakeries demand better scores than 88 or 89 for cooking purposes, and in this California market we are being crowded out by better butter from other states.

"There were 44,000,000 pounds of butter consumed in Los Angeles alone last year. Of this less than 2,000,000 pounds were from Oregon. Idaho, with its cream grading, which brings up the standard of butter, supplies 12,000,000 pounds, and this when we know that Oregon has a preferential rate in shipping. Minnesota, which shipped almost across the continent, supplied nearly 6,000,000 pounds. The reason these states can do that is because their higher grades makes it possible to deliver it in good condition and it can command a better price on the market when it is delivered."

Creameries Competing

Mr. Mickle declared that one cause of the situation of general low grade Oregon butter was that creameries, which have to consider reducing their own overhead by taking on greater volume, will accept inferior types of cream to increase their volume and secure large amounts of cream. By scientific processes this can be turned into fair grade butter product for local distribution, but after two or three days becomes rancid and will not bear shipment.

"We cannot really blame the creamerymen, who want to operate on a business basis with as large a volume as possible, but if we could get a mutual agreement among them to post $1000 bonds to hold to creamery grading, we might make it state-wide, uniform, and hence raise standards all around. The 86 creameries in Oregon will not do this. A few here and there are going it alone, but it should be general. The only alternative is to draft a law compelling them to grade the crea minto three grades."

Mr. Mickle explained the law now before the senate which he said would provide that the cream grader employed in the creameries be licensed through his department. He said there could be no compelling of a differential in price for the various grades of cream, but he wished that there might be. He thought, however, that with cooperation of the federal trade commission, flagrant cases of creameries paying No. 1 price for the No. 2 cream could be checked on. To provide for inspection a tax of one cent per 20 pounds of butter manufactured by the creamery the previous month will be provided. He said that the reason the Mt. Angel creamery opposed the law was purely on the basis of the tax, but that many others feared the tax was higher.

"I am not afraid of over-production of dairy products in Oregon providing the quality of the product is preserved," said Mr. Mickle. "At the international conference which I attended in London I found that Chinese and Japanese are discovering that the cow is to provide food, not to be worshipped, and they will be a wonderful market in a few years. Right now good New Zealand butter is being supplied to aur army in Hawaii instead of Oregon butter because our quality cannot compete.

Dairying as Business

That dairying can only succeed when regarded as a business and organized with all factors of cost and marketing known, was pointed out by Mr. Merritt, the department of agriculture expert.

"You people here have the advantage of close cooperation with Oregon Agricultural college," said Mr. Merritt, "and I want to tell you that it is at the top in its thinking. Plant industry, farm management, a bureau of markets, a cooperative marketing organization, and a home economics bureau have been added to the farmers' outlook, and a farm today must not only be regarded as giving a return of five per cent on investment, but is a business supporting a family."

He told of additions of from 300 to 600 hens as a poultry side-line on dairy farms in Maine and Vermont, and in Texas which can be economically supported in connection with feeding the dairy cattle.

In California, he said, it was found that dairy farms operate simply as milk factories, buying all food and cattle and simply feeding the cattle and selling the milk. In Utah in a certain county it was found that a farm had to include at least 80 acres for good dairy profit, and this was solved by growing say, 10 acres of sugar beets, keeping 10 cows, or a cow per acre of sugar beets ,and keeping from 300 to 600 chickens.

Dairy Herd Feed Budget

Professor P. M. Brandt, head of the dairy department of Oregon Agricultural college, gave an address on "The Dairy Herd Feed Budget," basing his talk on the proposition of calculating feed required for a year ahead, and organizing the cropping system on the farm to raise the required feed.

"We base our calculations on 1 ton of grain, 2 tons of hay, and 5 tons of succulent feed for each head—that is, this is the year's requirement for each mature cow, and if estimated in this way will probably be enough to also take care of the immature growing stock.

"If the dairy farmer thus looks ahead he will be spared the wasted energy of having to buy feed from day to day as sudden needs arise, and he will be able to make the best use of his own land, in a scientific way."

Standard of Living

"Dairy Farm Requirements to Produce Satisfactory Income," was the subject discussed by R. S. Besse, farm management specialist, Oregon State Agricultural college. Illustrating his talk with charts, Mr. Besse showed that for a family of two adults and three children of school age the dairy farmer must have an income of $1500 a year above his business expenses to maintain a reasonable standard of living.

"This means that he must have a herd of 18 good cows—by good I mean a cow which produces from 250 to 300 pounds of butterfat per year. From minor sources of income on the farm the farmer should realize about $500 to bring his gross income to about $3500. Expenses of a good dairy farm run from $1500 to $2,000 yearly. If a dairy farmer does more general farming he may not need quite so many cows as 18, but there is a big opportunity for improving the standard of living."

