TWO CANDIDATES ARE HERE

Portland Men Seek Service Commission

Frank B. Layman, Attorney, and J. R. Thiehoff, Railroad Conductor, Visit Eugene

Two Republican candidates for the nomination for state public service commissioner, were in the city yesterday looking after their prospects at the primaries May 15.

The two candidates whose campaign literature circulates in this part of the valley are Frank B. Layman and J. R. Thiehoff, both of Portland.

Mr. Layman is an attorney and Mr. Thiehoff is a train conductor on the S. P. and is between Portland and Astoria.

Mr. Layman recites his qualifications as follows:

1. Practicing attorney with varied experience in rate cases before commission.

2. Seven years' business executive as head of a large wholesale house in Portland.

3. Three years instructor "Corporation Finance" in Y. M. C. A. school of business administration.

His platforms follow: Will use my training and experience in conscientious effort—

1. To protect the public from unfair utility rates.

2. To safeguard capital invested in public utilities.

Mr. Thiehoff has been a railroad conductor for many years and declares that he is thoroughly conversant with the transportation business.

The commission needs just such a man, he said, as one acquainted with transportation problems can be of more service than a man who knows nothing of railroads or other transportation corporations.

VETCH AND RYE ARE TALL

Cover Crop Doing Much for Lane County Soil

G. T. Ray took to the chamber of commerce yesterday some vetch that measured three feet in height and rye that measured five and one-half feet.

These crops were sown last November and are a good sample of what a cover crop is doing for Lane county's soils.

Mr. Ray says there is a wide difference in these crops sown at the same time but upon soils that have produced different kinds of crops each year, showing that some crops deplete the soil much more rapidly than do others and that there is no doubt but that the successive and successful cover crops not only go to replenish the depleted soils but also bring other soils to a high state of productivity.

Over a thousand acres of this cover crop was sown in Lane county during the last year. The farmers generally have taken up this idea and a much larger acreage will be sown from year to year, it is stated.

POWER FIRM OPENS CAMP

Fifty Men Will Be Employed at Black Butte

To clear the way for the new power line of the California-Oregon Power company, a camp of 50 men will be maintained at Black Butte for at least a month, according to officials of the concern who were here yesterday arranging for timber fallers for the camp.

About 30 men are now at work on the right-of-way of the transmission line with headquarters at the Black Butte camp. About 20 more men will be employed on the work when the personnel of the camp is completed.

Fallers and buckers and men to clear the brush was the labor demand of the representatives yesterday, who obtained four men here for the job. The poles from Springfield to Cottage Grove are practically all in place and it is expected that within a week the stringing of the power lines will start.

CORN IS CHANGING HANDS

Fast Disappearance This Season Is Noted

CHICAGO, May 3.—Corn is being distributed this season with a rapidity which is said to be unprecedented.

According to trade figures made public here today, receipts of corn in Chicago between November 1 and May 1 were 103,821,000 bushels, but the stocks in Chicago at the end of that period showed an increase of only 2,049,000 bushels.

By contrast, last year for the same period Chicago receipts were only 66,623,000 bushels, but the stocks increased 3,144,000 bushels. In other words, Chicago has distributed this year 101,000,000 bushels of corn in five months as against 63,000,000 bushels in the corresponding time last year.

Equally fast disappearance of corn is evident elsewhere. This year primary receipts of corn to date amount to 214,000,000 bushels and the total Illinois supply increase is only 17,000,000 bushels, showing an absorption of 197,000,000 bushels whereas the previous year the absorption was but 125,000,000 bushels.

RUSSIAN DEBT NEAR BILLION

Obligations to U. S. Close to That Figure

NEW YORK, May 3.—Russia's obligations to the United States were estimated at from \$700,000,000 to one billion dollars today by local bankers who have been making a close study of the proceedings of the Geneva conference. While accurate statistics are not available at present, this estimate is said to include that country's debt both to the United States and to private American enterprises and banks.

Russia's debt to the United States government is slightly more than \$100,000,000 including two advances under the Liberty bond act. The first advance to the Kerensky government was \$7,500,000 and the second \$90,000,000. No interest has been paid on these obligations.

Obligations to private bankers are estimated as in excess of \$75,000,000.

W. O. STARBUCK PASSES ON

Well-known Resident of Eugene Dies in Portland

Word was received here early this morning to the effect that W. O. Starbuck of Eugene, died at 1 o'clock a. m. today at a Portland sanitarium.

Mr. Starbuck never fully recovered from injuries suffered some time ago when he was struck by an automobile and his untimely demise is attributed to the after effects of that accident. The body will be returned to Eugene for burial.

Further announcement will be made in a subsequent issue.

WU IS REPORTED SLAIN IN BATTLE

Engaged in an attempt to destroy the Mukden railroad at Shanhai-kwan

Fighting has been resumed south of the Peking wall. A terrific explosion this morning shook the windows of the city. It was attributed to the destruction of an arsenal by bombs dropped from airplanes operating for General Chang's army.

Admiral Joseph Strauss, commander of the American Asiatic fleet, after a conference with Minister Schurman, ordered the gunboat Wilmington to proceed from Hong Kong to Tientsin. The foreign vessels now at Tientsin include three Japanese torpedo boats, a British submarine tender, a French gun boat and an Italian gun boat. They will guard the Peking river running inland from Taku to Tientsin.
