When John Tarzoo, son of a wealthy importer of Constantinople, met Miss Helen Wurtzbach in October, 1920, she was librarian at the Massachusetts Institute of Technology in Boston. He implored her to go to Turkey with him, and became so insistent she fled to Chicago, where he followed her and sought to force her, she said, by threats of death, to go. She had him arrested, and United States immigration officials are considering deporting him.

There's Danger Ahead. for those who neglect the first symptoms of eyestrain—smarting, aching eyes, dizziness, persistent headaches, etc. Defective vision is the most frequent cause of these ailments, not dangerous of themselves, but a warning that should be heeded. Imperfect eyesight can usually be relieved instantly by properly fitted glasses if taken in time. But apparently simple defects, if neglected, may lead to serious results, necessitating the wearing of complicated, expensive lenses or even causing blindness. Dr. Sherman W. BEAVER DAMAGE REPORTED DEPUTY GAME WARDEN TO INVESTIGATE COMPLAINTS For the purpose of investigating complaints that have been received from farmers near Elmira concerning damage to their property from the depredations of beavers in that district, Ed Hawker, deputy game warden, is in the city and today will look over the dams that have been constructed across several of the small streams by the busy water rodents. As there is no open season on beavers and they are under state protection at all times of the year the farmers have to obtain permission before trapping the animals. The game warden states that as the beavers are the property of the state if they are trapped the pelts are turned over to the fish and game commission for disposal but that they are not in marketable condition during the summer months.