The Dairy Outlook

"Markets in Oregon are primarily dependent on conditions in the United States market, with only a slight exception in that there is a better market for dairy cattle on the coast and a slightly higher level for products in the western region," said Professor Brandt in addressing the conference on "The Dairy Outlook."

He quoted from the Agricultural Outlook for 1929 compiled by the extension division of Oregon State Agricultural college, to indicate that the gradually increasing demand for milk and milk products will probably maintain about the present spread between the prices of feed and the prices of dairy products until there is such a material change in the beef situation that farmers will increase milk production by milking a large number of beef-type cows.

Farmers now have an opportunity to dispose of old cows for beef purposes at good prices.

Marketing of Butter, Cheese

"Oregon continues to depend upon California for the sale of its surplus, principally butter and cheese, high quality being demanded. Progress lies in improvement of butter quality, with the increase in population in the 11 western states apparently able to take care of the present rate of increase in production, it was pointed out.

Dairy Cattle Increase

"The number of cows and heifers two years old or over increased 2,000 from Jan. 1, 1928, to Jan. 1, 1929, it being estimated that there are at this time 216,000 on the dairy farms in Oregon. There is an apparent further increase in the number of calves being retained, which is opposite to the trend during the last three years.

"Indications are that dairy products will increase normally, but the number of young cattle will increase more rapidly. This situation is to be encouraged as long as remunerative prices can be obtained for surplus stock. Quality in cattle and freedom from disease should be the objective in developing the sale of surplus.

New Practices Shown

N. C. Jamison, extension dairy specialist of Oregon Agricultural college, showed a group of slides on improved methods in cooling cream, handling dairy products in milk houses, methods used with manure pits, and in general gave a pictorial illustration of how a high quality dairy product could be obtained with decrease in costs.

His special point was in adapting equipment to the particular needs of the dairyman, depending on what product he is marketing. One selling just milk will need equipment for cooling it at once, while one selling a cream product also will want a separator and probably milking machinery.

Friday Programs

POULTRY DAY

(Gordon Gatch, president 4H Poultry and Cavy Breeders' association, chairman.)

10:00—"Factors Influencing Egg Production," by Prof. A. G. Lunn, head of poultry department, Oregon State college.

11:00—"Cost of Producing Eggs," by H. D. Scudder, head farm management department, Oregon State college.

12:00—Lunch. Committee meetings.

1:15—"Poultry Outlook," by Prof. Lunn.

1:35—"Poultry Program for Lane County for 1929," by O. S. Fletcher, county agent.

2:00—"Poultry Club Work in Lane County," by Arnold D. Collier, county club agent.

2:30—"Turkey Management Problems," McKinley Huntington, Yoncalla, president of the Douglas county co-operative turkey growers.

3:30—Remarks by judge of 4H poultry show.

White Rocks: Marion Cox, Victor Sears, Wallace Sears,.

White Leghorns: Robert Burr, Clara Hausmann, Don Cox, Edwin Miller, Gordon Gatch, Jack Wood, Joseph Gimple, Noble Wheeler, Catherine Zumwalt.

Jersey Black Giants: Edgar Sims, Ren Sims, Charles Swango, Winifred Slawson, Gweneth Harwood, Ralph Thompson.

Buff Orpington: Ralph Thompson, Harold Overgaard, Frederick Fox, Bradford Whitbeck.

Turkyes: Gordon Gatch, Lorinda Stoneberg.

Chinchilla Rabbits: Rachel Shelley, Jean Shelley, Palmer Saunders, George Saunders, Gerold Saunders, Edwin Relyea, Junior Belts, Leonard Hillis, Gordon Gatch, Loyal Schneider, Russell Harwood, Theodorus Gatch, Edward Pruitt, Modelle Kappauf, Richard Young, Russell and Roy Harswood.

American White Rabbits: W. C. Stead.

White Giant Rabbits: Seldom Walkeley, Junior Belts, Johnny Yerger, Loyal Schneider, Theodorus Gatch, Glorgiagay Gatch, Gordon Gatch, Glenn Harwood.

New Zealand Reds: Gregg H. Osborne, Gloriagay Gatch, Theodorus atch, Claude Jones, Johnny Yerger, Herman Erickson, Magne Soleim, George Knox.

Himalayas: Edward Pruitt, Magne Soleim, Harry and Eddie Jacoby.

Spotted Giants: Helen Rasmussen.

Checkered Giants: Marguerite Hawkins.

Pigeons: Fantail, Jack Wood; Swiss Mondaine, Lisston Wood, Carroll Cooley; Blue Homer, Donald Gordon.

Heaviest eggs: Catherine Kingwell, Clifford Hollingsworth, Melba Andrews, Jack Sweet, Ernest Elroy, Clayton Cauthorn, Edwin Miller, Wallace Sears, Clara Hausmann, Johnny Yerger, Roy Swango, Louis Wolf.

IMPROVEMENT SOUGHT

WASHINGTON, D. C., Feb. 21.—(AP)—Improvement of the Oregon caves in the Siskiyou national forest in Oregon was asked Thursday in a bill introduced by Senator McNary, republican, Oregon.

BREAKS OWN RECORD

BRISBANE, Australia, Feb. 21.—(AP)—Arne Borg, the Swedish swimming star, broke his own world's record for 1000 yards Thursday by negotiating the distance in 11 minutes, 55 2-4 seconds. His time, clocked over the 50-meter course in the municipal baths, clipped 21 2-5 seconds from his former record, made in 1924.

BORN

BOWER—At the Eugene hospital, Thursday, Feb. 21, 1929, to Mr. and Mrs. Fred Bower, motor route C, Eugene, a son.

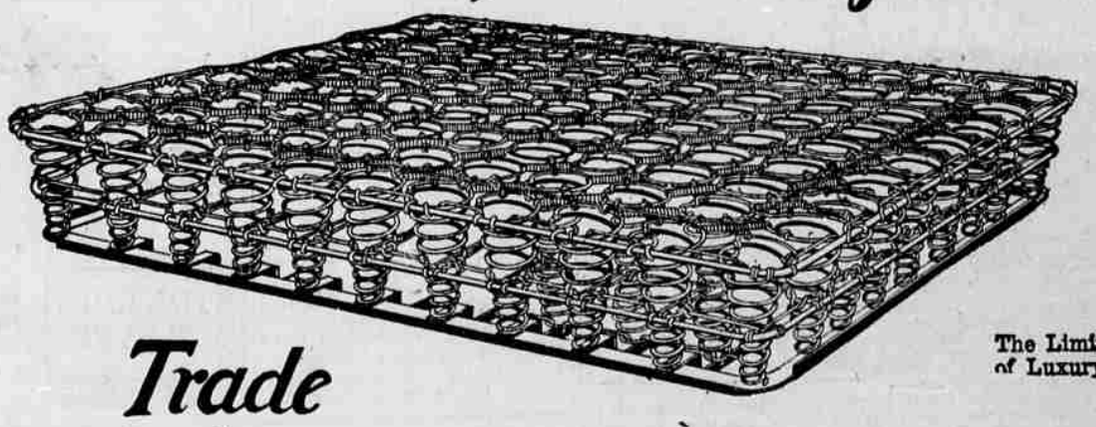
DON'T GET UP NIGHTS

Rev. D. Lee, Portsmouth, N. H.

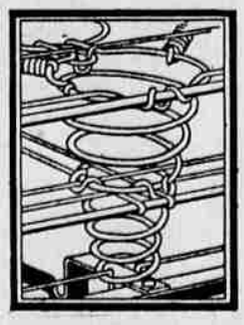
Says, "Come or write to 101 Crescent Way, and I will tell you how in a short time the bladder irritation was relieved by Lithiated Buchu (Keller Formula). My case was of long standing and painful. Was bothered 4 or 5 times each night." It acts on bladder as epsom salts do on bowels. Drives out foreign deposits and lessens excessive acidity. This relieves the irritation that causes getting up nights. The tablets cost 2c each at all drug stores, Keller Laboratory, Mechanicsburg, Ohio, or locally at Stevensons, Inc.

Your Old Bed Spring
Why use it longer?



The Limit of Luxury

Trade it in on a
CREST-O-REST
—the modern bedspring



Flexible Hinge Tie
—which braces the sides and ends and prevents swaying and sagging — and is absolutely noiseless. Note the two side wire braces and heavy top and center border wires which give additional strength and rigidity.

90 Inches of Tempered Wire
in each coil—99 coils in all. Each coil with 14 loops. Crossed helical springs join top of coils and form a pliant surface which conforms to contour of body.

Extra Heavy Angle Base
with rounded corners and nine tempered steel cross slats below to support two decks of coils above.

The last word in scientifically constructed sleeping equipment. With new principles of construction, new improvements, new specifications as to size, shape and quality of materials, and through four-store buying power, setting a new low level of price.

The upper deck of this spring is flexible for lighter weights, and the lower deck immediately comes into action with added tension on the coils, preventing the heavier weight from sinking down beyond the natural contour of the body.

Truly, a perfect bedspring, dedicated to sound, restful, health-giving sleep. Come in without delay, and let us demonstrate it to you.

$5 Allowance on your old spring
—Regardless of Its Condition

Early last Fall this Crest-O-Rest Spring offer was made to Eugene homes for the first time, and the wonderful response then prompts us to again feature it for ten days only, to enable those who did not take advantage of it then to do so now.

It is your big opportunity to obtain the finest spring you ever slept on—letting your old spring apply as part payment.

Permanent Price of the Crest-O-Rest Spring $23.50
